

Obsah

1	Introduction	9
2	Haematological examination	11
2.1	Preanalytical phase	11
2.1.1	Sampling for haematological examination.....	11
2.2	Analytical phase	12
2.2.1	The impedance method.....	13
2.2.2	The colorimetric method	13
2.2.3	Measurement and calculation individual haematological parameters	14
2.2.4	Differential white blood cell count.....	17
2.3	Post analytic phase.....	18
2.3.1	Red blood cells diseases	18
2.3.2	White blood cell disease.....	21
3	Examination of colostrum immunity	25
3.1	Preanalytical phase	25
3.1.1	Sampling.....	26
3.2	Analytical phase	28
3.2.1	Evaluation of colostrum quality	28
3.2.2	Control of colostrum feeding.....	30
3.3	Postanalytical phase.....	39
3.3.1	Metabolism disorders	41
3.3.2	Occurrence of infectious diseases.....	41
4	The examination of ruminal fluid	43
4.1	Preanalytical phase	43
4.1.1	Sampling.....	43
4.2	Analytical phase	44

4.2.1	Physical parameters of ruminal fluid.....	44
4.2.2	Chemical parameters of ruminal fluid.....	45
4.3	Postanalytical phase.....	53
4.3.1	Simple rumen indigestion (<i>Indigestio simplex</i>).....	53
4.3.2	Acute acidosis of rumen content (<i>Acidosis ingestorum ruminis acuta</i>).....	54
4.3.3	Subacute acidosis of rumen content (SARA).....	55
4.3.4	Alkalosis of rumen content (<i>Alcalosis ingestorum ruminis</i>).....	56
4.3.5	Putrification of rumen content (<i>Putrefactio ingestorum ruminis</i>).....	57
5	Biochemical examination.....	61
5.1	Preanalytic phase.....	62
5.1.1	Sampling.....	62
5.2	Analytical phase.....	65
5.2.1	Photometric determination of biochemical parameters.....	65
5.2.2	Chemiluminescent immunometric analyzis of hormones.....	68
5.2.3	Examination of acid-base balance.....	70
5.2.4	Urine Analysis.....	71
5.3	Post-analytical phase.....	74
5.3.1	Energy profile.....	75
5.3.2	Nitrogen and protein profile.....	77
5.3.3	Enzyme and hepatic profile.....	77
5.3.4	Vitamin profile.....	78
5.3.5	Acid-base balance.....	80
5.3.6	Urinary profile.....	82
6	Mineral elements examination.....	85
6.1	Preanalytic phase.....	85
6.1.1	Sampling.....	85

6.2	Analytical phase	87
6.2.1	Sample preparation.....	87
6.2.2	Atomic absorption spectrometry (AAS).....	90
6.3	Postanalytic phase.....	95
6.3.1	Macromineral profile.....	95
6.3.2	Microelement profile	97
7	Literature.....	101
8	Appendix.....	104
