

3.4.3	Important aspects of thermal analysis methods regarding sample parameters .....	43
3.5	Calibration and correction of selected data .....	45
<b>4</b>	<b>EXPERIMENTAL STUDY OF THERMOPHYSICAL AND THERMODYNAMICAL BEHAVIOUR.....</b>	<b>46</b>
4.1	Phase transition temperatures .....	48
4.1.1	Phase transition temperatures – various methods and regimes.....	49
4.1.2	Phase transition temperatures – cycling experiments, various alloys investigation under heating and cooling process.....	55
4.1.3	Phase transition temperatures – heating rate and sample mass influence .....	60
4.1.4	Phase transition temperatures – decarburization and oxidation influence .....	62
4.1.5	Phase diagrams .....	70
4.2	Phase transition heats .....	72
4.3	Heat capacities and derived quantities.....	75
4.4	Selected issues of experimental and theoretical methods of metallic materials characterization .....	79
4.5	Application possibilities of thermal analysis methods .....	84
<b>5</b>	<b>CONCLUSION.....</b>	<b>86</b>
	<b>SUMMARY .....</b>	<b>88</b>
