

TABLE OF CONTENTS

1. CHEMISTRY AND TOXICOLOGY	7
2. INTRODUCTION TO GENERAL TOXICOLOGY	13
2.1. Substance and effect	13
2.2. Chemical structure and effect	14
2.3. Exposure (concentration, dose), time and effect	14
2.4. Interaction	15
2.5. Absorption	15
2.6. Biotransformation	17
2.7. Excretion	20
2.8. Organism and effect	21
3. PREDICTION OF EFFECT FROM CHEMICAL STRUCTURE AND EVALUATION OF ANIMAL EXPERIMENTS	25
3.1. Prediction from chemical structure	26
3.2. Evaluation of animal experiments	26
4. MECHANISMS OF TOXICITY	29
4.1. Substances irritating mucous membranes and skin – local effect	29
4.2. Substances with a narcotic effect	29
4.3. Substances inhibiting oxygen and electron transport	29
4.4. Enzymes activity inhibiting substances	30
4.5. Substances inducing synthesis of enzymes	30
4.6. Substances acting by alkylation or arylation mechanisms	30
4.7. Substances inducing radical formation and lipoperoxidation	30
4.8. Mutagens, carcinogens, teratogens and allergens	31
5. INORGANIC SUBSTANCES	35
6. ORGANIC SUBSTANCES	39
6.1. Organometallic and complex compounds	40

7. IMPORTANT INORGANIC TOXIC SUBSTANCES	43
7.1. Acids and bases	43
7.2. Aluminum and its compounds	43
7.3. Carbon monoxide	43
7.4. Silicon dioxide and asbestos	44
7.5. Lead and its compounds	44
7.6. Nitrogen oxides	44
7.7. Nitrates and nitrites	45
7.8. Hydrogen cyanide and cyanides	45
7.9. Phosphorus and its compounds	46
7.10. Arsenic and its compounds	46
7.11. Sulphur oxides	46
7.12. Hydrogen sulphide	46
7.13. Carbon disulphide	47
7.14. Fluorine and its compounds	47
7.15. Chlorine and its compounds	47
7.16. Cadmium and its compounds	48
7.17. Mercury and its compounds	48
7.18. Vanadium and its compounds	49
7.19. Chromium and its compounds	49
7.20. Manganese and its compounds	49
7.21. Nickel and its compounds	49
8. IMPORTANT ORGANIC TOXIC SUBSTANCES	51
8.1. Aliphatic hydrocarbons	51
8.2. Benzene	51
8.3. Toluene, xylene and ethylbenzene	51
8.4. Styrene	52
8.5. Biphenyl	52
8.6. Benzo(a)pyrene	52
8.7. Vinyl chloride	52
8.8. Trichloroethylene	53
8.9. Tetrachloroethylene	53
8.10. Polychlorinated biphenyls	53
8.11. Methanol	54
8.12. Ethanol	54
8.13. Phenol	56
8.14. Haloethers	56
8.15. Ethylene oxide	56
8.16. Formaldehyde	56
8.17. Phthalates	57
8.18. Nitrous and nitric acid esters	57
8.19. Organophosphorus compounds	57
8.20. Sulphuric acid esters	57
8.21. Amino- and nitrocompounds	58
8.22. N-Nitrosoamines	58
8.23. 2,3,7,8-Tetrachlorodibenzo-p-dioxin and chlorinated dibenzofurans	58
8.24. Mycotoxins	58

9. CHEMICAL OCCUPATIONAL AND ENVIRONMENTAL HAZARDS	61
9.1. Harmful substances in the environment	61
9.2. Hazardous substances in industry	61
9.3. Chemicals and pollutants in agriculture	62
9.4. Dietary risk substances	63
9.5. Hazards of medication	63
9.6. Drugs of abuse	64
10. SPREAD OF CHEMICAL CONTAMINANTS	67
11. CHEMICAL DISASTERS	69
12. PROTECTION AGAINST CHEMICAL HAZARDS	71
12.1. Legislation	71
12.2. Limits of exposure. Standards	71
