ACKNOWLEDGEMENT	6
EXTENDED SUMMARY	7
1. INTRODUCTION	9
1.1 Objectives and structure of the report	10
1.1.1 Specific objective	10
1.1.2 Structure of the report	10
1.2 Location and accessibility	11
1.3 Population and settlement	12
1.4 Previous activities in the study area	12
1.5 Applied methodologies for the study	13
1.5.1 Methods used in phase I (pre-field study)	13
1.5.2 Methods used in phase II (field study)	13
1.5.3 Methods used in phase III (post-field study)	14
2. GEOMORHOLOGY, VEGETATION, SOIL, LAND COVER AND LAND USE	15
2.1 Highlands of the northwestern part (El-Kere Mountains)	15
2.2 Gently sloping lowlands (the central part)	15
2.3 Alluvial and eluvial plains (flood plains)	15
2.4 Vegetation cover	16
2.5 Soil	17
2.6 Land use and land cover	19
3. CLIMATIC CHARACTERISTICS AND HYDROLOGY	21
3.1 Climatic characteristics	21
3.1.1 Rainfall	22
3.1.2 Temperature	23
3.1.3 Wind speed	24
3.1.4 Potential evapotranspiration (PET)	24
3.2 Hydrology	25
3.2.1 The Wabi Shebelle basin	26
3.2.2 The Genale-Dawa basin	27
3.2.3 Surface flow	27
3.2.4 Baseflow and recharge	31
4. GEOLOGY	34
4.1 Regional geology	34

4.2 Lithology of the study area.....	36
4.2.1 Chew Bet Evaporite (MCBe - Korah Formation - Kg1 and Kg2).....	36
4.2.2 Bargele limestone (MBlst - Mustahil Formation - Km).....	37
4.2.3 El-Kere sandstone (MEsst).....	37
4.2.4 Quaternary basalt (Quaternary volcanic rocks - Qv).....	37
4.2.5 Alluvial deposits (Quaternary sediment - Q, Qa, Qe).....	37
4.3 Structural geology	37
5. HYDROGEOLOGY	39
5.1 General hydrogeological characteristics	39
5.2 Groundwater points in the study area	39
5.2.1 Springs	39
5.2.2 Dug wells	40
5.3 Hydrogeological characterization/classification of aquifers	41
5.4 Hydrogeological system of the study area	42
5.4.1 Extensive and moderately productive porous aquifers	43
5.4.2 Extensive aquifers with shallow groundwater	44
5.4.3 Extensive and moderately productive fissured and karstic aquifers	44
5.4.4 Aquitards	47
5.4.5 Aquicludes	47
5.5 Groundwater flow, recharge and discharge areas and conceptual model.....	50
5.5.1 Groundwater flow direction.....	50
5.5.2 Recharge areas	51
5.5.3 Discharge areas	51
5.5.4 Groundwater levels	52
5.6 Hydrogeological conceptual model	52
6. HYDROCHEMISTRY	54
6.1 Sampling and analysis.....	54
6.2 Major constituents	54
6.3 Classification of the natural waters.....	55
6.4 Graphical presentation of hydrochemical data.....	57
6.5 Hydrochemistry of rainwater	59
6.6 Water quality.....	59
6.6.1 Domestic use quality requirements	60
6.6.2 Irrigation use quality requirements.....	61
6.7 Industrial use quality requirements.....	64
6.8 Groundwater quality problem in the study area	67

7. GROUNDWATER RESOURCES ASSESSMENT AND DEVELOPMENT PERSPECTIVE	70
7.1 Groundwater resources.....	70
7.2 Groundwater development in the quaternary alluvial and eluvial deposits	71
7.2.1 Development possibility in alluvial and eluvial deposits around Hargelle.....	72
7.2.2 Development possibility in alluvial and eluvial deposits around El-Kere town	73
7.3 Development possibility in karstic aquifers of the Bargele limestone (Mustahil formation)	73
7.4 Surface water development and rainwater harvesting in the study area	73
7.5 Water demand and water supply.....	75
7.6 Recommended sites for well siting	76
8. CONCLUSIONS AND RECOMMENDATIONS	78
8.1 Conclusions.....	78
8.2 Recommendations.....	78
REFERENCES	80

APPENDIXES

- Annex 1 Water point inventory
- Annex 2 Chemistry of water samples
- Annex 3 Well Logs

LIST OF MAPS

- Map 2. Hydrogeological map of NB 38-9 El-Kere
- Map 3. Hydrochemical map of NB 38-9 El-Kere

List of Figures

Name of Figure	Page
Fig. 1.1 Location and accessibility map of the study area.....	11
Fig. 1.2 Groundwater sampling during the field study.....	13
Fig. 1.3 Field measuring the chemical characteristics of collected groundwater.....	14
Fig. 2.1 El-Kere Mountains (chain of mountains in the northwestern part).....	15
Fig. 2.2 A 3D view of the study area.....	16
Fig. 2.3 The most common vegetation types in the study area.....	17
Fig. 2.4 Soil map of the study area.....	19
Fig. 2.5 Land cover map of the study area.....	20
Fig. 3.1 Spatial distribution of climatic zones.....	21
Fig. 3.2 Annual rainfall distribution in the Gode meteorological station.....	22
Fig. 3.3 Monthly rainfall distribution in the study area.....	23
Fig. 3.4 Mean, max and minimum temperature in the study area.....	23
Fig. 3.5 Wind speed in the study area.....	24
