Preface	ix
1 Preliminaries	1
2 Examples of algebraic structures	11
2.1 Ordered structures	11
2.2 Groupoids and related algebras	19
2.3 Ring-like algebras	24
3 Congruence conditions	27
3.1 Permutability	27
3.2 Distributivity and modularity	32
3.3 Direct decomposability	35
4 Congruence classes and subalgebras	39
4.1 Maltsev description of congruence classes	39
4.2 Congruence classes which are subuniverses	40
4.3 Subuniverses which are congruence classes	41
4.4 Algebras having no proper subuniverse as a congruence class	43
4.5 Hamiltonian algebras	48
5 Extension properties of congruences and their classes	51
5.1 Congruence extension property	51
5.2 Block extension property	54
6 Regularity and its modifications	57
6.1 Regularity	57
6.2 Transferable congruences	61

6.3	Regularity of single algebras	61
6.4	Weak regularity	64
6.5	Weakly regular algebras in varieties with principal compact congruences	68
6.6	Local regularity	71
6.7	Regularity with respect to unary terms	76
6.8	Subregularity	77
6.9	Dual regularity	78
6.10	Balanced algebras	80
7	Coherence and its modifications	85
7.1	Coherence	85
7.2	Weak coherence	87
7.3	Local coherence	90
7.4	t -Coherence	92
7.5	Uniformity	93
7.6	Consistent algebras	94
8	Local congruence conditions	97
8.1	Permutability at 0	97
8.2	Distributivity at 0	99
8.3	Arithmeticity at 0	102
8.4	Modularity at 0	103
8.5	Weakly parallel classes	108
8.6	Decomposability of kernels	110
9	Characterizations of congruence classes	111
9.1	Congruence classes in regular and permutable varieties	111
9.2	Congruence classes in regular varieties	116
9.3	Congruence kernels	119
9.4	Deductive systems	120
9.5	Relative deductive systems	123
9.6	Convex sets	127
9.7	Congruence kernels in pseudocomplemented semilattices	134

10 Ideals in universal algebras	137
10.1 Ideals and ideal determined varieties	137
10.2 Ideals and congruence kernels	141
10.3 Finite bases for ideal terms	145
10.4 Ideal congruence properties	151
10.5 Ideals in locally regular and permutable at 0 varieties	155
10.6 Ideal extension property	159
10.7 Ideals, congruence kernels and tolerance kernels of lattices	160
11 Directly decomposable congruence classes	171
12 One-block congruences	185
12.1 Semimodularity of one-block congruences	185
12.2 Rees algebras and Rees varieties	187
12.3 Rees ideal algebras and Rees ideal varieties	189
12.4 Rees sublattices of a lattice	192
Bibliography	197
Index	211
