- 12 Coping with food price volatility: The contribution of local food reserves** 151
GABRIEL PONS CORTÈS AND ITZÍAR GÓMEZ CARRASCO

PART 3

Policy discussion and conclusions 159

- 13 Assessment of national policies in developing countries to combat and mitigate the effects of agricultural markets' excessive price volatility** 161
MULAT DEMEKE AND JEAN BALIÉ
- 14 Price volatility perceptions, management strategies, and policy options in EU food supply chains** 178
TSION TAYE ASSEFA, MIRANDA P. M. MEUWISSEN
AND ALFONS G. J. M. OUDE LANSINK

15 Book summary and ULYSSES project's conclusions 193

PLAMEN MISHEV, ALBERTO GARRIDO, NEDKA IVANOVA
AND MILKANA MOCHUROVA

Index 213

Sergio René Arango Echea has been a research fellow at the European Commission's Joint Research Centre – Institute for Prospective Technological Studies, Seville, Spain, since 2013. Between 2006 and 2012, he worked as research assistant at the Department of Agricultural Economics and Rural Development at the Georg-August-Universität Göttingen (Göttingen, Germany); from 2000 to 2006, he worked in private industry in Mexico. He studied Chemistry at the Universidad La Salle (Mexico City, Mexico) and Agricultural Economics at the Georg-August-Universität Göttingen (Göttingen, Germany), where he received his doctorate.

Marco Aravia holds a PhD in Agricultural Economics and has vast experience in economic modelling, market analysis, policy support, climate change and risk/stochastic modelling. Before joining DIW Econ in April 2014, he worked for the European Commission at the Joint Research Centre – Institute for Prospective Technological Studies (JRC IPTS) in Seville, Spain. The main focus of his work at IPTS was the applied economic analysis of agricultural markets and policies under the consideration of uncertainty. At DIW Econ, he has been responsible for the CGE-based study of green growth policies for Kazakhstan.

Tahar Taye Assefa is currently a PhD candidate (since September 2012) at the Business Economics Group and Wageningen School of Social Sciences of the Department of Social Sciences of Wageningen University. Her PhD thesis is on “The impact of food price volatility in European food supply chains and the effectiveness of price risk management strategies in reducing the risk from price volatility”. Her research interests include econometrics, industrial organization and risk management in agriculture.

Jean Balic is Senior Economist in the Agricultural Development Economics Division of the Food and Agriculture Organization, where he manages the Monitoring and Analysing Food and Agricultural Policies (MAFAP) Programme. He has over 16 years of experience on policy analysis in developing and developed countries. He also worked for the French Ministry of Agriculture on bilateral cooperation and international trade negotiations.
