Czech Introduction (předmluva)

PART ONE

Introduction

1. Glossary of Economics	7
2. System Approach and Mathematical Modelling in Econometrics	9
3. Spatial Information Systems	12

PART TWO

Microeconomics

1. Market	14
1.1. The Circular Flow	14
1.2. Goods and Services	14
1.3. Law of Demand and Supply	14
1.4. Behaviour on the Market	15
1.5. Competition and Changes in Equilibrium	17
2. Indifference Analysis- Behaviour of Consumer	19
2.1. Tastes and Consumer Choice	19
2.2. Budget Constraints, Effect of a Change	21
2.3. Consumer's Equilibrium	23
2.4. Comparative Statics	25
2.5. Deriving a Demand Curve	29
2.6. Deriving an Engel Curve	31
2.7. Substitution and Income Effect	31
3. Elasticity	33
3.1. Price Elasticity of Demand	33
3.2. Price Elasticity of Supply	36
3.3. Income Elasticity	36
3.4. Elasticity in Short and Long Period of Time	37
3.5. Market Dynamics	37
4. Production Analysis- Behaviour of Producer	38
4.1. The Production Function	38
4.2. Isoquants	40
4.3. Returns to Scale	42
4.4. Isocosts	43
4.5. Comparative Statics – Changes in Input Prices	44

5. Cost and Revenue	46
5.1. Total Cost and Average Cost	46
5.2. Economies of Scale	47
5.3. Short- and Long- Run cost Analysis	49
5.4. Total and Marginal Revenue	50
5.5. Optimal Output and Profit Maximising	50
5.6. A Firm's Rules of Behaviour	51
6. Market Failure	56
6.1. Monopoly and Monopolistic Competition	56
6.2. Oligopoly	59
6.3. Public and Private Goods	60
6.4. Missing Markets and Externalities	61
6.5. Emerging Markets	62
List of Figures	64
