## 1 CAPITALISM AND DEMOCRACY: AFFLUENCE, INEQUALITY, AND THE ENVIRONMENT

### 1.1 Introduction

1

### 1.2 Affluence and income inequality

3

### 1.3 How did we get here? The hockey stick in real incomes

6

### 1.4 Economic growth

10

### 1.5 The permanent technological revolution: Engine of growth

19

### 1.6 Another engine of growth: More machines and tools per worker

22

### 1.7 The capitalist revolution

23

### 1.8 Capitalism and growth: Cause and effect?

29

### 1.9 Varieties of capitalism: Institutions and growth

34

### 1.10 Varieties of capitalism: Growth and stagnation

35

### 1.11 Capitalism, inequality, and democracy

37

### 1.12 Capitalism, growth and environmental sustainability

40

### 1.13 Conclusion

46

### 1.14 Doing Economics: Measuring climate change

46

### 1.15 References

47

## 2 SOCIAL INTERACTIONS AND ECONOMIC OUTCOMES

### 2.1 Introduction

49

### 2.2 Two types of social interaction

51

### 2.3 Resolving social dilemmas

52

### 2.4 Social interactions as games

55

### 2.5 When self-interest works: The invisible hand

59

### 2.6 When self-interest doesn't work: The prisoners' dilemma

61

### 2.7 Free riding and the provision of public goods

66

### 2.8 Social preferences and the public good

68

### 2.9 Sustaining cooperation by punishing free riding

72

### 2.10 How three kinds of social preferences address social dilemmas

76

2.11 Predicting economic outcomes: A Nash equilibrium	79
2.12 Which Nash equilibrium? Conflicts of interest and bargaining	81
2.13 Conflicts of interest in the global climate change problem	86
2.14 The economy and economics	90
2.15 Conclusion	92
2.16 Doing Economics: Collecting and analysing data from experiments	93
2.17 References	94
<b>3 PUBLIC POLICY FOR FAIRNESS AND EFFICIENCY</b>	<b>95</b>
3.1 Introduction	95
3.2 Goals of public policy	98
3.3 Fairness and efficiency in the ultimatum game	100
3.4 Evaluating an outcome: Is it efficient?	105
3.5 Adding the option of transferring payoffs between players.	108
3.6 Evaluating an outcome: Is it fair?	111
3.7 Why are (some) economic inequalities unfair? Procedural and substantive judgements	115
3.8 Implementing public policies	120
3.9 Unintended consequences of a redistributive tax	124
3.10 Unintended consequences: Policies affect preferences	128
3.11 How do we find out if a policy will work?	131
3.12 Conclusion	135
3.13 Doing Economics: Measuring the effect of a sugar tax	136
3.14 References	137
<b>4 WORK, WELLBEING, AND SCARCITY</b>	<b>139</b>
4.1 Introduction	139
4.2 Economic models: How to see more by looking at less	144
4.3 Decision making, trade-offs, and opportunity costs	146
4.4 Making decisions when there are trade-offs	148
4.5 Preferences	152
4.6 The feasible set	158
4.7 Decision making and scarcity	161
4.8 Hours of work and economic growth	164
4.9 Applying the model: Explaining changes in working hours	169
4.10 Applying the model: Explaining differences between countries	171
4.11 Is this a good model? Does it matter that people (mostly) do not really optimize?	172
4.12 Extending the model: The influence of culture and politics	173
4.13 Extending the model: Women, men, and the gender division of labour	174
4.14 Work and wellbeing as a social dilemma	176
4.15 Conclusion	182
4.16 Doing Economics: Measuring wellbeing	183
4.17 References	183
<b>5 INSTITUTIONS, POWER, AND INEQUALITY</b>	<b>185</b>
5.1 Introduction	185
5.2 Institutions: The rules of the game	187
5.3 Production and distribution: Using a model	191
5.4 The rule of force: Bruno appears and has unlimited power over Angela	194
5.5 Property rights and the rule of law	200
5.6 Efficiency and conflicts over the distribution of the surplus	207
5.7 Property rights, the rule of law, and the right to vote	209
5.8 The lessons from Angela and Bruno's story	213
5.9 Measuring economic inequality	214
5.10 Comparing inequality across the world	220

