Detailed contents

Preface	xiii
1 Political Research	1
Issues in political research	2
The research process	7
Part 1: Philosophy of Social Science: Knowledge and Knowing in Social Science Research	8
Part 2: How to do Research: An Overview	10
Part 3: How to do Research in Practice	13
Conclusions	20
References	20
PART 1: Philosophy of Social Science: Knowledge and Knowing in Social Science Research	
.....	
2 Forms of Knowledge: Laws, Explanation, and Interpretation in the Study of the Social World	25
Chapter Summary	25
Introduction	25
Positivism	26
Challenges to positivist approaches in the social sciences	34
Conclusions	49
Questions	51
Guide to Further Reading	51
References	52
3 Objectivity and Values	54
Chapter Summary	54
Introduction	54
Normative and empirical theory in political research	56
Values, the researcher, and the research process	57
Values and social practice	62
Conclusions	75
Questions	76
Guide to Further Reading	77
References	77

PART 2: **How to do Research: An Overview**

4	Asking Questions: How to Find and Formulate Research Questions	81
	Chapter Summary	81
	Introduction	81
	Research questions: What are they? Where do they come from?	85
	How to formulate a research(able) question	91
	The literature review	102
	Conclusions	107
	Questions	108
	Guide to Further Reading	108
	References	109
5	Finding Answers: Theories and How to Apply Them	111
	Chapter Summary	111
	Introduction	111
	Answers to research questions: general requirements	114
	Specifying your argument or answer: the nuts and bolts	126
	Answering normative questions	139
	Conclusions	142
	Questions	143
	Guide to Further Reading	143
	References	144
6	Research Design	146
	Chapter Summary	146
	Introduction	146
	Basic principles of research design	148
	Types of research design	150
	Data-gathering strategies: how the data are collected	158
	Ethical research	161
	Conclusions	164
	Questions	165
	Guide to Further Reading	165
	References	166
7	What is Data?	168
	Chapter Summary	168
	Introduction	168
	From concepts to measurement	169

Validity	171
Example: measuring corruption	172
Reliability	173
Selection issues	174
Types of data	176
Big data	181
Data quality checklist	184
Conclusion	185
Questions	185
Guide to Further Reading	186
References	186

14 Textual Analysis

PART 3: How to do Research in Practice

8 Experimental Research	191
Chapter Summary	191
Introduction	191
Basic principles of experimental design	192
Laboratory experiments	194
Field experiments	198
Natural experiments	201
Issues in experimental research	204
Conclusions	207
Questions	207
Guide to Further Reading	208
References	208
9 Comparative Research	211
Chapter Summary	211
Introduction	211
The principles of comparison	212
How we compare	214
Case study	214
Small-N comparison	217
Most Similar Systems Design: Bivariate Analysis	219
Most Different Systems Design	221
Issues in small-N research	223
Qualitative comparative analysis (intermediate N)	227

PART 2: Quantitative analysis (large-N comparison)	231
Conclusions	235
Questions	235
Guide to Further Reading	236
References	236
10 Historical Research	239
Chapter Summary	239
Introduction	239
Historical approaches in Politics and International Relations	240
Using documents, archival sources, and historical writing as data	252
Conclusion	256
Questions	257
Guide to Further Reading	257
References	258
11 Surveys	261
Chapter Summary	261
Introduction	261
The elements of a good survey	262
What you ask: questionnaire design	263
Who you ask: sample design	273
How you ask: interview mode	278
Conclusions	282
Questions	283
Guide to Further Reading	283
References	284
12 Interviewing and Focus Groups	285
Chapter Summary	285
Introduction	285
Interviews	286
Focus groups	301
Analysing interview data	304
Conclusions	308
Questions	309
Guide to Further Reading	310
Software	311
References	311

13	Ethnography and Participant Observation	313
	Chapter Summary	313
	Introduction	313
	The principles of ethnography and participant observation	314
	Choosing a research site	319
	Doing participant observation	324
	Recording observations	329
	Conclusions	331
	Questions	332
	Guide to Further Reading	332
	References	333
14	Textual Analysis	335
	Chapter Summary	335
	Introduction	335
	Discourse analysis	336
	Content analysis	345
	Conclusions	355
	Questions	357
	Guide to Further Reading	357
	References	359
15	Quantitative Analysis: Description and Inference	362
	Chapter Summary	362
	Introduction	362
	Descriptive and inferential statistics	363
	Levels of measurement	364
	Summarizing the data	366
	Tables	367
	Graphs and figures	370
	Summarizing the distribution using statistics	372
	Conclusions	388
	Questions	389
	Guide to Further Reading	389
	References	390
16	Patterns of Association: Bivariate Analysis	391
	Chapter Summary	391
	Introduction	391

313	The principles of bivariate analysis	392
313	Association and causality	394
313	Bivariate analysis for interval data	395
314	Bivariate analysis for categorical data: cross-tabulation	407
319	Conclusions	415
320	Questions	415
329	Guide to Further Reading	415
331	References	416
17	A Guide to Multivariate Analysis	417
332	Chapter Summary	417
333	Introduction	417
333	The principles of multivariate analysis: statistical control	418
335	Specifying different types of relationship	420
335	Multivariate analysis using OLS regression	423
336	Multivariate analysis using logistic regression	431
342	Presenting and reporting data	442
352	Conclusions	443
352	Questions	444
352	Guide to Further Reading	444
352	References	444
362	Appendix	447
	Glossary	453
	Index	461
362	Interviewing and Focus Groups	285
367	Chapter Summary	285
370	Introduction	285
372	Interviews	285
388	Focus groups	303
389	Analysing interview data	303
389	Conclusions	303
390	Questions	303
391	Guide to Further Reading	311
391	Software	311
391	References	311
