|---------------------------------------------------------------------------------------|------------|
| <b>01. Starting points</b>                                                            | <b>7</b>   |
| 01.01. Aims and applications of the methodology                                       | 7          |
| 01.02. Description of the methodology                                                 | 8          |
| 01.03. Justification for the methodology                                              | 9          |
| <b>02. Fundamental concepts and terms – meanings and definitions</b>                  | <b>11</b>  |
| 02.01. Technical monuments and industrial heritage                                    | 11         |
| 02.02. Industrial archeology                                                          | 11         |
| 02.03. The TICCIH Nizhny Nagil Charter for the Industrial Heritage                    | 12         |
| 02.04. Technical monuments, industrial heritage and brownfields                       | 14         |
| 02.04.01. The pre-industrial era                                                      | 14         |
| 02.04.02. The industrial era                                                          | 18         |
| 02.04.03. Brownfields                                                                 | 36         |
| <b>03. Evaluation of industrial heritage</b>                                          | <b>39</b>  |
| 03.01. Traditional evaluative categories                                              | 39         |
| 03.02. Specific evaluative categories                                                 | 51         |
| 03.02.01. Historical value (positive, negative)                                       | 51         |
| 03.02.02. Typological value                                                           | 51         |
| 03.02.02.01. Emblems and symbols                                                      | 64         |
| 03.02.02.02. Precursors, models, modules                                              | 69         |
| 03.02.03. The value of the technological flow                                         | 75         |
| 03.02.04. The value of systemic and technological interconnections                    | 78         |
| 03.02.05. Technical value                                                             | 86         |
| 03.02.06. The value of authenticity                                                   | 91         |
| 03.02.06.01. The authenticity of the “last working day”                               | 102        |
| 03.02.07. The value of the “genius loci”                                              | 108        |
| <b>04. Recording and documentation as tools for selection and heritage protection</b> | <b>113</b> |
| 04.01. The formation of an awareness of industrial heritage and systematic surveys    | 113        |
| 04.02. Methodology of heritage management research                                    | 119        |
| 04.02.01. Territorial research                                                        | 119        |
| 04.02.01.01. Basic documentation                                                      | 119        |

|                                                                                                                                           |            |
