The Transformation of Public Economics Research: 1970–2000 MARTIN FELDSTEIN	xxvii
Part 1 – CAPITAL INCOME TAXATION	
<i>Chapter 17</i>	
Taxation, Risk-Taking, and Household Portfolio Behavior JAMES M. POTERBA	1109
Abstract	1110
Keywords	1110
Introduction	1111
1. Taxation and the portfolio choice environment	1111
1.1. The taxation of investment income	1112
1.2. The recent evolution of marginal tax rates on capital income in the United States	1114
1.3. Household financial assets in the United States	1117
2. Taxation and portfolio structure	1118
2.1. Asset demand in clientele models	1120
2.2. Taxation and asset demands with risky returns	1122
2.3. The after-tax capital asset pricing model and asset demands	1123
2.4. Empirical evidence on taxation and portfolio choice	1126
2.5. Taxation and investor clienteles for corporate stock: dividends vs. capital gains	1130
2.6. Asset market evidence on investor valuation of dividends and capital gains	1131
3. Taxation and asset sales	1136
3.1. Capital gains tax avoidance and loss-generation behavior	1138
3.2. Asset turnover and the capital gains tax: empirical evidence	1140
3.3. Taxation and the January effect	1144
3.4. The welfare effects of capital-gains taxation	1145
3.5. The securities-transactions tax and capital market equilibrium	1148

4. Taxation and the markets for particular financial products	1149
4.1. The tax-exempt bond market	1149
4.2. Taxation and mutual funds	1150
4.3. Taxation and asset holding in tax-deferred accounts	1153
4.4. Taxation and insurance products	1155
4.5. The estate tax and portfolio structure	1156
4.6. Stock options: another portfolio component	1157
5. Taxation, risk-taking, and human capital	1157
6. Conclusions and unresolved issues	1160
References	1162

Chapter 18

Taxation and Saving

B. DOUGLAS BERNHEIM

Abstract	1174
Keywords	1174
1. Introduction	1175
2. Theories of taxation and saving	1176
2.1. The life-cycle hypothesis	1176
2.2. Variants of the life-cycle hypothesis	1195
2.3. Behavioral theories	1200
3. Evidence on responses to changes in the after-tax rate of return	1208
3.1. The consumption/saving function approach	1208
3.2. The Euler-equation approach	1209
4. Evidence on responses to tax-deferred savings accounts	1211
4.1. Individual Retirement Accounts	1212
4.2. 401(k)s	1223
4.3. General evidence from the US experience	1231
4.4. Evidence from countries other than the United States	1231
5. Evidence on other links between taxation and saving	1232
5.1. The size and scope of the pension system	1233
5.2. Employer-controlled pensions vs. participant-controlled pensions	1235
5.3. Taxation and corporate saving	1236
5.4. Other activities undertaken by employers	1238
5.5. Marketing and promotion of financial products	1239
6. Concluding comments	1239
References	1240

Chapter 19

Taxation and Corporate Financial Policy

ALAN J. AUERBACH

Abstract	1252
Keywords	1252

1. Introduction	1253
1.1. What is financial policy?	1253
1.2. Outline of the chapter	1254
2. Corporate equity policy	1254
2.1. The "traditional" view ($\mu = 0$)	1258
2.2. The "new" view ($\lambda = 0$)	1258
2.3. The intermediate case ($\lambda, \mu > 0$)	1259
2.4. Corporate tax integration	1261
2.5. Evaluating the models	1263
3. The debt–equity decision	1266
3.1. Competing tax shields	1269
3.2. The Miller equilibrium	1271
3.3. Evidence on the effects of taxation on corporate borrowing	1273
3.4. Leasing as a form of borrowing	1278
4. Organizational form and ownership structure	1282
4.1. The choice of organizational form	1282
4.2. Mergers and acquisitions	1284
5. Taxes and financial innovation	1287
References	1289

Chapter 20

Tax Policy and Business Investment

KEVIN A. HASSETT and R. GLENN HUBBARD

Abstract	1294
Keywords	1294
1. Introduction	1295
2. Tax policy, investment, and capital accumulation	1295
2.1. Households	1295
2.2. Firms	1296
2.3. Government sector	1298
2.4. Equilibrium	1299
2.5. Steady-state effects of tax policy on the capital stock	1299
2.6. Dynamic effects of tax policy shocks	1301
2.7. Irreversibility and uncertainty	1303
3. Moving from analytical to empirical analysis of investment	1305
3.1. Neoclassical theory: a reprise	1306
3.2. Early empirical results	1307
3.3. Contemporary empirical tests of neoclassical models	1309
3.4. Lessons from the time-series data	1312
4. New identification strategies in empirical research	1316
4.1. Using cross-sectional variation to identify tax effects	1317
4.2. Measurement error in fundamental variables	1319
4.3. An alternative interpretation: misspecification of adjustment costs	1321

