Chapter 1 Overview of Chemical Vapour Deposition

Anthony C. Jones and Michael L. Hitchman

1.1	Basic Definitions	1
1.2	Historical Perspective	2
1.3	Chemical Vapour Deposition Processes	4
1.3.1	Conventional CVD Processes	4
1.3.2	Variants of CVD	7
1.4	CVD Precursors	11
1.4.1	Precursor Requirements	11
1.4.2	Precursor Volatility	11
1.4.3	Precursor Thermal Stability	14
1.4.4	Precursor Purity and Precursor Analysis	15
1.4.5	Precursor Purification Techniques	17
1.5	CVD Reactors	18
1.6	Materials Deposited by CVD and Applications	22
1.7	Materials Properties	22
1.7.1	Layer Morphology	22
1.7.2	Layer Properties	27
1.8	Postscript	33
	References	33

Chapter 2 CVD Reactors and Delivery System Technology

Susan P. Krumdieck

2.1	CVD System Overview	37
2.1.1	CVD System Performance	38
2.1.2	Historical Perspective on Reactor Diversity	40
2.2	CVD Process Fundamentals	40
2.2.1	Research and Development of CVD Technology	42
2.2.2	Gas Dynamics and Flow Basics	42
2.2.3	Molecular and Transition Flow Regimes	44
2.2.4	High Vacuum CVD Reactor Deposition Model	47

2.2.5	Viscous Flow Regime Convection Mass Transport	49
2.2.6	LPCVD Reactor Deposition Model	50
2.3	System Platform and Equipment Considerations	53
2.3.1	Contamination: Material Selection and Design Considerations	54
2.3.2	Establishing the Vacuum: Pumps and Components	58
2.3.3	Pressure Measurement	65
2.3.4	Flow Control	67
2.3.5	Temperature Measurement	71
2.3.6	Heating Strategies	73
2.4	Conventional CVD Reactors	75
2.4.1	Research-scale Reactors	77
2.4.2	Tube Reactor	77
2.4.3	Showerhead and Planetary Reactors	80
2.5	Liquid Precursor Delivery and Process Control	83
2.5.1	Liquid Injection Delivery Systems	83
2.5.2	Aerosol and Spray Reactors	86
2.6	Deposition Control by Surface Processes	88
2.6.1	ALD Reactors	88
2.6.2	CBE Reactors	89
	References	91

Chapter 3 Modeling CVD Processes

*Mark D. Allendorf, Theodore. M. Besmann, Robert J. Kee
and Mark T. Swihart*

3.1	Introduction	93
3.2	Thermodynamic Modeling of CVD	95
3.2.1	Application of Thermochemical Modeling to Chemical Vapor Deposition	95
3.2.2	Thermochemistry of CVD	95
3.2.3	Consideration of Non-stoichiometric/Solution Phases	97
3.2.4	Thermochemical Equilibrium Software Packages	101
3.2.5	Thermochemical Data and Databases	102
3.3	Reactor Modeling	103
3.3.1	Chemically Reacting Fluid Flow	103
3.3.2	Rate Controlling Processes	104
3.3.3	General Conservation Equations	104
3.3.4	Boundary and Initial Conditions	106
3.3.5	Computational Solution	108
3.3.6	Uniform Deposits in Complex Reactors	108
3.3.7	Reactor Design	108
3.4	Gas-phase Thermochemistry and Kinetics	112
3.4.1	<i>Ab Initio</i> Methods for Predicting Gas-phase Thermochemistry	113
3.4.2	Sources of Gas-phase Thermodynamic Data	119
3.4.3	Modeling Precursor Pyrolysis	119
3.5	Mechanism Development	125
3.5.1	Kinetic Regimes	125

3.5.2	Global <i>versus</i> Elementary Mechanisms	126
3.5.3	Gas-phase Chemistry	127
3.5.4	Sources of Gas-phase Kinetics Information	129
3.5.5	Surface Chemistry	129
3.6	Particle Formation and Growth	141
3.6.1	Introduction	141
3.6.2	Modeling Approaches	141
3.6.3	Mechanisms of Particle Formation, Growth and Transport	146
3.6.4	Particle Formation: Modeling Examples	149
3.6.5	Summary	150
	References	151

