

Contents

STRUCTURE	7
1. Introduction	9
2. Cytology of the neuron	13
Cell membrane	13
Conduction and transmission of nerve signal (impulse)	15
Synapses and neurotransmitters	16
Nucleus	18
Cytoplasmic organelles	18
Axonal transport	19
3. Neuroglial and ependymal cells	20
4. Development of the CNS and principles of its composition	22
5. Peripheral nervous system	29
A. Sensory nerve endings (receptors)	31
B. Effector nerve endings	38
C. Ganglia	40
D. Peripheral nerve fibres	41
6. Injury and regeneration	43
retrograde changes – Axon reaction	44
Degeneration (wallerian) and regeneration in peripheral nerves	44
Axonal degeneration and regeneration in the CNS	45
7. Spinal cord	47
A. External description	47
B. Transverse sections	49
An outline of major spinal tracts	51
C. Inner structure of spinal gray matter	52
Major types of spinal neurons	52
Laminae of Rexed	55
8. Brain stem	57
A. External description	58
a. Medulla oblongata	58

b. Pons Varoli	64
c. Fossa rhomboidea.....	64
d. Mesencephalon	65
B. Transverse sections	67
a. Lower medulla	67
b. Upper medulla	67
c. Lower pons	69
d. Upper pons	71
e. Ponto – mesencephalic transition	71
f. Mesencephalon	71
g. Longitudinal and oblique brain stem sections	74
C. Inner structure	75
a. Nuclei fasciculorum dorsaliū, nuclei of dorsal fascicles	75
b. Nuclei nervorum cranialium, nuclei of cranial nerves.....	75
1. Somatic motor nuclei	75
2. Visceral motor nuclei.....	80
3. Visceral sensory nuclei	81
4. Somatic sensory and special sensory nuclei	82
c. Formatio reticularis, reticular formation	84
d. Nuclei precerebellares, nuclei connected to the cerebellum	88
1. Nuclei pontis and nuclei arcuati	88
2. Nuclei olivares	88
3. Nuclei of the reticular formation cerebellar system:	89
e. Tectum mesencephali, roof of the midbrain	89
f. Tegmentum mesencephali, central part of the midbrain	90
g. Brain stem tract fields	91
9. Cerebellum	94
A. External description	95
B. Cerebellar cortex	100
Cells and fibres of cerebellar cortex	101
C. Cerebellar nuclei	104
10. Diencephalon	106
I. Thalamus	107
A. External description	107
B. Sections through the thalamus	111
C. Thalamic nuclei	112
Functional classification of thalamic nuclei	115
II. Subthalamus	116
A. Subthalamic nuclei	116
B. Bundles of fibres of the subthalamus	118
III. Hypothalamus	119
A. External description and sections	119
B. Hypothalamic nuclei	121
C. Bundles of fibres of the hypothalamus	124
IV. Hypophysis cerebri and hypothalamo-hypophyseal system	125
Adenohypophysis.....	126
Neurohypophysis	128

11. Telencephalon	129
Gross topography	129
1. The basal part of the telencephalon	131
2. The dorsal part of the telencephalon	132
3. The medial part of the telencephalon – lamina epithelialis	134
12. Basal ganglia	135
A. Corpus striatum	137
Nucleus caudatus	138
Putamen	138
B. Globus pallidus – pallidum	140
C. Nucleus amygdalae – amygdala	141
D. Claustrum	141
13. Cerebral Cortex	143
I. Topography of cerebral hemispheres	144
A. Main sulci and lobes	144
B. Sulci et gyri	145
II. The inner structure of the cortex	149
A. Paleocortex	151
B. Archicortex	153
C. Neocortex	155
1. Cytoarchitectonic maps and cortical areas	158
2. Cells of cerebral cortex	158
3. Layers of cerebral cortex	159
III. Functional cortical localization	161
A. Functional areas for motor activity	161
B. Functional areas for sensory and general sensory activities	165
C. Association cortical areas	168
D. Language and speech centres	169
E. Dominance of hemispheres	170
IV. White matter of hemispheres	171
A. Association fibres	172
B. Commissural fibres	174
C. Capsula interna	175
14. Cavities of the central nervous system	178
15. Meninges of the central nervous system	185
16. Blood vessels of the central nervous system	191
I. Arteries	191
A. Arteries of the spinal cord	192
B. Arteries of the brain stem	192
C. Arteries of the cerebral cortex	194
D. Arteries of the basal ganglia and diencephalon	198
E. Arteriae choroideae	199
II. Veins	199
A. Veins of the spinal cord	200
B. Veins of the brain stem	200
C. Veins of the cerebral cortex	200

D. Deep cerebral veins	202
E. Venae choroideae	203
17. Basic neuroanatomical and clinical imaging methods	204
A. Cytoarchitectonic methods	204
B. Methods for visualization of nerve connections – Nerve pathways	206
C. Clinical imaging techniques	209