4.4. The importance of heterogeneity	1325
4.5. Summary	1325
5. Arguments for and against investment incentives	1326
5.1. Tax reform could remove a distortion	1326
5.2. Investment incentives cause interasset distortions	1326
5.3. Equipment investment generates externalities	1327
5.4. Investment incentives do not work because some firms face financing constraints	1327
5.5. Investment incentives are reflected in prices of capital goods	1329
5.6. Investment incentives are reflected in higher interest rates	1330
5.7. The economy has "too much" capital	1330
6. Applications to other public policies toward investment	1333
6.1. Low inflation as an investment subsidy	1333
6.2. Moving from an income tax to a consumption tax	1336
6.3. Temporary investment incentives?	1336
7. Conclusions	1338
References	1338

Part 2 – THEORY OF TAXATION

Chapter 21

Taxation and Economic Efficiency

ALAN J. AUERBACH and JAMES R. HINES JR. 1347

Abstract 1348

Keywords 1348

1. Introduction 1349

1.1. Outline of the chapter 1349

2. The theory of excess burden 1349

2.1. Basic definitions 1349

2.2. Variations in producer prices 1355

2.3. Empirical issues in the measurement of excess burden 1358

3. The design of optimal taxes 1361

3.1. The Ramsey tax problem 1362

3.2. Changing producer prices 1366

3.3. The structure of optimal taxes 1368

3.4. An example 1369

3.5. The production efficiency theorem 1369

3.6. Distributional considerations 1370

4. Income taxation 1372

4.1. Linear income taxation 1372

4.2. Nonlinear income taxation: introduction 1374

4.3. Nonlinear income taxation: graphical exposition 1375

4.4. Nonlinear income taxation: mathematical derivation 1379

5. Externalities, public goods, and the marginal cost of funds	1384
5.1. The provision of public goods and the marginal cost of public funds	1384
5.2. Externalities and the "double-dividend" hypothesis	1387
5.3. Distributional considerations and the MCPF	1389
6. Optimal taxation and imperfect competition	1391
6.1. Optimal commodity taxation with Cournot competition	1391
6.2. Specific and ad valorem taxation	1395
6.3. Free entry	1398
6.4. Differentiated products	1401
7. Intertemporal taxation	1403
7.1. Basic capital income taxation: introduction	1404
7.2. The steady state	1405
7.3. Interpreting the solution	1406
7.4. Human-capital accumulation and endogenous growth	1407
7.5. Results from life-cycle models	1413
8. Conclusions	1415
References	1416

Chapter 22

Tax Avoidance, Evasion, and Administration

JOEL SLEMROD and SHLOMO YITZHAKI	1423
Abstract	1425
Keywords	1425
1. Introduction	1426
1.1. Why avoidance, evasion and administration are central, not peripheral, concepts in public finance	1426
1.2. The evolution of tax structures	1426
1.3. Evasion, avoidance, and real substitution response	1428
1.4. General framework	1429
2. Theoretical models of evasion	1429
2.1. The Allingham–Sandmo–Yitzhaki model	1429
2.2. Jointness with labor supply	1432
2.3. Other uncertainty	1434
2.4. General equilibrium considerations	1435
3. General models of avoidance and evasion	1436
4. Descriptive analysis of evasion and enforcement	1438
4.1. The extent of tax evasion	1438
4.2. Determinants of evasion	1440
5. Descriptive analysis of avoidance	1443
5.1. Dimensions of avoidance	1443
5.2. The extent of avoidance	1444
6. Fundamentals of tax analysis	1445
6.1. Equity	1445

6.2. A taxonomy of efficiency costs	1447
7. Normative analysis	1450
7.1. Optimal tax administration and enforcement	1450
7.2. Optimal tax systems	1454
7.3. The marginal efficiency cost of funds	1459
8. Conclusion	1463
References	1465