5.11 Conclusion	227
5.12 Doing Economics: Measuring inequality: Lorenz curves and Gini coefficients	228
5.13 References	228
<b>6 THE FIRM: EMPLOYEES, MANAGERS, AND OWNERS</b>	229
6.1 Introduction	229
6.2 Firms, markets, and the division of labour	231
6.3 Power relations within the firm	234
6.4 Other people's money: The separation of ownership and control	238
6.5 Other people's labour: The employment relationship	241
6.6 Why do a good day's work? Consider the alternative!	244
6.7 Employment rents	245
6.8 Work effort and wages: The labour discipline model	249
6.9 The employer sets the wage to minimize the cost per unit of effort	253
6.10 Why there is always involuntary unemployment	257
6.11 Putting the model to work: Owners, employees, and public policy	258
6.12 Why do employers pay employment rents to their workers?	262
6.13 Another kind of business organization: Cooperative firms	264
6.14 Another kind of business organization: The gig economy	267
6.15 Principals and agents: Interactions under incomplete contracts	268
6.16 Conclusion	272
6.17 Doing Economics: Measuring management practices	273
6.18 References	273
<b>7 FIRMS AND MARKETS FOR GOODS AND SERVICES</b>	275
7.1 Introduction	275
7.2 Economies of scale and the cost advantages of large-scale production	277
7.3 The demand curve and willingness to pay	279
7.4 Profits, costs, and the isoprofit curve	284
7.5 The isoprofit curves and the demand curve	286
7.6 Gains from trade	289
7.7 Price-setting, market power, and public policy	294
7.8 Product selection, innovation, and advertising	298
7.9 Buying and selling: Demand and supply in a competitive market	300
7.10 Demand and supply in a competitive market: Bakeries	307
7.11 Competitive equilibrium: Gains from trade, allocation, and distribution	312
7.12 Changes in supply and demand	316
7.13 The world oil market	322
7.14 Conclusion	327
7.15 Doing Economics: Supply and demand	328
7.16 References	329
<b>8 THE LABOUR MARKET AND THE PRODUCT MARKET: UNEMPLOYMENT AND INEQUALITY</b>	331
8.1 Introduction	331
8.2 Measuring the economy: Employment and unemployment	334
8.3 The labour market, the product market and the aggregate economy: The WS/PS model	337
8.4 The labour market and the wage-setting curve (firms and workers)	338
8.5 The product market and the price-setting curve (firms and customers)	344
8.6 Wages, profits, and unemployment in the aggregate economy	353
8.7 Unemployment as a characteristic of equilibrium	356
8.8 Why was unemployment higher in Spain than in Germany?	357
8.9 Declining competition and increasing inequality in the US	359

8.10	The labour and product market model and inequality: Using the Lorenz curve and Gini coefficient	361
8.11	Labour unions: Bargained wages and the union voice effect	364
8.12	Rising markups and profit share, weaker trade unions, and rising inequality	370
8.13	Labour market policies to address unemployment and inequality	372
8.14	Labour market policies: Shifting the Nash equilibrium	373
8.15	Looking backward: Baristas and bread markets	377
8.16	Structural and cyclical unemployment: The role of demand	381
8.17	Conclusion	383
8.18	Doing Economics: Measuring the non-monetary cost of unemployment	384
8.19	References	385
<b>9</b>	<b>THE CREDIT MARKET: BORROWERS, LENDERS, AND THE RATE OF INTEREST</b>	<b>387</b>
9.1	Introduction	387
9.2	Income, consumption, and wealth	389
9.3	Borrowing: Bringing consumption forward in time	392
9.4	Reasons to borrow: Smoothing and impatience	396
9.5	Borrowing allows smoothing by bringing consumption to the present	400
9.6	Storing or lending allows smoothing and moving consumption to the future	402
9.7	Mutual gains and conflicts over their distribution in the credit market	406
9.8	Borrowing may allow investing: Julia's best hope	409
9.9	Balance sheets: Assets and liabilities	412
9.10	Credit market constraints: Another principal-agent problem	416
9.11	Inequality: Lenders, borrowers, and those excluded from credit markets	422
9.12	The credit market and the labour market	425
9.13	Conclusion	426
9.14	Doing Economics: Credit-excluded households in a developing country	427
9.15	References	427
<b>10</b>	<b>BANKS, MONEY, HOUSING, AND FINANCIAL ASSETS</b>	<b>429</b>
10.1	Introduction	429
10.2	Assets, money, banks, and the financial system	431
10.3	Money and banks	436
10.4	Banks, profits, and the creation of money	439
10.5	The central bank, banks, and interest rates	444
10.6	The business of banking and bank balance sheets	446
10.7	How key economic actors use and create money: A summary so far	452
10.8	The value of an asset: Expected return and risk	454
10.9	Changing supply and demand for a financial asset	461
10.10	Asset market bubbles	463
10.11	Housing as an asset, collateral, and house price bubbles	469
10.12	Banks, housing, and the global financial crisis	470
10.13	The role of banks in the crisis	472
10.14	Banking, markets, and morals	474
10.15	Conclusion	478
10.16	Doing Economics: Characteristics of banking systems around the world	479
10.17	References	479
<b>11</b>	<b>MARKET SUCCESSES AND FAILURES</b>	<b>481</b>
11.1	Introduction	481
11.2	The market and other institutions	483
11.3	Markets, specialization, and the division of labour	484
11.4	The 'magic of the market': Prices are messages plus motivation	485

