Foreword	vii
Preface from the First Edition	viii
Preface to the Second Edition	x
Acknowledgments	xii

PART I: BIOMECHANICAL PRINCIPLES

1 Introduction to Biomechanical Analysis	3
2 Mechanical Properties of Materials	21
3 Biomechanics of Bone	36
4 Biomechanics of Skeletal Muscle	45
5 Biomechanics of Cartilage	69
6 Biomechanics of Tendons and Ligaments	84
7 Biomechanics of Joints	103

PART II: KINESIOLOGY OF THE UPPER EXTREMITY

Unit 1: Shoulder Unit: The Shoulder Complex	118
8 Structure and Function of the Bones and Joints of the Shoulder Complex	120
9 Mechanics and Pathomechanics of Muscle Activity at the Shoulder Complex	150
10 Analysis of the Forces on the Shoulder Complex during Activity	188
Unit 2: Elbow Unit	197
11 Structure and Function of the Bones and Noncontractile Elements of the Elbow	198
12 Mechanics and Pathomechanics of Muscle Activity at the Elbow	219
13 Analysis of the Forces at the Elbow during Activity	243
Unit 3: Wrist and Hand Unit	253
14 Structure and Function of the Bones and Joints of the Wrist and Hand	255
15 Mechanics and Pathomechanics of the Muscles of the Forearm	294
16 Analysis of the Forces at the Wrist during Activity	331
17 Mechanics and Pathomechanics of the Special Connective Tissues in the Hand	339
18 Mechanics and Pathomechanics of the Intrinsic Muscles of the Hand	351
19 Mechanics and Pathomechanics of Pinch and Grasp	370

PART III: KINESIOLOGY OF THE HEAD AND SPINE

Unit 4: Musculoskeletal Functions within the Head	390
20 Mechanics and Pathomechanics of the Muscles of the Face and Eyes	391
21 Mechanics and Pathomechanics of Vocalization	412
22 Mechanics and Pathomechanics of Swallowing	423
23 Structure and Function of the Articular Structures of the TMJ	438
24 Mechanics and Pathomechanics of the Muscles of the TMJ	452
25 Analysis of the Forces on the TMJ during Activity	466

Unit 5: Spine Unit	472
26 Structure and Function of the Bones and Joints of the Cervical Spine	473
27 Mechanics and Pathomechanics of the Cervical Musculature	492
28 Analysis of the Forces on the Cervical Spine during Activity	511
29 Structure and Function of the Bones and Joints of the Thoracic Spine	520
30 Mechanics and Pathomechanics of the Muscles of the Thoracic Spine	538
31 Loads Sustained by the Thoracic Spine	556
32 Structure and Function of the Bones and Joints of the Lumbar Spine	563
33 Mechanics and Pathomechanics of Muscles Acting on the Lumbar Spine	587
34 Analysis of the Forces on the Lumbar Spine during Activity	601
35 Structure and Function of the Bones and Joints of the Pelvis	620
36 Mechanics and Pathomechanics of Muscle Activity in the Pelvis	654
37 Analysis of the Forces on the Pelvis during Activity	676
 PART IV: KINESIOLOGY OF THE LOWER EXTREMITY	685
Unit 6: Hip Unit	686
38 Structure and Function of the Bones and Noncontractile Elements of the Hip	687
39 Mechanics and Pathomechanics of Muscle Activity at the Hip	705
40 Analysis of the Forces on the Hip during Activity	727
Unit 7: Knee Unit	737
41 Structure and Function of the Bones and Noncontractile Elements of the Knee	738
42 Mechanics and Pathomechanics of Muscle Activity at the Knee	767
43 Analysis of the Forces on the Knee during Activity	791
Unit 8: Ankle and Foot Unit	806
44 Structure and Function of the Bones and Noncontractile Elements of the Ankle and Foot Complex	807
45 Mechanics and Pathomechanics of Muscle Activity at the Ankle and Foot	838
46 Analysis of the Forces on the Ankle and Foot during Activity	865
 PART V: POSTURE AND GAIT	873
47 Characteristics of Normal Posture and Common Postural Abnormalities	875
48 Characteristics of Normal Gait and Factors Influencing It	892
 Index	919
