

# Contents

<b>1</b>	<b>Background Material</b>	<b>1</b>
1.1	Review of Vector Spaces	1
1.2	Volume and Determinants	16
1.3	Derivatives of Multivariable Functions	23
1.4	Summary, References, and Problems	27
1.4.1	Summary	27
1.4.2	References and Further Reading	28
1.4.3	Problems	28
<b>2</b>	<b>An Introduction to Differential Forms</b>	<b>31</b>
2.1	Coordinate Functions	31
2.2	Tangent Spaces and Vector Fields	37
2.3	Directional Derivatives	43
2.4	Differential One-Forms	53
2.5	Summary, References, and Problems	65
2.5.1	Summary	65
2.5.2	References and Further Reading	66
2.5.3	Problems	66
<b>3</b>	<b>The Wedgeproduct</b>	<b>69</b>
3.1	Area and Volume with the Wedgeproduct	69
3.2	General Two-Forms and Three-Forms	82
3.3	The Wedgeproduct of $n$ -Forms	88
3.3.1	Algebraic Properties	88
3.3.2	Simplifying Notation	90
3.3.3	The General Formula	93
3.4	The Interior Product	97
3.5	Summary, References, and Problems	100
3.5.1	Summary	100
3.5.2	References and Further Reading	102
3.5.3	Problems	102
<b>4</b>	<b>Exterior Differentiation</b>	<b>107</b>
4.1	An Overview of the Exterior Derivative	107
4.2	The Local Formula	109
4.3	The Axioms of Exterior Differentiation	112
4.4	The Global Formula	114
4.4.1	Exterior Differentiation with Constant Vector Fields	114
4.4.2	Exterior Differentiation with Non-Constant Vector Fields	121
4.5	Another Geometric Viewpoint	130
4.6	Exterior Differentiation Examples	142
4.7	Summary, References, and Problems	147

4.7.1	Summary .....	147
4.7.2	References and Further Reading .....	148
4.7.3	Problems .....	149
<b>5</b>	<b>Visualizing One-, Two-, and Three-Forms .....</b>	<b>151</b>
5.1	One- and Two-Forms in $\mathbb{R}^2$ .....	151
5.2	One-Forms in $\mathbb{R}^3$ .....	160
5.3	Two-Forms in $\mathbb{R}^3$ .....	166
5.4	Three-Forms in $\mathbb{R}^3$ .....	175
5.5	Pictures of Forms on Manifolds .....	175
5.6	A Visual Introduction to the Hodge Star Operator .....	179
5.7	Summary, References, and Problems .....	186
5.7.1	Summary .....	186
5.7.2	References and Further Reading .....	187
5.7.3	Problems .....	187
<b>6</b>	<b>Push-Forwards and Pull-Backs .....</b>	<b>189</b>
6.1	Coordinate Change: A Linear Example .....	189
6.2	Push-Forwards of Vectors .....	196
6.3	Pull-Backs of Volume Forms .....	201
6.4	Polar Coordinates .....	206
6.5	Cylindrical and Spherical Coordinates .....	213
6.6	Pull-Backs of Differential Forms .....	217
6.7	Some Useful Identities .....	223
6.8	Summary, References, and Problems .....	226
6.8.1	Summary .....	226
6.8.2	References and Further Reading .....	227
6.8.3	Problems .....	227
<b>7</b>	<b>Changes of Variables and Integration of Forms .....</b>	<b>229</b>
7.1	Integration of Differential Forms .....	229
7.2	A Simple Example .....	235
7.3	Polar, Cylindrical, and Spherical Coordinates .....	240
7.3.1	Polar Coordinates Example .....	240
7.3.2	Cylindrical Coordinates Example .....	243
7.3.3	Spherical Coordinates Example .....	244
7.4	Integration of Differential Forms on Parameterized Surfaces .....	245
7.4.1	Line Integrals .....	246
7.4.2	Surface Integrals .....	251
7.5	Summary, References, and Problems .....	254
7.5.1	Summary .....	254
7.5.2	References and Further Reading .....	255
7.5.3	Problems .....	255
<b>8</b>	<b>Poincaré Lemma .....</b>	<b>259</b>
8.1	Introduction to the Poincaré Lemma .....	259
8.2	The Base Case and a Simple Example Case .....	261
8.3	The General Case .....	268
8.4	Summary, References, and Problems .....	275
8.4.1	Summary .....	275
8.4.2	References and Further Reading .....	275
8.4.3	Problems .....	275
<b>9</b>	<b>Vector Calculus and Differential Forms .....</b>	<b>277</b>
9.1	Divergence .....	277
9.2	Curl .....	284
9.3	Gradient .....	293

