

Table of Contents

Invited papers

Frank Harary	
Early Computer Science Adventures of a Mathematician	1
Hajime Ishihara	
Sequentially Continuity in Constructive Mathematics	5
Piergiorgio Odifreddi	
Recursive Functions: An Archeological Look	13
Ioan Tomescu	
The Number of Graphs and Digraphs with a Fixed Diameter and Connectivity	33

Contributed papers

Hatem M. Bahig, Mohamed H. El-Zahar and Ken Nakamura	
Some Results for Some Conjectures in Addition Chains	47
Verónica Becher, Sergio Daicz and Gregory Chaitin	
A Highly Random Number	55
Douglas S. Bridges	
Dini's Theorem: A Constructive Case Study	69
Henning Fernau	
Even Linear Simple Matrix Languages: Formal Language Aspects	81
George Georgescu and Afrodita Iorgulescu	
Pseudo-BCK Algebras: An Extension of BCK Algebras	97
Lane A. Hemaspaandra and Harald Hempel	
P-Immune Sets with Holes Lack Self-Reducibility Properties	115
Daniel Hort and Jiří Rachůnek	
Lex Ideals of Generalized MV-Algebras	125
Jouni Järvinen	
Armstrong Systems on Ordered Sets	137
Vadim E. Levit and Eugen Mandrescu	
Unicycle Bipartite Graphs with Only Uniquely Restricted Maximum Matchings	151

Martin Plátek, Tomáš Holan and Vladislav Kuboň	
On Relax-ability of Word-Order by D-grammars	159
Adriana Popovici and Dan Popovici	
On the Structure of Linear Cellular Automata	175
Robert Rettinger, Xizhong Zheng, Romain Gengler, and Burchard von Braunmühl	
Monotonically Computable Real Numbers	187
Peter Schuster, Luminița Viță and Douglas S. Bridges	
Apartness as a Relation Between Subsets	203
Ludwig Staiger	
How Large is the Set of Disjunctive Sequences?	215
Vincent Vajnovszki	
A Loopless Generation of Bitstrings without p Consecutive Ones	227
Vitaly Voloshin	
Greedy Algorithms for the Lower and Upper Chromatic Numbers	241
