

Contents

Introduction	13
Chapter 1. General considerations	15
1.1. Development of the embryonic adrenal gland	16
1.2. Development of the hypothalamo-hypophyseal-adrenal axis	24
1.3. Effects of glucocorticoids on embryonic target cells	29
1.4. Enzyme induction in various embryonic organs	40
1.5. Human fetal adrenal glands and their role in organ maturation	47
Chapter 2. Materials and methods	25
2.1. Animals and experimental protocol	52
2.2. Determination of biochemical and functional parameters of the developing chick embryo	54
Chapter 3. Effects of cortisol on the developing chick embryo	60
3.1. Cortisol and growth of the chick embryo	60
3.2. Cortisol and the adrenal gland of the chick embryo	67
3.3. Cortisol and spontaneous motility of the chick embryo	69
3.4. Clinical remarks	71
Chapter 4. The effects of cortisol on some developmental parameters of the chick embryo brain	73
4.1. Introductory remarks	73
4.2. Cortisol and the biochemical and functional development of the chick embryo brain	84
4.3. Cortisol and fluid compartments in the cerebral hemispheres of the developing chick embryo	95
4.4. Cortisol and the activities of Na^+ - K^+ -adenosine triphosphat ase, acetylcholinesterase and gamma-glutamyl transpeptidase in the cerebral hemispheres of the developing chick embryo	104

4.5. Cortisol and oxygen consumption in the cerebral hemispheres of the developing chick embryo	119
4.6. Clinical remarks	127
Chapter 5. Structural, biochemical and functional development of the choroid plexus in the chick embryo	135
5.1. Introductory remarks	135
5.2. Cortisol and growth of the telencephalic choroid plexus in the developing chick embryo	137
5.3. Cortisol and $\text{Na}^+ - \text{K}^+$ -adenosine triphosphatase and gamma-glutamyl transpeptidase in the telencephalic choroid plexus of the developing chick embryo	145
5.4. Clinical remarks	153
Chapter 6. Cortisol induced changes in the body fluid composition of the developing chick embryo	157
6.1. Introductory remarks	157
6.2. Cortisol and the composition of cerebrospinal fluid and blood plasma in the developing chick embryo	159
6.3. Clinical remarks	164
Summary	166
