**PLANNING**

Cover image: © Courtney Babb

Routledge titles are available as eBook editions in a range of digital formats

"At last, a research methods textbook aimed specifically at planners! Combining guidance on all aspects of the research process with detailed coverage of methods vital for understanding spatial change, *Doing Research in Urban and Regional Planning* will prove invaluable to students and practitioners alike."

**Sue Brownill**, *Reader in Urban Policy and Governance, Oxford Brookes University, UK*

"*Doing Research in Urban and Regional Planning* is a highly recommended guide to the methods, theories and techniques used by planning researchers in academia and practice. Covering the full spectrum of qualitative and quantitative research methods, as well as textual analysis and participatory techniques, this book will become a valued reference for educators, students, and practitioners."

**Nicole Gurrán**, *Professor of Urban and Regional Planning, The University of Sydney, Australia*

*Doing Research in Urban and Regional Planning* provides a basic introduction to methodology and methods in planning research. It brings together the methods most commonly used in planning, explaining their key applications and basic protocols. It addresses the unique needs of planners by dealing with concerns which cut across the social, economic, and physical sciences, showing readers how to mobilise fresh combinations of methods, theoretical frameworks and techniques to address the complex needs of urban and regional development. It includes illustrative case studies throughout to help planning students see how methods can be operationalised on the ground and connect research with urban and regional planning practice to build foundations for action.

The book pays attention to contemporary trends – such as the growth in information technology, and general shifts in urban and environmental governance – that are affecting the practicalities and protocols of doing planning research. *Doing Research in Urban and Regional Planning* also encourages ethical reflection and discusses the ethical issues specific to planning research.

Each chapter begins with a chapter outline with learning outcomes and concludes with take-home messages and suggested further readings. It also suggests a range of learning activities and discussion points for each method.

**Diana MacCallum** teaches urban and regional planning at Curtin University, where she has coordinated the Honours program in planning since 2012. Her research interests focus on social aspects of urban planning and development, including practices and discourses of governance, social innovation, and eco-social justice in environmental policy.

**Courtney Babb** lectures in urban and regional planning at Curtin University. His teaching responsibilities include research methods and dissertation preparation, as well as transport planning and participatory planning. He also conducts research in these areas, and has a particular interest in children's interaction with the built environment and planning systems.

**Carey Curtis** is Professor of City Planning and Transport at Curtin University, and the Director of the urban research network Urbanet. Her research experience spans four decades and has included over 50 projects in both academia and the planning industry. She has employed a wide range of both quantitative and qualitative research methods. Carey has published extensively in the areas of travel behaviour, transport and land use planning, and institutional barriers to sustainable urban development.

The Natural and Built Environment Series

Series Editor: Professor John Glasson

Essential reading for undergraduate and postgraduate students, the books in The Natural and Built Environment Series are introductory and core texts. Each text provides a comprehensive account of a key planning topic.

