

A key aspect of town planning, landscape planning and landscape architecture is to identify and then use the distinctive features and characteristics of space, place and landscape to achieve environmental quality. *Landscape Analysis* provides an introduction to the field both in theory and in practice. A wide range of methods and techniques for landscape analysis is illustrated by urban and rural examples from many countries.

Analysing landscapes within a planning context requires both skill and insights. Drawing upon numerous concrete examples, together with an examination of some theoretical concepts, this book guides the reader through a wide range of different approaches and techniques of landscape analysis that may be applied at different scales, from elementary site analysis to historical and regional studies. This is an essential book for students and graduate practitioners working in landscape architecture, planning and architecture.

Per Stahl Schmidt is a Landscape Architect and until 2008 was partner in a landscape firm and Associate Professor at the University of Copenhagen, Denmark. He worked mainly with landscape planning and landscape design. Now he is retired.

Simon Swaffield is Professor of Landscape Architecture at Lincoln University in New Zealand, and from 2011 has been Honorary Professor at the University of Copenhagen, Denmark. He is also a registered Landscape Architect in New Zealand.

Jørgen Primdahl is a Landscape Architect and Professor of Countryside Planning at the University of Copenhagen, Denmark. He works mainly with rural landscape policy and planning.

Vibeke Nellemann is a Landscape Architect and was responsible for research, development and teaching in methods for landscape analysis, planning and management at the University of Copenhagen, Denmark, until her retirement in 2015.

<i>List of illustrations</i>	ix
<i>Foreword</i>	xiii
<i>Preface</i>	xv
<i>Acknowledgements and credits</i>	xvi
1 Landscape change and the need for analysis	1
<i>Introduction</i>	1
<i>Content and structure</i>	3
<i>The landscape concept – origins and definitions</i>	4
<i>Analysis</i>	5
<i>Changing landscapes</i>	6
<i>Landscape policy, planning and design</i>	10
<i>Landscape analysis in a decision-making context</i>	11
<i>The nature of landscape analysis</i>	11
<i>Scope and settings of landscape analysis</i>	15
<i>Applications of landscape analysis</i>	16
2 Framing analysis: values, experts and citizens	18
<i>Introduction</i>	18
<i>Framing values</i>	19
<i>Types of values</i>	22
<i>Karby – an example of managing values</i>	23
<i>Identifying citizens, communities and stakeholders</i>	27
<i>Collecting information on values</i>	29
<i>Conclusion</i>	32
3 Analysis of natural factors, biophysical attributes and land use	33
<i>Introduction</i>	33
<i>Natural factors</i>	35

	<i>Land cover</i>	36	
	<i>Land use</i>	38	
	<i>Main case: biophysical analysis, Kaloe</i>	39	
	<i>Variations</i>	45	
	Geomorphology	45	
	Terrain	46	
	Soil	52	
	Hydrology and drainage networks	52	
	Land cover and land use	54	
4	Historical analysis		61
	<i>Introduction</i>	61	
	<i>Relevance to planning solutions</i>	63	
	<i>Sources for historical analysis</i>	63	
	<i>Three methods</i>	64	
	The retrospective method	65	
	The retrogressive method	67	
	The chronological method	69	
	<i>Variations</i>	71	
	Historical series of topographic maps	71	
	Historical series of thematic maps	73	
	Comprehensive mapping	73	
	Landscape biography	75	
5	Spatial analysis		78
	<i>Introduction</i>	78	
	<i>Main case: The Image of the City</i>	80	
	<i>Variations</i>	84	
	Visibility analysis	85	
	Eye-level analysis	85	
	Figure ground	88	
	Serial vision	89	
	Nolli's analysis	91	
	Higuchi analysis	92	
	SAVE structural analysis	93	
	SAVE urban edge analysis	93	
	LCA (DK) spatial-visual analysis	94	
	Infrastructure analysis	95	
6	Regionalisation and landscape character assessment		99
	<i>Introduction</i>	99	
	<i>Regionalisation and land classification</i>	99	
	<i>Equivalent or nested hierarchical classification</i>	102	

	<i>Landscape ecological classification</i>	102
	<i>Procedure for regionalisation</i>	103
	<i>Thematic approach</i>	104
	<i>Topographic approach</i>	106
	<i>Nested hierarchical classification into landscape areas/types, England</i>	106
	<i>Main case A: nested hierarchical landscape analysis Skive</i>	109
	<i>Main case B: the Danish LCA approach Svendborg</i>	116
	<i>Landscape characterisation / phase A</i>	118
	<i>Landscape judgement / phase B</i>	122
	<i>Landscape strategy / phase C</i>	125
	<i>Implementation / phase D</i>	126
7	Site selection and landscape potential	129
	<i>Introduction</i>	129
	<i>Procedure</i>	133
	<i>Identifying and grouping selection factors</i>	135
	Development requirements and landscape potentials or constraints	136
	Definitive or relative site constraints	138
	Reciprocity in potentials and constraints	139
	Zones of influence around sensitive locations	140
	Future site possibilities	141
	Scale	142
	<i>Main case: McHarg's overlay analysis</i>	142
	<i>Variations</i>	146
	Skovbo site-selection analysis	147
	Danish LCA site-selection analysis Randers Bay	149
8	Impact assessment and futures analysis	153
	<i>Introduction</i>	153
	<i>Impact assessment (IA)</i>	154
	<i>Environmental impact assessment (EIA) reporting</i>	156
	<i>Landscape visual and aesthetic assessment</i>	157
	<i>Main case: aesthetic EIA assessment Frederikssund Motorway</i>	159
	<i>Variations</i>	164
	Representing change	164
	Analysing change	166
	Futures analysis and alternative futures	170
	<i>Case A: alternative futures, Oppdal</i>	171
	<i>Case B: alternative futures, Willamette Valley</i>	173

9 Landscape analysis in research and practice	176
<i>Introduction</i>	176
<i>Landscape analysis and landscape democracy</i>	177
<i>Improving landscape analysis – research into process, methods and techniques</i>	179
<i>Landscape analysis as research</i>	181
<i>Conclusion</i>	184
 <i>References</i>	 185
<i>Glossary</i>	195
<i>Index</i>	200
