INTRODUCTION.....	5
1 THEORETICAL BASICS OF HEALTH BEHAVIOUR RESEARCH	8
1.1 Classic theories of social behaviour	8
1.2 Models of health cognition	9
1.3 The intention-behaviour gap.....	22
1.4 Modern approaches in health behaviour research	23
1.5 Theories of maintenance of behaviour change	25
2 HEALTH BEHAVIOUR CHANGE TECHNIQUES.....	27
2.1 Health behaviour change taxonomy	27
2.2 Key behaviour change techniques	30
2.2.1 Self-monitoring	31
2.2.2 Motivational interviewing	32
2.2.3 Implementation intentions	33
2.2.4 Incentives	34
2.3 Critical analysis of behaviour change techniques	35
3 THE METHODOLOGY OF HEALTH BEHAVIOUR RESEARCH.....	37
3.1 Questionnaire methods.....	37
3.2 Observational methods	40
3.3 Experimental methods	41
3.4 Qualitative methods.....	43
4 ENVIRONMENT-BASED AND POLICY-BASED APPROACHES TO HEALTH CONSCIOUS BEHAVIOUR.....	45
4.1 Application of classic and social/health cognition models.....	45
4.2 Direct environmental impacts on behaviour	46
4.2.1 Nudge theory and choice architecture.....	46
4.2.2 Social norms as environmental guides to behaviour	49
4.3 Indirect impacts on behaviour.....	50
4.4 Determining behaviour through environment and cognitions.....	51
4.5 Policy-based approaches to behaviour change.....	52
4.5.1 Warning labels and price increase.....	52
4.5.2 Tobacco and sugary drinks.....	53
4.5.3 Social marketing approach to health behaviour change	53
5 FRUIT AND VEGETABLE IN HEALTH CONSCIOUS FOOD CONSUMPTION	55
5.1 Importance of adequate fruit and vegetable consumption	55
5.2 Food and nutrition security	56
5.3 The nutrition transition	58

5.4	Factors that potentially influence fruit and vegetable consumption	59
5.5	General behaviour change strategies in fruit and vegetable	60
6	RESEARCH STUDY ON FRUIT AND VEGETABLE CONSUMPTION IN SLOVAKIA	62
6.1	Objectives and methods in exploring fruit and vegetable consumption	62
6.2	Fruit and vegetable consumption patterns.....	65
6.3	Factors affecting fruit and vegetable consumption patterns	67
6.4	Individual preference for and aversion to specific fruit and vegetables	71
6.5	Attitudes and perceptions influencing fruit and vegetable consumption	73
6.6	Importance of adequate fruit and vegetable consumption	74
6.7	Summary of various groups' opinions.....	75
6.8	Current practices associated with fruit and vegetable consumption	80
6.8.1	Influence of food availability on fruit and vegetable consumption.....	81
6.8.2	Influence of accessibility on fruit and vegetable consumption	82
6.8.3	Influence of nutritional adequacy on fruit and vegetable consumption...	85
6.8.4	Influence of acceptability on fruit and vegetable consumption.....	86
6.8.5	Influence of agency on fruit and vegetable consumption.....	87
6.9	Summary of underlying factors influencing fruit and vegetable consumption..	88
6.10	Suggested interventions to increase fruit and vegetable consumption	91
7	HEALTH PERCEPTION AND FOOD CHOICE FACTORS IN PREDICTING HEALTHY CONSUMPTION AMONG ELDERLY.....	93
7.1	Health perception in elderly segment.....	93
7.2	Health beliefs, food choice motives and attitudes towards healthy eating	95
7.3	Factors influencing food behaviour	99
7.4	Effects of health beliefs on healthy eating behaviour.....	105
8	HEALTH CONSCIOUS FOOD CONSUMPTION BEHAVIOUR – AGE-SEGMENTS ANALYSIS.....	107
8.1	Impact of age on food consumption	107
8.2	Indicators and determinants of healthy consumption.....	111
	CONCLUSION	117
	REFERENCES.....	119