## PART 1

# Conceptualising Research

1

## 1 Introduction

3

Why a Special Textbook for Planning Research? 3

What to Expect in this Book 4

Reference 6

## 2 What are Methods? What is Methodology?

7

Methods 7

Method + ology 10

More 'ologies' 11

Choosing Methods, Building Methodology 13

And Finally, a Little Bit about Paradigms 16

Conclusion 16

Suggested Further Reading 17

References 18

## 3 Theories in Planning Research: How they can Help You

19

Theory in Planning Research 19

Theory, Research Questions and Method 22

Theory as the 'State of the Art' 26

Finding the 'Right' Theory 27

Conclusion 29

Suggested Further Reading 29

References 30

## Interlude 1: Developing your Research Question

31

Suggested Further Reading 33

## 4 The Big Divide? Quantitative vs Qualitative Approaches

34

Quantity or Quality? 34

How Does a Sample Represent the World? 38

**8 Understanding Urban Change: Land Use Surveys** 91

*What are Land Use Surveys and Why are they Important to Planning?* 91

*Determining the Scope: Issues of Scale, Complexity and Time* 93

*Discrete Identifiers and your Base Map* 94

*Land Use Categories* 96

*Types of Data and Administration of your Survey* 98

*Analysing Land Use Survey Data* 100

*Conclusion* 102

*Suggested Further Reading* 102

*References* 102

**Interlude 4: Fieldwork** 103

**PART 2.2**  
**Working with People** 105

**9 Gauging Public Opinion: Questionnaires** 107

*When would I Use a Questionnaire?* 108

*Steps for Administering a Survey* 109

*Questionnaire Design* 109

*Sampling* 115

*Recording and Analysis* 122

*Communication* 124

*Conclusion* 124

*Suggested Further Reading* 125

*References* 125

**Interlude 5: Presenting and Interpreting Results – Quantitative Data** 126

*Suggested Further Reading* 130

**10 Interrogating Stakeholders' Ideas: Focus Groups and Iterative Methods** 131

*Focus Groups* 132

*Ask the Experts: The Delphi Technique* 139

*Conclusion* 143

*Suggested Further Reading* 144

*Reference* 144

**Interlude 6: Coding Data for Qualitative Analysis** 145

*Suggested Further Reading* 148

*References* 148

**11 Exploring Accounts, Opinions and Attitudes: In-depth Interviews** 149

*What Types of Research are Interviews Useful For?* 149

*Preparation* 151

What Do We Do with the Data?	39
Do I Have to Choose One or the Other?	40
Conclusion	41
Suggested Further Reading	41

## 5 The Case Study Approach 43

What is a Case Study?	43
Why would I Use a Case Study?	46
When is a Study of a Case Not a Case Study?	47
How Many Cases is Enough?	49
What Needs to be Covered?	50
Conclusion	52
Suggested Further Reading	52
References	53

## PART 2 55

### Methods

## Interlude 2: How your Literature Review Supports your Research 57

Suggested Further Reading	58
---------------------------	----

## PART 2.1 59

### Understanding Places

## 6 Describing Places from Secondary Data – and some Cautionary Tales 61

Applications of Secondary Data	61
Steps in Using Secondary Data	63
Conclusion	73
Suggested Further Reading	73
References	74

## Interlude 3: Good Data Management Practice – Keeping Things Sharable, Reliable, and Ethical 75

Reference	78
-----------	----

## 7 Evaluating Places: Auditing and Site Analysis Techniques 79

Types of Questions that Audits and Site Analysis can Help Address	79
Using Audits to Generate Data	80
Conducting an Audit	84
Analysing Data from Audits	85
Site Analysis	87
Conclusion	89
Suggested Further Reading	90
References	90

The Interview Process	158
Analysing and Interpreting Interview Data	160
Conclusion	162
Suggested Further Reading	163
References	163

## PART 2.3

### Interrogating Practice

165

#### 12 People in Place, People in Practice: Non-verbal Methods

167

The Complexities of Place and Practice	168
Passive and Participant Observation	169
Cognitive Mapping	175
Photographic Enquiry	180
Conclusion	183
Suggested Further Reading	184
References	185

#### 13 What can Documents Tell you about Planning Practice? Three Types of Text Analysis

186

Text Analysis vs Other Reading Tasks	187
Content Analysis	188
Storyline Analysis	193
Critical Discourse Analysis	196
And Finally, a Few Words of Caution	202
Suggested Further Reading	203
References	204

#### 14 Planning Research as Practical Action: Participatory Methods

205

Participatory Research – Not a Single Method	206
Workshop Methods for Place-based Planning	208
Project-based Methods in Participatory Action Research	215
Conclusion	219
Suggested Further Reading	220
References	220

## PART 3

### Putting it into Practice

223

#### 15 Looking After Yourself and Others: Ethical and Personal Issues in Planning Research

225

Research Ethics Principles – an Overview	226
Ethics in Planning Practice and Research	227
Harm, Risk and Benefit in Human Research	228
How can Planning Researchers Ensure they are Ethical Researchers?	230

Conclusion	236
Suggested Further Reading	237
References	237

## 16 Pulling it All Together

Designing your Research Project	239
The Research Proposal	242
Conducting the Research	245
Writing Up the Research	247
Conclusion	251
Suggested Further Reading	251
References	252