Chapter 4 Atomic Layer Deposition

Mikko Ritala and Jaakko Niinistö

4.1	Introduction	158
4.2	Basic Features of ALD	158
4.2.1	Principle and Characteristic Features of ALD	159
4.2.2	Limitations of ALD	161
4.2.3	Comparison of ALD and CVD	167
4.3	Precursor Chemistry	167
4.3.1	ALD Precursor Requirements	167
4.3.2	Precursor Types	170
4.3.3	Characterization of ALD Chemistry	175
4.4	ALD Reactors	181
4.4.1	Operation Pressure	182
4.4.2	Precursor Sources with Valving System	182
4.4.3	Reaction Chamber	185
4.4.4	Batch Reactors	187
4.4.5	Wall Temperature	188
4.4.6	Plasma Sources	188
4.4.7	Other Reactor Configurations	190
4.4.8	Process Control Devices	191
4.5	Applications of ALD	191
4.5.1	Thin Film Electroluminescent Displays (TFELs)	192
4.5.2	Magnetic Heads	192
4.5.3	Microelectronics	192
4.5.4	Protective Coatings	197
4.5.5	Solar Cells	197
4.5.6	Optical Applications	197
4.5.7	Heterogeneous Catalysts	197
4.5.8	Coatings on Powders	198
4.5.9	Photocatalysts	198
4.5.10	Coatings on Polymers	199
4.5.11	Micro-electro-mechanical Systems (MEMS)	199
4.5.12	Nanotechnology	199
4.6	Conclusions	200
	References	200

Chapter 5 Basic Chemistry of CVD and ALD Precursors

Mohammad Azad Malik and Paul O'Brien

5.1	Introduction	207
5.2	Precursor Requirements for CVD	207
5.2.1	Precursor Purity	207
5.2.2	Precursor Reactivity	208
5.2.3	Volatility	208
5.2.4	Stability in Air	208
5.2.5	Toxicity	208
5.2.6	Synthesis	208
5.2.7	Environment and Cost	208
5.3	Metal Chalcogenides	209
5.3.1	Alternative Chalcogenide Precursors	209
5.3.2	Single-molecule Precursors	211
5.4	Metal Pnictides	230
5.4.1	III-V Materials	230
5.5	Metals	234
5.5.1	Precursor for Metals	234
5.5.2	CVD of Metals	235
5.6	Metal Oxides	237
5.6.1	Precursors	237
5.6.2	CVD of Metal Oxides	240
5.7	Chemistry of ALD Precursors	245
5.7.1	ALD Precursors	245
5.7.2	ALD Precursors for Oxides	247
5.7.3	ALD of Metals	249
5.7.4	Organometallic Precursors	250
5.7.5	Non-metal Precursors	252
5.7.6	Metal Nitrides	253
5.7.7	Metal Films and Plasma-ALD	253
	References	254

Chapter 6 CVD of III-V Compound Semiconductors

Jae-Hyun Ryou, Ravi Kanjolia and Russell D. Dupuis

6.1	Fundamentals of III-V Compound Semiconductors	272
6.1.1	Characteristics of III-V Compound Semiconductors	273
6.1.2	Material Properties of III-V Compound Semiconductors	279
6.2	Applications of III-V Compound Semiconductors	279
6.2.1	Photonic Device Applications	280
6.2.2	Electronic Device Applications	285
6.3	Fundamentals of CVD Processes for III-V Compound Semiconductors	286
6.3.1	Historical Overview of MOCVD Technology	286
6.3.2	Chemical Reactions in MOCVD Growth	287
6.3.3	Thermodynamics, Kinetics and Hydrodynamics of the MOCVD Process	290

6.3.4	Growth Mechanisms of the MOCVD Process in a Reactor Chamber	292
6.4	MOCVD Reactor Systems	293
6.4.1	Safety Apparatus and System	294
6.4.2	Gas Delivery System	296
6.4.3	Growth Chamber	299
6.4.4	Exhaust System	301
6.5	Precursors – Synthesis, Purification, Analysis and Delivery	302
6.5.1	Synthesis and Purification	302
6.5.2	Analysis	305
6.5.3	Vapor Phase Transport and Measurements	305
6.5.4	Condensed Phase Group V Precursors	307
6.6	MOCVD of Specific III-V Materials	309
6.6.1	GaAs-based Materials	309
6.6.2	InP-based Materials	310
6.6.3	GaSb-based Materials	311
6.6.4	GaN-based Materials	312
6.7	MOCVD in the Future	315
6.8	Summary and Conclusions	315
	References	315

