
CONTENTS

1. General statement	7
2 Research objectives	8
3 State of the art	9
3.1 Cut and cover method.....	9
3.2 Cover-Cut Method.....	9
3.3 New Austrian Tunneling Method.....	9
3.4 Shield method.....	9
3.5 Both side heading method	9
3.6 Center drift method.....	9
3.7 NTR method	10
4. Introduction to PBA Construction Methods	11
4.1 Pile-Beam-Arch(PBA) method.....	11
4.2 Construction steps of the PBA method.....	11
5. Main structure construction method of PBA station.....	12
5.1 construction of guide tunnel for start building operation of PBA elements structure	12
5.2 Construction of PBA elements structure	12
5.3 Excavation of an upper layer of the subway station and construction of the main structure.	13
5.4 Excavate the platform floor and then construct the main structure.	13
6. 3D Model simulation of construction steps of PBA method	14
6.1 Model overview.....	14
6.2 Simulation of guide tunnel excavation scheme	14
6.3 Simulation of the excavation process	15
6.4 Simulation analysis of tunnel excavation scheme	15
6.5 Comparative analysis of arch settlement	18
6.6 Comparison of surface settlement	18
6.7 Stage of small guide tunnel construction.....	19
6.8 Stage of pile and beam system construction.....	23
6.9 Stage of arch initial support.....	24
6.10 Stage of construction of the hall floor	25
6.11 Stage of platform construction	26
6.12 Summary analysis of Settlement	27
6.13 Comprehensive analysis of numerical simulation	28
7. Monitoring and Measurement Technology.....	30

7.1 Methods of monitoring.....	30
7.2 Analysis of measured sedimentation data.....	33
7.3 Analysis of the comparison between simulated and measured data.....	35
8. Control of the Surrounding Environment of PBA Method.....	39
8.1 Building and surface settlement control measures	39
8.2 Pipeline protection and reinforcement measures.....	39
9. Conclusion.....	41
