<b>INTRODUCTION</b>	<b>1</b>
Welcome to a new era	1
A handbook of everything	3
When it's all so global, what can I do?	5
What values underpin this book?	6
What can we aim for?	8
Not the last word...	9

<b>1 FOOD</b>	<b>11</b>
How much food energy do we need to eat?	12
How much food do we grow worldwide?	12
What happens to the food we grow?	12
Given the global surplus, why are some people malnourished?	15
Why don't more people explode from over-eating?	16
How many calories do we get from animals?	16
How much do animals help with our protein supply?	17
Do we need animals for iron, zinc or vitamin A?	19
How much of our antibiotics are given to animals?	20
How much deforestation do soya beans cause?	21
What's the carbon footprint of agriculture?	22
What are the carbon footprints of different foods?	23
Should I go veggie or vegan?	26
What can shops do about meat and dairy habits?	28
What can restaurants do?	28
What can farmers and governments do?	29
How could one crop save us over half a billion tonnes CO <sub>2</sub> e?	29
Is local food best?	30
Where does fish fit in?	32

<i>When is a seabass not a seabass?</i>	33
<i>How can we sustain our fish?</i>	34
<i>What food is wasted, where and how?</i>	36
<i>How can we cut the world's waste?</i>	39
<i>Why don't supermarkets care more about their waste?</i>	41
<i>When food can't be sold or eaten, what should be done with it?</i>	42
<i>How much food goes to biofuel?</i>	44
<i>How many farmers does the world need?</i>	44
<i>How can new technologies help feed the world?</i>	45
<i>How can we produce enough food for 9.7 billion of us in 2050?</i>	46
<i>Why do we all need to know our food supply chains?</i>	48
<i>What investments are needed into food land and sea?</i>	48
<i>Food action summary: What can I do and what can be done?</i>	50
 <b>2 MORE ON CLIMATE AND ENVIRONMENT</b>	 <b>51</b>
<i>What are the fourteen things that every politician needs to know about climate change?</i>	51
<i>What are the biodiversity stats? And why do they matter?</i>	53
<i>What is Ocean Acidification and why does it matter?</i>	54
<i>How much plastic is there in the world?</i>	55
<i>Is fossil fuel better burned or turned into plastic?</i>	57
 <b>3 ENERGY</b>	 <b>59</b>
<i>How much do we use?</i>	59
<i>How has our use changed over time?</i>	60
<i>What do we use it for?</i>	62
<i>Where do we get it all from?</i>	63
<i>How bad are fossil fuels?</i>	64
<i>How much energy comes from the sun?</i>	66
<i>Can the sun's energy be harnessed?</i>	66
<i>How much solar power could we ever have?</i>	67
<i>Which countries have the most sunlight?</i>	69
<i>Which countries have the least sun per person?</i>	70
<i>What about when the sun isn't shining?</i>	71

How useful is wind energy?	73
Which countries have the most wind per person?	74
Why is sun better than rain?	75
Is nuclear nasty?	75
Would fusion solve everything?	77
Are biofuels bonkers?	78
Should we frack?	79
Does more renewables mean less fossil fuel?	81
What is the catch with energy efficiency?	82
Given the catch, what can efficiency do for us?	84
Why is cleaning our electricity just the easy part of the transition from fossil fuels?	85
How can we keep the fuel in the ground?	87
Who has the most fossil fuel and how will they cope?	89
Will we need to take carbon back out of the air?	91
How much energy are we on track to use in 2100?	93
Can enough energy ever be enough?	94
Energy solution summary	95
Energy: What can I do?	97
<b>4 TRAVEL AND TRANSPORT</b>	<b>99</b>
How much do we travel today?	99
How much travel will we want in the future?	100
How many travel miles can we get from a square meter of land?	101
How can we sort out urban transport?	104
Will shared transport make life better or worse?	105
Should I buy an electric car?	106
How urgently should I ditch my diesel?	107
Could autonomous cars be a disaster? Or brilliant?	109
How can we fly in the low carbon world?	110
Should I fly?	112
Do virtual meetings save energy and carbon?	113
How bad are boats? And can they be electrified?	114
E-bikes or pedals?	116
When might we emigrate to another planet?	117

<b>5 GROWTH, MONEY AND METRICS</b>	<b>119</b>
Which kinds of growth can be healthy in the Anthropocene?	120
Why is GDP such an inadequate metric?	123
How do our metrics need to change?	124
What metrics do we need to take more note of?	126
What metrics do we need to downgrade?	126
Can the free market deal with Anthropocene challenges?	127
Which is better, the market economy or the planned economy?	128
What is trickle-down and why is it dangerous?	130
Why might wealth distribution matter more than ever?	131
How is the world's wealth distributed?	132
Why are most Americans so much poorer than most Italians?	133
How has wealth distribution been changing?	135
When is wealth distributed like the energy in a gas? (And when is it not?)	136
How can human wealth become more like the energy in a gas?	138
What should we invest in?	140
How can these essential investments be funded?	142
Why does the right tax make us better off?	142
Do we need a carbon price?	145
How expensive will carbon need to become?	147
How should I spend my money?	147
<b>6 PEOPLE AND WORK</b>	<b>149</b>
Does it all come down to population?	149
What can I do to help with population?	150
When is a 'job' a good thing?	151
How much of a person should come to work?	152
Why would anyone work if they already had a citizen's wage?	153
What are my chances of being in prison?	155
<b>7 BUSINESS AND TECHNOLOGY</b>	<b>158</b>
When is it good that an organisation exists?	158
How can businesses think about the world?	159

How can a business think systemically?	160
What is a science-based target?	164
What is so special when science-based targets are applied to the supply chain?	165
Do we drive technology growth, or does it drive us?	166
How can we take control of technology?	168
<b>8 VALUES, TRUTH AND TRUST</b>	<b>169</b>
What is the evidence base to choose some values over others?	169
What values do we need to be the new global cultural norms?	171
Can we deliberately change our values?	172
What makes our values change?	172
Is there even such a thing as 'truth' or 'facts'?	175
Is 'truth' personal?	176
Why is dedication to 'truth' more important than ever?	177
What is a culture of truth?	177
Is it possible to have a more truthful culture?	178
What can I do to promote a culture of truth?	178
What can journalists do to promote truth?	179
What can politicians do?	180
How can I work out who and what to trust?	180
What are some bad reasons for placing trust?	182
How can I tell whether to trust anything in this book?	183
<b>9 CONCLUSION: THINKING SKILLS FOR TODAY'S WORLD</b>	<b>185</b>
What new ways of thinking do we need in the twenty-first century?	185
How can twenty-first century thinking skills be developed?	191
Where is religion and spirituality in all this?	192
What questions were missing? What answers were wrong?	194
<b>Big Picture Summary</b>	<b>195</b>
<b>What Can I Do? Summary</b>	<b>198</b>
<b>Appendix: Climate Change Basics</b>	<b>200</b>

Alphabetical Quick Tour	212
Notes on Units	242
Endnotes	245
