Content	5
List of figures	7
List of tables	8
List of appendixes	9
Overview of used symbols and abbreviations	10
Introduction	11
1 History of the Air Traffic Control	13
1.1 ATC in Slovakia	13
1.2 ATC around the world	14
1.2.1 United Kingdom	14
1.2.2 United States of America	16
2 Human Factor in Aviation	19
2.1 General model of human factor SHELL	19
2.2 Performance of the air traffic controllers	21
2.2.1 First level of psychological load	22
2.2.2 Second level of psychological load	23
2.2.3 Third level of psychological load	23
2.2.4 Fourth level of the psychological load	23
2.3 Stress in ATC and possibilities of its degradation	23
2.3.1 Warning stage	25
2.3.2 Resistance stage	25
2.3.3 Exhaustion	26
2.4 Personality characteristics of an individual	27
2.5 The accidents caused by air traffic controller overload	28
2.5.1 Accident over the Bodensee (Zürich)	30
2.6 Device used for measuring the performance	31
3 Analysis of the factors that have impact on the air traffic controllers work performance	37
3.1 Human factor	37
3.2 Number of the handled flights	39
3.3 Meteorological conditions	40
3.4 The airspace of the Slovak republic	41
3.5 Workplace and technical equipment of the workplace	49
3.5.1 EUROCAT E2000	50

3.5.2	Frequentis – system for communication.....	55
3.6	Training of the air traffic controllers.....	58
4	Analysis of the measured results.....	60
4.1	Research in the training of the air traffic controllers.....	60
4.2	The experiment in the real air traffic control	72
4.3	Comparison of the results of the total time	76
	Conclusion.....	82
	References	83
	Recommended literature	86
	Appendix A: Development of the air traffic density in the airspace of the Slovakia republic.....	87
	Appendix B: Screen of the EUROCAT E2000	89
	Appendix C: Measured results from the training.....	91
	Appendix D: The entry questionnaire.....	99
	Appendix E: Questionnaire before and after the duty	101
