

# CONTENTS

1. Introduction.....	5
2. Aerosols.....	5
2.1. Particle and aerosol properties .....	6
2.2. Particle deposition mechanisms.....	6
3. Respiratory system.....	7
3.1. Airway anatomy .....	7
4. Modelling and measurement of the aerosol-airway interactions .....	8
4.1. Experimental techniques and their application .....	8
4.2. Description of the modelling approaches.....	14
4.3. Deposition of fibres in human lungs .....	22
5. Conclusions and future work .....	24
Nomenclature .....	26
References.....	27
Author's own scientific papers included in the habilitation.....	29
Abstract .....	31
Abstrakt.....	31