9.4	Upper and Lower Indices, Sharps, and Flats .....	294
9.5	Relationship to Differential Forms .....	298
9.5.1	Grad, Curl, Div and Exterior Differentiation .....	298
9.5.2	Fundamental Theorem of Line Integrals .....	302
9.5.3	Vector Calculus Stokes' Theorem .....	303
9.5.4	Divergence Theorem .....	304
9.6	Summary, References, and Problems.....	305
9.6.1	Summary .....	305
9.6.2	References and Further Reading .....	306
9.6.3	Problems .....	307
<b>10</b>	<b>Manifolds and Forms on Manifolds .....</b>	<b>309</b>
10.1	Definition of a Manifold .....	309
10.2	Tangent Space of a Manifold .....	313
10.3	Push-Forwards and Pull-Backs on Manifolds.....	323
10.4	Calculus on Manifolds .....	326
10.4.1	Differentiation on Manifolds .....	327
10.4.2	Integration on Manifolds .....	328
10.5	Summary, References, and Problems.....	332
10.5.1	Summary .....	332
10.5.2	References and Further Reading .....	334
10.5.3	Problems .....	334
<b>11</b>	<b>Generalized Stokes' Theorem .....</b>	<b>337</b>
11.1	The Unit Cube $I^k$ .....	337
11.2	The Base Case: Stokes' Theorem on $I^k$ .....	353
11.3	Manifolds Parameterized by $I^k$ .....	358
11.4	Stokes' Theorem on Chains.....	359
11.5	Extending the Parameterizations .....	362
11.6	Visualizing Stokes' Theorem .....	363
11.7	Summary, References, and Problems.....	366
11.7.1	Summary .....	366
11.7.2	References and Further Reading .....	366
11.7.3	Problems .....	366
<b>12</b>	<b>An Example: Electromagnetism .....</b>	<b>369</b>
12.1	Gauss's Laws for Electric and Magnetic Fields.....	369
12.2	Faraday's Law and the Ampère-Maxwell Law .....	375
12.3	Special Relativity and Hodge Duals .....	380
12.4	Differential Forms Formulation .....	384
12.5	Summary, References, and Problems.....	390
12.5.1	Summary .....	390
12.5.2	References and Further Reading .....	392
12.5.3	Problems .....	392
<b>A</b>	<b>Introduction to Tensors .....</b>	<b>395</b>
A.1	An Overview of Tensors .....	395
A.2	Rank One Tensors .....	396
A.3	Rank-Two Tensors .....	404
A.4	General Tensors .....	407
A.5	Differential Forms as Skew-Symmetric Tensors .....	409
A.6	The Metric Tensor .....	411
A.7	Lie Derivatives of Tensor Fields .....	414
A.8	Summary and References .....	431
A.8.1	Summary .....	431
A.8.2	References and Further Reading .....	434

<b>B Some Applications of Differential Forms .....</b>	435
B.1 Introduction to de Rham Cohomology .....	435
B.2 de Rham Cohomology: A Few Simple Examples .....	439
B.3 Symplectic Manifolds and the Canonical Symplectic Form .....	443
B.4 The Darboux Theorem .....	449
B.5 A Taste of Geometric Mechanics .....	453
B.6 Summary and References .....	459
B.6.1 Summary .....	459
B.6.2 References and Further Reading .....	461
<b>References .....</b>	463
<b>Index .....</b>	465
