

## Content

- Natural Polymers as Alternatives to Conventional Coagulation Agents – Lab-Scale Research with Moringa Oleifera Seeds and Chitosan..... 10
- Developing a Water Quality Index (WQI) for River Resources Management in Kien Giang Province, Vietnam ..... 11
- Mapping of Invasive Plants for Natural Resources Management in Ca Mau Province, Vietnam ..... 12
- Use of adsorption for pesticides removal from drinking water sources..... 13
- Botanical and zoological aspects of the shale post-mining landscape (Jakartovice village, Czech Republic) ..... 14
- Reduction of nickel content from the model solution by consortium of fungal pellets and green algae ..... 16
- Principle of regional integrated investments and their relation to sustainable development of the Hradec Kralove - Pardubice agglomeration ..... 17
- Microbiota as an indicator of the environmental burden of mined-out sites ..... 18
- Utilisation of secondary raw materials for production of artificial soils substrate..... 19
- Sustainability assessment of concrete mixes ..... 20
- Urban Rainwater Management Tools..... 21
- Circular economy and supplying the industry with water in the periods of drought..... 22

- Rainwater Management in relation to Water Bodies and Flows in Urbanized Areas..... 23
- Elimination of microbial pollution of domestic animal excrements using vermicomposting ..... 24
- Hard coal flotation depending on the degree of oxidation of the particle surface ..... 25
- Drinking water treatment with membrane ultrafiltration..... 26
- Microbial degradation of wool industry wastewater 27
- Environmental aspects of changing the wastewater treatment plant technology from cleaning in rotating biological contactors in the process of nitrification and updating denitrification..... 28
- Land use and climate change impact on runoff in a small mountainous catchment in Slovakia ..... 29
- Water quality comparison for various drainage systems for 2000 equivalent population ..... 30
- Combined aeration and mixing system and its use in practice..... 31
- Main parameters of a wastewater treatment plant up to 2000 PE in the Czech Republic ..... 32
- Legislation governing wastewater discharges in the Czech Republic..... 33
- Management of invasive species *Solidago canadensis* in Ostrava region (Czech Republic) ..... 34
- Soil seed bank in Ostrava post-mining landscape .... 35
- *Neurospora sitophila* in indoor environment of buildings ..... 36

- Land use changes and effects on heat islands in the city ..... 37
- Effectiveness of alternative natural coagulants in the treatment of industrial wastewater..... 38
- Storm water management in public areas ..... 39
- Influence of management on vegetative reproduction of invasive species of *Helianthus tuberosus* in Poodri PLA..... 40
- Dishwashing detergents and their effects on respiration inhibition of activated sludge ..... 41
- Impact of stormwater runoff in the urbanized area .. 42
- Analysis of the recent state of sewage network in Serbia..... 43
- Evaluation of genotoxicity in industrial waste waters ..... 44
- The impact of intense rainfall on a storm sewage system of the east part of Trnava city..... 45
- An alternative method of removing Cr (VI) from aquatic solution using chemically modified cone biomass and *Fomitopsis pinicola*..... 46
- Design of dry detention basin in the municipality of Hradec nad Svitavou..... 47
- The proposal for revitalization measures in the Výškovický Stream..... 48
- Geothermal energy in mining water in the North Bohemian Brown Coal Basin ..... 49

- Analysis of the sustainable development of the core cities of the Hradec Kralove - Pardubice agglomeration ..... 50
- Identification of dry and wet years in eastern Slovakia using indices ..... 51
- Environmental Awareness and its Influence on Household Consumption of Goods..... 52
- Comparison of the sorption efficiency of iron-based sorption materials in the removal of arsenic and antimony from water ..... 53
- Revitalization of public space along the river Ostravice in the part of Ostrava..... 54
- Geographical information systems and monitoring of climatic conditions in cities ..... 55
- Contribution to the study of selected heavy metals in urban wastewaters using ICP-MS method..... 56
- Territorial system of ecological stability in selected Czech cities..... 57
- Creating of Risk Maps..... 58
- Impact of cities adaptation to climate change on water resources management on the example of selected cities of the Silesian Agglomeration..... 59
- Monitoring of the abandoned mine Smolnik (Slovakia) influence on the aquatic environment..... 60
- Application of aerosol extinguishing agents to increase infrastructure safety ..... 61
- Water management development trends in the 21st century ..... 62

- Utilising Emotions in the Teaching of Water Management Structures III ..... 63
- Protection of population and water retention developments ..... 64
- Assessment of the River Habitat Quality Using Bioindication in the Piedmont Stream Handlovka in Slovakia ..... 65
- Analysis of trends in precipitation time series in selected precipitation stations in eastern Slovakia ... 66
- Constructions used to enable fish migration in the Czech Republic and abroad ..... 67
- Utilisation of recycled wastewater as an alternative source of water used for fire-fighting purposes by fire brigades in the Czech Republic ..... 68
