

# CONTENTS

Contents.....	1
1. Preface.....	4
<b>PART I - MATERIALS</b>	
<b>2. MATERIALS IN CONSTRUCTION.....</b>	<b>5</b>
2.1 Specifications and Standards.....	5
2.2 European Codes and Standards.....	5
2.3 Materials Performance and Its Measurement.....	6
2.3.1 Structural Safety.....	6
2.3.2 Health and Safety.....	8
2.3.3 Fire.....	8
2.3.4 Durability.....	9
<b>3. BINDING INORGANIC MATERIALS.....</b>	<b>10</b>
3.1 Air Lime.....	10
3.2 Gypsum.....	11
3.3 Hydraulic Lime.....	12
3.4 Cement.....	12
<b>4. MORTARS.....</b>	<b>15</b>
4.1 Masonry Mortar.....	15
4.1.1 Properties of Hardened Mortar.....	15
4.2 Rendering and Plastering Mortar.....	16
4.2.1 Properties of Hardened Rendering and Plastering Mortars.....	16
<b>5. CONCRETE.....</b>	<b>18</b>
5.1 Definitions.....	18
5.2 Constituent Materials.....	18
5.3 Classification.....	19
5.3.1 Exposure Classes Related to Environmental Conditions.....	19
5.4 Fresh Concrete.....	21
5.4.1 Consistence Classes.....	21
5.4.2 Classes Related to Maximum Particle Size of Aggregates.....	22
5.5 Hardened Concrete.....	22
5.5.1 Compressive strength classes.....	22
5.6 Density Classes.....	22
5.7 Categories of Concrete.....	23
5.8 Resistance to Alkali-Silica Reaction.....	23
5.9 Chloride Content.....	24
5.10 Composition and Properties of Concrete.....	24
<b>6. AGGREGATES FOR CONCRETE.....</b>	<b>26</b>
6.1 Aggregate Grading.....	26
<b>7. CLAY MASONRY UNITS.....</b>	<b>28</b>
7.1 Durability.....	28
7.2 Freeze/Thaw Resistance.....	28
7.2.1 General.....	28
7.2.2 Masonry Subjected to Severe Exposure.....	29
7.2.3 Masonry Subjected to Moderate Exposure.....	29
7.2.4 Masonry Subjected to Passive Exposure.....	29

7.3	Sulphate Action on Mortars and Plasters.....	29
7.4	Efflorescence and Staining.....	30
7.5	General Guidance on the Appearance.....	30
7.6	Requirements for Clay Masonry Units.....	30
7.6.1	General.....	30
7.6.2	Clay Units with Low Gross Density for Protected Masonry (LD-units).....	30
7.6.3	Clay Units with High Density ( HD-units).....	32
<b>8.</b>	<b>METALS.....</b>	<b>34</b>
8.1	Steel.....	34
8.1.1	Low-Carbon Steel.....	35
8.1.2	Heat Treatment of Steel.....	36
8.1.3	Brittleness of Steel.....	37
8.1.4	Ductility of Steel.....	37
8.1.5	Weldability in Steels.....	37
8.1.6	Steel Types Used in Construction.....	39
8.1.7	Steel for Structural sections.....	39
8.1.8	Reinforcing Steel.....	39
8.1.9	Prestressing Steels.....	40
8.2	Oxidation of metals.....	41
8.3	Corrosion of Metals.....	41
8.4	Prevention of Corrosion.....	44
8.5	Stainless Steels.....	45
8.6	Metals Used in Construction.....	45
<b>9.</b>	<b>PLASTICS.....</b>	<b>48</b>
9.1	The Fabrication of Plastics.....	48
9.2	Thermoplastic Materials.....	49
9.3	Thermosetting Resins.....	51
<b>10.</b>	<b>DAMPNESS IN BUILDINGS.....</b>	<b>53</b>
10.1	Capilarity.....	53
10.2	Porosity.....	55
10.3	Interconnection of Voids and Pore Structure.....	56
<b>PART II</b>		
<b>11.</b>	<b>TESTING METHODS.....</b>	<b>57</b>
11.1	Why Do We Test Materials.....	57
11.2	General Laboratory Rules and Safety Requirements.....	57
11.3	Laboratory Report.....	58
<b>12.</b>	<b>TESTING OF CEMENT – PART 1.....</b>	<b>59</b>
12.1	Density.....	59
12.1.1	Determination of Density by Pycnometry.....	59
12.2	Fineness.....	60
12.2.1	Sieving Method.....	60
12.2.2	Air Permeability Method (Blaine Method).....	60
12.3	Determination of Setting Time.....	63
12.3.1	Standard Consistence Test.....	63
12.3.2	Setting Time Test.....	64

<b>13. CEMENT – DETERMINATION OF STRENGTH .....</b>	<b>66</b>
13.1 Preparing Samples.....	66
13.1.1 Mortar Constituents.....	66
13.1.2 Equipment.....	67
13.1.3 Preparation of Test Specimens.....	67
13.1.4 Curing of Test Specimens.....	68
13.2 Testing the Specimens.....	69
13.2.1 Flexural Strength.....	69
13.2.2 Compressive Strength.....	70
<b>14. TESTING OF STEEL.....</b>	<b>72</b>
14.1 Marking of Steel.....	72
14.2 Basic Properties of Reinforcing Steel.....	72
14.3 Tensile Test.....	74
14.3.1 Definitions.....	74
14.3.2 Test Pieces.....	75
14.3.3 Determination of Original Cross-Section Area.....	75
14.3.4 Determination of Original Gauge Length.....	76
14.3.5 Determination of Final Gauge Length.....	76
14.3.6 Testing Procedure.....	77
14.3.7 Evaluation of Results.....	78
<b>15. MODULUS OF ELASTICITY.....</b>	<b>79</b>
15.1 Graphical Determination of the Modulus of Elasticity.....	80
15.2 Determination of the Modulus of Elasticity.....	80
15.2.1 Modulus of Elasticity in Tension.....	81
15.2.2 Modulus of Elasticity in Flexural Stress.....	81
15.2.3 Determination of the Basic Strain at Basic Loading.....	84
<b>16. DETERMINATION OF THERMAL CONDUCTIVITY.....</b>	<b>87</b>
16.1 Thermal Conductivity Measuring Methods.....	87
16.2 Determining of Thermal Conductivity in Steady State.....	89
16.2.1 Measuring of Thermal Conductivity by Dr. Bock's apparatus .....	89
<b>APPENDIX – LABORATORY FORM SET.....</b>	<b>91</b>
