

CONTENTS:

1. DEFINITION OF THE ORTHODONTICS	9
2. REASONS FOR ORTHODONTIC THERAPY	9
2.1 The esthetic criterion	9
2.2 The functional criterion	9
2.2.1 Caries	9
2.2.2 Periodontal diseases	10
2.2.3 Change of masticatory effect	10
2.2.4 Craniomandibular disorders	10
2.2.5 Speech disorders	10
2.2.6 Anomalies of the position of the dentition's abutments	10
3. GOAL OF THE ORTHODONTICS	11
4. DEVELOPMENT AND GROWTH OF THE FACE AND OF THE JAWS	11
4.1 Phylogenetic notes	11
5. PRENATAL DEVELOPMENT OF THE FACE	12
6. POSTNATAL DEVELOPMENT OF THE FACE	15
7. DEVELOPMENT OF THE DENTITION	16
7.1 Development of the deciduous dentition	16
7.2 Development of the mixed dentition	20
7.2.1 Early mixed dentition, the first period of the change of the dentition	21
7.2.2 Late mixed dentition, the second period of the change of the dentition	25
7.3 Development of the permanent dentition	26
8. GROWTH OF THE CRANIOFACIAL SKELETON	28
8.1 General notices	28
8.2 Skeletal growth	28
8.2.1 Endochondral bone formation	28
8.2.2 Intramembranous bone formation	28
8.3 Growth in the craniofacial complex	29
8.3.1 Cranial vault	29
8.3.2 Cranial base	30
8.3.3 Maxilla (Nasomaxillary complex)	30
8.3.4 Mandible	31
8.3.5 Growth rotations	31

8.3.5.1	<i>Neutral type of the mandibular growth</i>	31
8.3.5.2	<i>Anterior mandibular rotation</i>	31
8.3.5.3	<i>Posterior mandibular rotation</i>	31
8.3.6	Intensity of the facial growth	32
9.	CLASSIFICATION OF THE ORTHODONTIC ANOMALIES	34
9.1	Anomalies of the teeth	34
9.1.1	Anomalies of the shape (form) of the teeth	34
9.1.2	Anomalies of the size of the teeth	35
9.1.3	Anomalies of the number of the teeth	36
9.1.4	Anomalies of the position (posture) of the teeth	37
9.2	Anomalies of the shape of the dental arch	40
9.3	Anomalies of the bite	41
9.4	Anomalies of the relationship of the dental arches	43
9.4.1	Anomalies of the relationship of the dental arches in the anteroposterior direction	44
9.4.1.1	<i>Angle class I</i>	44
9.4.1.2	<i>Angle class II</i>	44
9.4.1.3	<i>Angle class III</i>	45
9.4.2	Anomalies of the relationship of the dental arches in the vertical direction	47
9.4.3	Anomalies of the relationship of the dental arches in the transverse direction	47
9.5	Anomalies of the relationship of the jaws (of the skeletal pattern)	47
9.5.1	Anomalies of the relationship of the jaws in the anteroposterior direction	48
9.5.1.1	<i>Class I skeletal pattern</i>	48
9.5.1.2	<i>Class II skeletal pattern</i>	48
9.5.1.3	<i>Class III skeletal pattern</i>	48
9.5.2	Anomalies of the relationship of the jaws in the vertical direction	49
9.5.3	Anomalies of the relationship of the jaws in the transverse direction	49
9.5.4	Anomalies of the size of the jaws	49
10.	EXAMINATION OF AN ORTHODONTIC PATIENT	50
10.1	Patient questioning	50
10.1.1	Medical and dental history	50
10.1.2	Social and behavioural evaluation	51
10.2	Clinical examination of the patient	51
10.2.1	Extraoral examination of the head and face	52
10.2.2	Intraoral examination	52
10.2.2.1	<i>Important data in the dentition</i>	52
10.2.2.2	<i>Examination of the soft tissues</i>	53
10.2.2.3	<i>Basic orientation about the skeletal base relationship</i>	53
10.2.3	Functional examination	53
10.3	Evaluation of diagnostic records	54
10.3.1	Evaluation of the dental casts	54
10.3.2	Evaluation of the radiographs	56
11.	ORTHODONTIC THERAPY	58
11.1	Goal of the orthodontic therapy	58
11.2	The biologic basis of the orthodontic therapy	58
11.2.1	Tooth movement	58
11.2.2	Remodelling of the alveolar process	63

11.2.3 Response of the skeletal areas distant from the dentition	63
11.3 Devices for the orthodontic treatment	63
11.3.1 Interceptive orthodontic operations	63
11.3.2 Orthodontic therapy with removable orthodontic appliances	66
11.3.2.1 <i>Active appliances</i>	66
11.3.2.2 <i>Functional (jaw orthopedic) appliances</i>	70
11.3.2.3 <i>Unique passive appliances</i>	74
11.3.3 Orthodontic therapy with fixed orthodontic appliances	75
11.4 Retention of the result of orthodontic therapy	86