# PREFACE

11.5 Prices as messages	488
11.6 Putting motivation behind the price message	490
11.7 Market failure: External effects of pollution	492
11.8 External effects and private bargaining	497
11.9 External effects: Government policies and income distribution	504
11.10 Property rights, contracts, and market failures	509
11.11 Public goods, common pool resources, and market failure	512
11.12 Missing markets: Insurance and lemons	516
11.13 Market failure and government policy	522
11.14 Conclusion	524
11.15 Doing Economics: Measuring willingness to pay for climate change mitigation	525
11.16 References	526
<b>12 GOVERNMENTS AND MARKETS IN A DEMOCRATIC SOCIETY</b>	527
12.1 Introduction	527
12.2 The limits of markets: Repugnant markets and merit goods	531
12.3 The government as an economic actor	534
12.4 The government as a rent-seeking monopolist	540
12.5 Competition can limit political rent-seeking	546
12.6 Political monopoly and competition compared.	549
12.7 Spending by democratic governments: Priorities of a nation	552
12.8 The feasibility of economic policies	555
12.9 Administrative feasibility: Information and capacities	557
12.10 Political feasibility	559
12.11 Policy matters	562
12.12 The distributional impact of public policies: Early childhood education	564
12.13 Free tuition in higher education: Can it be fair to non-students?	566
12.14 The distributional impact of public policies: Rent control	569
12.15 Conclusion	574
12.16 Doing Economics: Government policies and popularity: Hong Kong cash handout	575
12.17 References	575
<b>GLOSSARY</b>	577
<b>BIBLIOGRAPHY</b>	589
<b>COPYRIGHT ACKNOWLEDGEMENTS</b>	595

*Economy, Society, and Public Policy* changes this. It has been created specifically for students from social science, public policy, business and management, engineering, biology, and other disciplines, who are not economics majors. If you are one of these students, we want to engage, challenge, and empower you with an understanding of economics. We hope you will acquire the tools to articulate reasoned views on pressing policy problems. You may even decide to take more courses in economics as a result.

The book is also being used successfully in courses for economics, business, and public policy majors, as well as in economics modules for Philosophy, Politics and Economics (PPE), and masters' courses in Public Policy.

This textbook is the result of a worldwide collaboration among researchers, educators, and students

For instructors who are considering adopting the book as the basis for either one-semester or two-semester courses, we have written a guide to help you use *Economy, Society, and Public Policy*.

*Economy, Society, and Public Policy* is intended to provide hands-on experience for students in using data to understand economic questions. For each unit there is an accompanying empirical project called *Doing Economics*. These address important policy problems using real data. *Doing Economics: Empirical Projects* is available as a free ebook (<https://tinyco.re/1123412>). We have also produced a guide to *Doing Economics* for instructors (<https://tinyco.re/1353350>).

The CORE team is a large and growing family. Join us! Let us know what you think of this book: <https://tinyco.re/9004525> including things that we might improve.

Wendy Carter, Samuel Bowles, Margaret Stevens, and Ellen Tipton for the CORE team
