Preface xix

Part I Properties and applications of polyolefin fibres

1	Types of polyolefin fibres	3
	A CRANGLE, Formerly of University of Ulster at Belfast, UK	
1.1	Introduction	3
1.2	Definitions of polymers, fibres and polyolefins	4
1.3	Chemistry of alkene (olefin) monomers	5
1.4	Polymers and polymerisation reactions	6
1.5	Stereochemistry and the structure of polyolefins	9
1.6	Polyethylene fibres	15
1.7	Polypropylene fibres	16
1.8	Polyolefin fibres from copolymers	19
1.9	Polyolefin fibres from polymer blends or alloys	20
1.10	Polyolefin bi-component fibres	23
1.11	Polyolefin nanocomposite fibres	24
1.12	Classification of polyolefin fibres and textiles	25
1.13	Future trends	26
1.14	Conclusions	28
1.15	Sources of further information and advice	29
1.16	References	30
2	The structural and chemical properties of polyolefin fibres	35
	R R MATHER, Heriot-Watt University, UK	
2.1	Introduction	35

2.2	Arrangement of polyolefin chains	37
2.3	Crystalline structures	38
2.4	Crystal morphology	40
2.5	Chemical properties	41
2.6	Oxidation of polyolefin fibres	42
2.7	Stabilisers	45
2.8	Surface chemistry of polyolefin fibres	50
2.9	References	54
3	The structural mechanics of polyolefin fibrous materials and nanocomposites S UGBOLUE, University of Massachusetts, USA	57
3.1	Introduction	57
3.2	The structure and mechanics of polyolefin fibrous materials	58
3.3	The mechanical properties of polyolefin fibers and films	59
3.4	Characterization of polyolefin fibrous materials and nanocomposites	66
3.5	Structure-property improvements of polyolefin nanocomposites	70
3.6	Conclusions	78
3.7	Acknowledgements	78
3.8	References	79
4	Automotive components composed of polyolefins E SADIKU, Tshwane University of Technology, Republic of South Africa	81
4.1	Introduction: brief survey of polyolefin resins and their general properties	81
4.2	Types of polyolefins	84
4.3	Ethylene copolymers	90
4.4	Polypropylene (PP) and its composites	91
4.5	Polyolefin-based nanocomposites	98
4.6	Foamable and expandable polyolefins (FEPO)	100
4.7	Sun visors	105
4.8	Ethylene propylene rubbers: ethylene propylene diene (EPDM) and ethylene propylene copolymers (EPM)	106
4.9	Other poly (α -olefins)	107
4.10	Cyclo-olefin copolymers: properties and applications	108
4.11	Polyolefin elastomers: properties and applications of polyolefin elastomers (POE)	108
4.12	Chlorinated polyethylene and chloro-sulphonated polyethylene	109

4.13	Thermoplastic elastomers (TPEs)	109
4.14	Specific automotive components made of polyolefin-based materials	119
4.15	Future trends	126
4.16	Conclusions	127
4.17	Sources of further information and advice	128
4.18	References	129
5	The use of polyolefins in industrial and medical applications Y KIM, University of Massachusetts, USA	133
5.1	Introduction	133
5.2	Technical textile applications of polyolefins	135
5.3	Polyolefin fiber properties and types	136
5.4	Technical fibrous structures from polyolefin fibers	138
5.5	Industrial applications of polyolefin fibers	144
5.6	Conclusions and future trends	151
5.7	References	152
6	Advances in polyolefin-based fibers for hygienic and medical applications R M PATEL and J MARTIN, The Dow Chemical Company, USA and G CLAASEN and T ALLGEUER, Dow Plastics, Switzerland	154
6.1	Introduction	154
6.2	Monocomponent polyethylene-based soft spunbond fabrics	156
6.3	Monocomponent polypropylene-based soft spunbond fabrics	168
6.4	Bi-component spunbond fabric and bi-component binder fibers	171
6.5	Conclusions	180
6.6	Acknowledgements	181
6.7	References	181

Part II Improving the functionality of polyolefins

7	Production methods for polyolefin fibers R KOTEK, M AFSHARI, V HARBISON and A GUPTA, North Carolina State University, USA	185
7.1	Introduction	185
7.2	Manufacturing of polyolefins	186
7.3	Melt spinning of polypropylene	206

7.4	Important factors in melt spinning of polypropylene	219
7.5	Melt spinning of polyethylene	245
7.6	Other production methods for polyolefins	247
7.7	References	258
8	Enhancing hygiene/antimicrobial properties of polyolefins M BADROSSAMAY and G SUN, University of California, USA	262
8.1	Introduction	262
8.2	Antimicrobial functions	263
8.3	Antimicrobial polyolefins	265
8.4	Future trends	281
8.5	References	283
9	Improving the use of polyolefins in nonwovens S R MALKAN, Hunter Douglas, USA	288
9.1	Introduction	288
9.2	Nonwoven definition	289
9.3	Nonwoven market	291
9.4	Classification of nonwoven fabrics	291
9.5	Finishing of nonwovens	302
9.6	Characteristics and properties of nonwoven fabrics	304
9.7	Consumption profile of polyolefins in nonwovens	305
9.8	Applications of polyolefin nonwovens	312
9.9	Future trends	313
9.10	References	314
10	Testing and quality control of polyolefins S UGBOLUE, University of Massachusetts, USA	316
10.1	Introduction	316
10.2	Testing and characterization of polyolefins	318
10.3	Selected product analysis and performance evaluation: case study on polyolefin nanocomposites	330
10.4	Quality control considerations	339
10.5	Acknowledgements	339
10.6	References	339
11	Polyolefin nanocomposite fibers and films Q FAN, University of Massachusetts, USA	341
11.1	Introduction	341
11.2	Polyolefin nanocomposite fibers and films	342
11.3	Preparation of polyolefin nanocomposite fibers and films	345

11.4	Characterization and analysis	346
11.5	Applications of polyolefin nanocomposites	351
11.6	Chemical applications	353
11.7	Conclusions	357
11.8	Acknowledgements	358
11.9	References	358
12	Improving the colouration/dyeability of polyolefin fibres	363
	R SHAMEY, North Carolina State University, USA	
12.1	Introduction	363
12.2	Overview of structural features of polyolefins	364
12.3	An overview of dye–fibre interactions	366
12.4	Colorants	368
12.5	Colouration of unmodified polyolefins	369
12.6	Improving colouration of polypropylene through fibre modification	384
12.7	Conclusions	391
12.8	Acknowledgements	392
12.9	References	392