Chapter 7 Chemical Vapor Deposition of Metals: W, Al, Cu and Ru

Bing Luo and Wayne L. Gladfelter

7.1	Introduction	320
7.1.1	Deposition Chemistry – General Comments	320
7.1.2	Induction Periods, Selectivity, Microstructure and the Critical Role of Nucleation	322
7.2	CVD of Tungsten	322
7.2.1	Deposition on Si and SiO ₂ from WF ₆	323
7.2.2	WF ₆ -H ₂ System	323
7.2.3	WF ₆ -SiH ₄ System	324
7.2.4	Tungsten ALD	326
7.3	CVD of Aluminium	326
7.3.1	Precursors	327
7.4	CVD of Copper	331
7.4.1	Deposition from Copper(II) Precursors	331
7.4.2	Deposition from Copper(I) Precursors	334
7.4.3	Copper ALD	336
7.5	Ruthenium CVD	337
7.5.1	Ruthenium CVD from Ru β -Diketonates	337
7.5.2	Ru(CO) ₅ , Ru ₃ (CO) ₁₂ and other Precursors Containing the CO Ligand	338
7.5.3	Ruthenium CVD from Sandwich or Half-sandwich Precursors	340
7.5.4	Ruthenium CVD from RuO ₄	341
7.5.5	Ruthenium ALD	344
7.6	Concluding Remarks	344
	References	345

Chapter 8 Chemical Vapour Deposition of Metal Oxides for Microelectronics Applications

Anthony C. Jones, Helen C. Aspinall and Paul R. Chalker

8.1	Introduction	357
8.2	Precursor Chemistry	358
8.2.1	β -Diketonates and Related Ligands	360
8.2.2	β -Ketoiminates	363
8.2.3	Alkoxides	364
8.2.4	Alkylamides	369
8.2.5	Amidates	369
8.2.6	Organometallic Precursors	370
8.3	CVD of Dielectric Oxides	372
8.3.1	CVD of ZrO_2 and HfO_2	372
8.3.2	CVD of Zr- and Hf-silicate	378
8.3.3	CVD of Hf-aluminate	379
8.3.4	CVD of Lanthanide Oxides	380
8.3.5	CVD of Multi-component Lanthanide Oxides	382
8.3.6	CVD of TiO_2	384
8.3.7	CVD of Al_2O_3	386
8.3.8	CVD of Ta_2O_5	386
8.4	CVD of Ferroelectric Metal Oxides	387
8.4.1	CVD of $\text{Pb}(\text{Zr,Ti})\text{O}_3$	388
8.4.2	CVD of $\text{Pb}(\text{Sc}_{0.5}\text{Ta}_{0.5})\text{O}_3$	389
8.4.3	CVD of $\text{Pb}(\text{Mg}_{0.33}\text{Nb}_{0.66})\text{O}_3$	391
8.4.4	CVD of $\text{SrBi}_2(\text{Ta}_x\text{Nb}_{1-x})_2\text{O}_9$	392
8.4.5	CVD of Bismuth Titanate ($\text{Bi}_4\text{Ti}_3\text{O}_{12}$)	394
8.4.6	CVD of SrTiO_3 and $(\text{Ba,Sr})\text{TiO}_3$	395
8.5	CVD of Conducting, Semiconducting and Magnetic Oxides	396
8.5.1	MOCVD of RuO_2 , LaNiO_3 and LaSrCoO_3	396
8.5.2	CVD of ZnO	397
8.5.3	CVD of Magnetic and Magnetoelectric Oxides	397
8.6	CVD of High- T_c Superconducting Oxides	397
8.7	Conclusions	400
	Acknowledgement	400
	References	400

Chapter 9 Metal-organic Chemical Vapour Deposition of Refractory Transition Metal Nitrides

Roland A. Fischer and Harish Parala

9.1	Introduction and Overview	413
9.2	Applications of Transition Metal Nitrides	414
9.2.1	Diffusion Barrier Layers	414
9.2.2	Gate Electrode Applications	415
9.3	Crystal Chemistry and Materials Properties	416
9.3.1	Titanium Nitride, Zirconium Nitride and Hafnium Nitride	416
9.3.2	Niobium Nitride and Tantalum Nitride	417
9.3.3	Molybdenum Nitride and Tungsten Nitride	418
9.4	Thin Film Deposition of Transition Metal Nitrides	420

9.4.1	Precursor Chemistry for MOCVD and ALD of Nitrides	420
9.4.2	Titanium Nitride Deposition	422
9.4.3	Zirconium and Hafnium Nitride Deposition	427
9.4.4	Niobium and Tantalum Nitride Deposition	427
9.4.5	Molybdenum and Tungsten Nitride Deposition	433
9.5	Conclusions and Prospects	437
	Acknowledgements	437
	References	438