Chapter 23

Environmental Taxation and Regulation

A. LANS BOVENBERG and LAWRENCE H. GOULDER

1471

Abstract

1474

Keywords

1474

1. Introduction

1475

2. Optimal environmental taxation

1477

2.1. The basic model

1477

2.2. The first-best solution in a command economy

1478

2.3. First-best outcome in a decentralized market economy: the "Pigouvian result"

1478

2.4. When lump-sum taxes are not available: the second-best optimum

1481

2.5. Some complications to the second-best problem

1486

2.6. Empirical issues and assessments

1490

3. Environmentally motivated tax reforms

1494

3.1. Gross costs and environment-related benefits of revenue-neutral reforms

1497

3.2. Employment and welfare impacts of revenue-neutral reforms

1498

3.3. Complicating factors

1505

3.4. Numerical assessments of a green tax reform

1509

4. Alternatives to pollution taxes

1513

4.1. Instrument choice in a certainty context

1513

4.2. Uncertainty and instrument choice

1524

5. Distributional considerations

1530

5.1. Efficiency–equity trade-offs

1530

5.2. The Pigouvian rule reconsidered

1532

5.3. Re-examining instrument choice in light of distributional issues

1535

6. Summary and conclusions

1537

6.1. Optimal tax issues

1538

6.2. Costs of revenue-neutral reforms

1538

6.3. Instrument choice

1539

6.4. Distributional issues

1539

6.5. Areas for future research

1540

Part 3 – THEORY OF GOVERNMENT

Chapter 24

Political Economics and Public Finance

TORSTEN PERSSON and GUIDO TABELLINI

Abstract

Keywords

1. General introduction

Part I. General redistributive politics

2. Rich vs. poor

2.1. A simple model of redistribution

2.2. Equilibrium redistribution

2.3. Implications and evidence

2.4. Notes on the literature

3. Young vs. old

3.1. A simple model of pensions

3.2. Equilibrium pensions

3.3. Evidence and extensions

3.4. Notes on the literature

4. Employed vs. unemployed

4.1. A simple model of unemployment insurance

4.2. Equilibrium unemployment insurance

4.3. Equilibrium labor-market regulations

4.4. Notes on the literature

5. Capital vs. labor

5.1. A simple model of capital and labor taxation

5.2. Electoral competition between Downsian candidates

5.3. Equilibrium taxation with citizen candidates

5.4. Notes on the literature

Part II. Special-interest politics

6. A simple model

6.1. A normative benchmark

6.2. The basic common-pool problem

6.3. Notes on the literature

7. Legislative bargaining

7.1. A simple legislative-bargaining model

7.2. Political equilibrium

7.3. Extensions

7.4. Notes on the literature

8. Lobbying

8.1. A simple lobbying model

8.2. Political equilibrium

8.3. Notes on the literature

1549

1551

1607

1608

1610

9. Electoral competition	1610
9.1. A simple model of electoral competition	1611
9.2. Political equilibrium	1612
9.3. Notes on the literature	1615
10. Interactions in the political process	1615
10.1. Lobbying and elections	1615
10.2. Elections and legislative bargaining	1620
10.3. Lobbying and legislative bargaining	1622
10.4. Notes on the literature	1625
Part III. Comparative politics	1626
11. Agency costs and checks and balances	1628
11.1. Electoral accountability	1629
11.2. Separation of powers	1632
11.3. Notes on the literature	1635
12. Electoral rules and public finance	1636
12.1. A simple policy problem	1637
12.2. Proportional representation with a single national district	1638
12.3. Plurality rule with multiple districts	1639
12.4. Discussion	1640
12.5. Notes on the literature	1642
13. Political regimes and public finance	1642
13.1. Congressional regime	1643
13.2. Parliamentary regime	1645
13.3. Concluding remarks	1648
13.4. Notes on the literature	1649

<i>Chapter 25</i>	
Economic Analysis of Law	
LOUIS KAPLOW and STEVEN SHAVELL	1661
Abstract	1665
Keywords	1665
1. Introduction	1666
2. Liability for accidents	1667
2.1. Incentives	1667
2.2. Risk-bearing and insurance	1671
2.3. Administrative costs	1673
2.4. Magnitude of liability: damages	1674
2.5. Causation	1677
2.6. Judgment-proof problem	1679
2.7. Product liability	1680
2.8. Liability versus other means of controlling accidents	1682
2.9. Intentional torts	1682

3. Property law	1682
3.1. Justifications for property rights	1683
3.2. Emergence of property rights	1684
3.3. Division and form of property rights	1685
3.4. Public property	1688
3.5. Acquisition and transfer of property	1689
3.6. Conflicts in the use of property: externalities	1693
3.7. Property rights in information	1698
4. Contracts	1702
4.1. Basic theory	1702
4.2. Production contracts	1713
4.3. Other types of contract	1720
5. Litigation	1722
5.1. Suit	1722
5.2. Settlement versus trial	1726
5.3. Litigation expenditures	1730
5.4. Extensions of the basic theory	1731
5.5. Legal advice	1739
5.6. Appeals	1742
5.7. Alternative dispute resolution	1743
5.8. Formulation of legal rules	1744
5.9. Relevance to general incentive schemes	1745
6. Law enforcement	1745
6.1. Rationale for public enforcement	1746
6.2. Basic theory of enforcement	1747
6.3. Extensions of the basic theory	1752
6.4. Criminal law	1760
7. Criticism of economic analysis of law	1761
7.1. Positive analysis	1761
7.2. Normative analysis	1762
7.3. Purported efficiency of judge-made law	1764
8. Conclusion	1765
Acknowledgments	1765
