

Newly updated, this celebrated text introduces students to “the big picture” view of human prehistory by personalizing the past and making it relevant to today’s students

“The Past in Perspective is one of the best textbooks on world prehistory. I appreciate the attention that Feder puts into discussing the differences between consensus views, as well as the debates that might overturn established ideas. The organization, writing, and balance between different topics are excellent; it is clear that Feder went through considerable pains to make it accessible.”

Jason Nesbitt, Tulane University

“The Past in Perspective is personable, contemporary, and conversational. Feder’s engaging writing style, curated selection of case studies, and funny anecdotes spark students’ curiosity. He makes a concerted effort to be relatable and to boil concepts down to the simplest level. The student-oriented pedagogy definitely aligns with the present shift toward active learning; it encourages students to be more thoughtful and critical.”

Lindsay Der, University of British Columbia

“The Past in Perspective provides one of the best comprehensive and in-depth overviews of world prehistory, while also providing rich examples illustrating major milestones in technology, society, and other developments.”

Nicholas Jew, California State University, Los Angeles

NEW TO THIS EDITION

- New and updated material on cutting-edge technology, such as remote imaging of archaeological landscapes
- Updated research on Stonehenge and Göbekli Tepe
- New sections on the use of lidar in mapping the Maya and the prevalence and role of human sacrifice among the Aztecs
- New discussions of the Gini coefficient in calculating the degree of economic inequality that characterizes ancient complex societies, and death, wealth, status, and power in Chaco Canyon and Cahokia

ABOUT THE AUTHOR

Kenneth L. Feder is Professor of Anthropology at Central Connecticut State University. He is the author of several books, including *Frauds, Myths, and Mysteries: Science and Pseudoscience in Archaeology*, Ninth Edition (2017), and *Linking to the Past: A Brief Introduction to Archaeology*, Second Edition (OUP, 2007).