Chapter 10 CVD of Functional Coatings on Glass

Ivan P. Parkin and Robert G. Palgrave

10.1	Introduction	451
10.1.1	Architectural Glazing	452
10.1.2	Automotive/Aerospace Glazing	452
10.1.3	Container Coating	452
10.1.4	Industrial Glass Manufacture and Coating	453
10.1.5	On-line Coating Using the Float Glass Process	453
10.1.6	On-line Coating of Glass Containers	454
10.1.7	Glass as a Substrate	455
10.1.8	Influence of Precursor Chemistry on Glass	455
10.1.9	Overview of Functional Coatings Applied to Glass	456
10.2	CVD of Transparent Conducting Coatings on Glass	456
10.2.1	Indium Tin Oxide	456
10.2.2	F, Cl, Sb Doped Tin Oxide	458
10.3	CVD of Reflective Coatings on Glass	459
10.3.1	Titanium Nitride Thin Films	459
10.4	CVD of Electrochromic and Photochromic Coatings	460
10.4.1	Introduction to Metal Oxide Based Electrochromic and Photochromic Devices	460
10.4.2	Mechanism of Electrochromism	462
10.4.3	CVD of Electrochromic and Photochromic Tungsten Oxide Coatings	464
10.4.4	Atmospheric Pressure CVD of WO_3	464
10.4.5	Aerosol-assisted CVD of WO_3	466
10.5	Vanadium Dioxide Thermochromic Coatings	467
10.5.1	Introduction to Thermochromic VO_2	467
10.5.2	Atmospheric Pressure CVD of VO_2	468
10.5.3	Low Pressure CVD of VO_2	471
10.6	Self-cleaning Coatings on Glass	472
	References	473

Chapter 11 Photo-assisted CVD

Stuart J. C. Irvine and Dan Lamb

11.1	Introduction	477
11.2	Principles of Photo-assisted CVD	477
11.2.1	Photothermal Processes	478
11.2.2	Photolysis	479

11.2.3	Photocatalysis	482
11.2.4	Photosensitization	486
11.3	Lamps and Lasers for Photolysis	487
11.4	Further Examples of Photolysis in Photo-assisted CVD	489
11.5	Conclusions	492
	References	492

Chapter 12 Plasma Enhanced Chemical Vapour Deposition Processes

Sergei E. Alexandrov and Michael L. Hitchman

12.1	Introduction	494
12.2	Remote Plasma Enhanced CVD (RPECVD) Processes	495
12.2.1	Introduction	495
12.2.2	Advantages and Disadvantages of RPECVD	496
12.2.3	RPECVD of Silicon Nitride Films	500
12.3	Atmospheric Pressure PECVD (AP-PECVD) using Non-thermal Plasmas	510
12.3.1	Introduction	510
12.3.2	Sources of Atmospheric Pressure, Non-thermal Plasmas	510
12.3.3	Applications of Electrical Discharges for AP-PECVD	511
12.4	Conclusions	530
	References	530

Chapter 13 Commercial Aspects of CVD

Albert Barry Leese and Alan Rodney Mills

13.1	CVD Industries Introduction	535
13.1.1	Glass Coatings	536
13.1.2	Silicon Devices	537
13.1.3	Compound Semiconductors	538
13.2	Industry Structure	541
13.2.1	The Sheet Glass Industry	541
13.2.2	The Silicon Industry	541
13.2.3	The III-V LED Industry	542
13.2.4	III-V Semiconductor Lasers	543
13.3	Precursor Selection	544
13.4	Commercial Considerations	544
13.4.1	Silicon	544
13.4.2	Compound Semiconductors	545
13.4.3	Architectural Glass Coating	546
13.4.4	Thin Film Transistor (TFT) and Solar Applications	546
13.5	Health, Safety and Analytical	546
13.5.1	Health and Safety	546
13.5.2	Analytical Requirements	547
13.6	Typical Precursors for the Silicon Semiconductor Industry	548
13.7	III-V CVD HB Light Emitting Diode Applications	548
13.7.1	Historical LED Production	548
13.7.2	Overview of CVD Processes	550
13.7.3	Hand Held Devices and Display Backlighting	552

13.7.4	Large Display Backlighting	552
13.7.5	Portable Lighting	553
13.7.6	Automotive and Vehicle Uses	555
13.7.7	Signage and Channel Letters	557
13.7.8	Signals – Traffic	559
13.7.9	Aviation Lighting	559
13.7.10	Marine Lighting	560
13.7.11	General Lighting and Illumination	561
13.7.12	Group III-V High Frequency Devices	564
13.7.13	Group III-V Semiconductor Diode Lasers	566
13.7.14	Solar Cells	567
13.7.15	Silicon Carbide Applications	569

Subject Index	571
