

## Contents in Brief

List of Results and Fallacies	xiv
Preface	xviii
Acronyms and Abbreviations	xx
Symbols	xxii

## Part 1. Power Market Fundamentals

Prologue	2	What Is Competition?	49
Why Deregulate?	6	Marginal Cost in a Power Market	60
What to Deregulate	17	Market Structure	74
Pricing Power, Energy, and Capacity	30	Market Architecture	82
Power Supply and Demand	40	Designing and Testing Market Rules	93

## Part 2. Reliability, Price Spikes and Investment

Reliability and Investment Policy	108	Operating-Reserve Pricing	165
Price Spikes Recover Fixed Costs	120	Market Dynamics and the Profit Function	174
Reliability and Generation	133	Requirements for Installed Capacity	180
Limiting the Price Spikes	140	Inter-System Competition for Reliability	188
Value-of-Lost-Load Pricing	154	Unsolved Problems	194

## Part 3. Market Architecture

Introduction	202	The Real-Time Market in Theory	254
The Two-Settlement System	208	The Day-Ahead Market in Practice	264
Day-Ahead Market Designs	217	The Real-Time Market in Practice	272
Ancillary Services	232	The New Unit-Commitment Problem	289
The Day-Ahead Market in Theory	243	The Market for Operating Reserves	306

## Part 4. Market Power

Defining Market Power	316	Designing to Reduce Market Power	345
Exercising Market Power	329	Predicting Market Power	356
Modeling Market Power	337	Monitoring Market Power	365

## Part 5. Locational Pricing

Power Transmission and Losses	374	Refunds and Taxes	411
Physical Transmission Limits	382	Pricing Losses on Lines	417
Congestion Pricing Fundamentals	389	Pricing Losses at Nodes	424
Congestion Pricing Methods	395	Transmission Rights	431
Congestion Pricing Fallacies	404		

Glossary	443
References	455
Index	460
