

Contents

Part I

The Ground Plan of the Nervous System 1

1. Ground Plan of the Nervous System I
Principles of Central Nervous System Development. 3

2. Ground Plan of the Nervous System II
Levels of the Neuraxis 25

3. Central Nervous System Vasculature, Blood-Brain Barrier,
and Cerebrospinal Fluid 51

Part 2

Cellular Basis of Neuronal Signaling 67

4. Cell Biology of Neurons 69

5. Cell Biology of Glia 91

6. Presynaptic Mechanisms Underlying Neurotransmitter Synthesis,
Storage, Release and Inactivation 107

7. Postsynaptic Mechanisms: Neurotransmitter Receptors
and Signal Transduction Cascades. 127

8. Neuronal Integration. 145

Part 3

The Somatosensory System 157

9. Somatic Sensation I
Peripheral Receptors and Primary Afferent Neurons 161
10. Somatic Sensation II
Ascending Pathways From the Spinal Cord and Brainstem to the Thalamus 175
11. Somatic Sensation III
The Physiology of Somatic Sensation. 195
12. Somatic Sensation IV
Pain 211

Part 4

The Motor System 223

13. Motor System I
The Anatomical Organization of the Motor System. 227
14. Motor System II
Segmental Control of Movement: The Motor Unit and Segmental Reflexes. 239
15. Motor System III
Supraspinal Control of Movement 257
16. The Basal Ganglia 273
17. Role of the Cerebellum in Motor Function..... 289

Part 5

The Visual System 305

18. Visual System I
The Retina. 307
19. Visual System II
Central Pathways That Mediate Visual Perception 325
20. Visual System III
Visual Neurophysiology and Visual Perception 335
21. Visual System IV
Visual Afferent Pathways That Control Eye Movement and Ocular Reflexes 349

Part 6

The Auditory System..... 363

22. Auditory System I
The Ear and the Auditory Receptive Apparatus in the Cochlea 365
23. Auditory System II
Central Auditory Pathways 379
24. Auditory System III
Auditory Neurophysiology and Auditory Perception. 389

Part 7

The Vestibular System	407
------------------------------------	------------

25. The Vestibular System	409
---------------------------------	-----

Part 8

The Chemical Senses	423
----------------------------------	------------

26. The Chemical Senses	425
-------------------------------	-----

Part 9

The Autonomic Nervous System	437
---	------------

27. The Autonomic Nervous System	439
--	-----

Part 10

The Hypothalamus and Limbic System: Substrates of Motivation, Emotion, and Memory	455
--	------------

28. The Hypothalamus <i>Coordination of Visceral Operation and the Behaviors That Maintain Bodily Homeostasis</i>	457
--	-----

29. The Limbic System <i>Circuits that Underlie Affect and Memory</i>	469
--	-----

Part 11

Arousal, Attention, Consciousness	483
--	------------

30. Modulatory Systems of the Brainstem	485
---	-----

31. Higher Cortical Functions, Localization of Function, and Regulation of Consciousness	497
---	-----

Index	511
-------------	-----
