- 1 INTRODUCTION 9**
- 2 MODIFIED POLYESTER FIBRES - HISTORY AND DEVELOPMENT 11**
- 3 METHODS OF MODIFYING POLYESTER FIBRES 15**
 - 3.1 Modification in the course of polymer preparation 16
 - 3.2 Modification in the course of fibre preparation 21
 - 3.2.1 Modifying the shape of the spinning nozzle 22
 - 3.2.2 Increasing the spinning speed 24
 - 3.2.3 Modifying the draw-setting conditions 27
 - 3.2.4 Modifying the fineness of fibres 29
 - 3.2.5 Texturing 32
 - 3.2.6 Preparation of bicomponent fibres 34
 - 3.3 Modification applied to commercial fibres 38
 - 3.3.1 Grafting 38
 - 3.3.2 Additional crystallization 41
 - 3.3.3 Controlled surface destruction 42
 - 3.4 Combined modification methods 45
- 4 OTHER TYPES OF FIBRE-FORMING POLYESTERS 46**
 - 4.1 1,4-polycyclohexylene dimethylene terephthalate fibres 46
 - 4.2 Polyalkylene terephthalate fibres 48
 - 4.3 Fibres containing naphthalenedicarboxylic acid 51
 - 4.4 Polypivalolactone fibres 52
 - 4.5 Polyethylene oxybenzoic acid fibres 52
 - 4.6 Polycarbonate fibres 53
 - 4.7 Polyglycolide fibres 56
 - 4.8 Liquid crystal thermotropic polyesters 57
 - 4.9 Other polyesters 60

5 TYPES OF MODIFIED POLYESTER FIBRES	61
5.1 Shring fibres	61
5.1.1 Fibres that shrink in boiling wate	61
5.1.2 Differential shrink fibres	63
5.1.3 Latent-crimp fibres	64
5.1.4 Self-stretch fibres	64
5.2 Fibres with reduced pilling tendency	65
5.3 Elastomeric fibres	68
5.4 Fibres with improved dyeability	69
5.4.1 Fibres with improved dyeability with respect to disperse dyes	70
5.4.2 Fibres dyeable with ionic dyes	74
5.5 Fibres exhibiting improved antistatic properties and electrical conduc tivity	76
5.6 Fibres with reduced flammability	79
5.7 Fibres exhibiting reduced tendency to soiling	81
5.8 Fibres exhibiting higher absorbency	82
5.9 Fibres for the production of non-wovens	85
5.10 Fibres simulating natural materials	88
5.10.1 Cotton-type fibres	89
5.10.2 Wool-type fibres	90
5.10.3 Silk-type fibres	91
5.11 Fibres with improved specific properties	92
6 FIBRE STRUCTURE	96
6.1 Chemical composition of copolyester fibres	97
6.2 Molecular structure	101
6.3 Supramolecular structure	107
6.3.1 Effect of modification on the crystalline phase	114
6.3.2 Effect of modification on the amorphous phase	119
7 FIBRE PROPERTIES	122
7.1 Effect of modification on fibre properties	123
7.2 Resistance of fibres to degradation	125
7.2.1 Hydrolysis	126
7.2.2 Thermal destruction	129
7.2.3 Photochemical degradation	129
7.3 Thermal properties	130
7.3.1 Glass transition temperature	132
7.3.2 Melting point	138
7.3.3 Fibre crystallization	140
7.3.4 Shrink properties	141
7.4 Mechanical properties	144

7.4.1 Fibre rheology	145
7.4.2 Stress relaxation	151
7.4.3 Mechanical characteristics determined from stress-strain curves	154
7.4.4 Elastic recovery	167
7.5 Selected performance characteristics	169
8 PROCESSING CHARACTERISTICS IN TEXTILE MANUFACTURE	173
8.1 Production of spun yarn	174
8.1.1 Cotton-type spinning systems	174
8.1.2 Wool-type spinning systems	176
8.1.3 Flax-type spinning systems	177
8.1.4 Processability of modified polyester fibres in spinning mills .	178
8.2 Production of woven and knitted fabrics	181
9 POSSIBLE APPLICATIONS FOR MODIFIED POLYESTER FIBRES	183
9.1 Conventional applications for modified polyester fibres	184
9.1.1 Textiles containing fibres with reduced pilling tendency . .	184
9.1.2 Textiles containing shrink fibres	188
9.1.3 Textiles containing fibres that are dyeable at boiling temperatures without carriers	190
9.1.4 Textiles containing fibres with reduced flammability . . .	191
9.2 Textiles with improved comfort characteristics	192
9.2.1 Thermal comfort	193
9.2.2 Handle	198
9.2.3 Aesthetic appearance	199
9.2.4 Development trends	199
10 DYEING MODIFIED POLYESTER FIBRES	200
10.1 Mechanism of dye diffusion into polyester fibres	204
10.2 Fibres dyeable at boiling temperatures without carriers	215
10.2.1 Dyeing technology	219
10.2.2 Dyeing evenness and fastness	221
10.3 Anionically modified fibres	222
10.3.1 Dyeing with disperse dyes	223
10.3.2 Dyeing with cationic dyes	225
10.4 Dyeing shrink fibres	233
11 FINISHING	236
11.1 Dyeing pretreatment	237
11.2 Setting	237
