

**"This Handbook is an excellent resource for all levels of forensic anthropology and archaeology practitioners around the globe. There are updates for methodologies used in skeletal analyses, interesting and relevant case studies and a fascinating glimpse into the ways forensic anthropology is used in different international jurisdictions each with their own challenges. The topics covered are comprehensive and well-conceived. A must-have for any forensic library."**

**Laura C. Fulginiti, Forensic Anthropologist, Maricopa County Office of the Medical Examiner, USA**

**"The Handbook is global and encyclopaedic. The seventy front-line practitioner-contributors have ensured that all of the nooks and crannies have been looked into and what is known, and what needs to be known, set out. History, overviews, case studies, and matters professional and ethical – the scale, scope, detail and erudition of this work is nothing short of wonderful."**

**Stephen Cordner, Victorian Institute of Forensic Medicine and Monash University, Australia**

**With contributions from 70 experienced practitioners from around the world, this second edition of the authoritative *Handbook of Forensic Anthropology and Archaeology* provides a solid foundation in both the practical and ethical components of forensic work. The book weaves together the discipline's historical development; current field methods for analyzing crime, natural disasters, and human atrocities; an array of laboratory techniques; key case studies involving legal, professional, and ethical issues; and ideas about the future of forensic work—all from a global perspective. This fully revised second edition:**

- provides an updated perspective of the disciplines of forensic anthropology and archaeology;
- expands the geographic representation of the first edition by including chapters from practitioners in South Africa and Colombia;
- adds exciting new chapters on the International Commission on Missing Persons and on forensic work being done to identify victims of the World War I Battle of Fromelles.

**Soren Blau is the Senior Forensic Anthropologist at the Victorian Institute of Forensic Medicine and an Adjunct Senior Lecturer in the Department of Forensic Medicine at Monash University, Australia.**

**Douglas H. Ubelaker is a curator and senior scientist at the Smithsonian Institution's National Museum of Natural History, as well as a lecturer at George Washington University and an adjunct professor at Michigan State University, USA.**
