

CONTENTS

Summary – Volume II	5
Preface to Volume II	6

VOLUME I PROCESS MEASUREMENT

Part I Introduction to the Measurement and Control of Technological Processes

1 An Introduction to Measurement and Control (<i>Karel Kadlec, Jiří Macháč</i>)	
1.1 Measurement and Control Tasks – Basic Terminology and Labelling	
1.2 Process Measurement Instruments and Their Properties	
1.3 Measurement Uncertainties	
1.4 Checking the Measurement and Calibration Sensors Accuracy	
2 Measurement and Computer Data Acquisition (<i>Dušan Kopecký, Karel Kadlec</i>)	
2.1 Internet of Things and Industry 4.0	
2.2 Computers for Information and Industrial Networks	
2.3 Communication in Industrial and Information Networks	
2.4 Multifunctional Data Acquisition Systems	
2.5 Data Acquisition and Processing Software	
2.6 Conclusion	

Part II Measurement of Process Variables

3 Temperature Measurement (<i>Karel Kadlec</i>)	
3.1 Contact Temperature Sensors	
3.2 Special Thermometers	
3.3 Non-Contact Thermometers	
4 Pressure Measurement (<i>Karel Kadlec</i>)	
4.1 Hydrostatic Manometers	
4.2 Piston Pressure Gauges, Deadweight Testers	
4.3 Mechanical Pressure Gauges with Flexible Elements	
4.4 Electronic Pressure Transmitters	
4.5 Installation of Process Pressure Gauges	
4.6 Calibration of Process Pressure Gauges	
4.7 Selection of a Suitable Pressure Sensor	
5 Level Measurement (<i>Karel Kadlec</i>)	
5.1 Mechanical Level Sensor	
5.2 Hydrostatic Level Transmitters	
5.3 Electrical Level Gauges	
5.4 Thermal Level Switches	
5.5 Optical Level Sensors	
5.6 Ultrasonic Level Measurement	
5.7 Radar Level Gauges	
5.8 Radiation Level Gauges	
5.9 Selection of the Level Sensor	
6 Flow Measurement (<i>Karel Kadlec</i>)	
6.1 Terms and Definitions	
6.2 Classification of Flow Sensors	
6.3 Positive Displacement Meters	
6.4 Velocity Flowmeters	
6.5 Open Channel Flow Measurement	
6.6 Mass Flowmeters	
6.7 Calibration of Flowmeters	
6.8 Selection of a Suitable Flowmeter	
7 Heat Measurement (<i>Karel Kadlec</i>)	
7.1 Principle of Heat Meters	
7.2 Measurement of Heat Transferred by Liquid Medium	
7.3 Measurement of Heat Transferred by Steam	
7.4 Application of Heat Meters	
8 Measurement of Weight – Industrial Scales (<i>Michal Mikulec, Karel Kadlec</i>)	
8.1 Weighing Accuracy	
8.2 Load Cells	
8.3 Discontinuous Scales	

8.4	Continuous Scales	
8.5	Continuous Dosing	
9	Humidity and Moisture Measurement (Dušan Kopecký, Karel Kadlec)	
9.1	Humidity Parameters	
9.2	Humidity Measurement in Gases	
9.3	Moisture Measurement in Solids	
9.4	Application of Moisture and Humidity Analysers	
10	Composition Measurement (Tomáš Bartovský, Karel Kadlec, Pavel Kadlec)	
10.1	Introduction into Analysers	
10.2	Measurement of Liquid Mixtures Composition	
10.3	Measurement of Gas Mixtures Composition	
10.4	Sampling and Sample Treatment for Automatic Analysers	
10.5	Measurement of Solids in Gas	
10.6	Colour Measurement	
11	Sizing of Particles, Pores and Porous Materials (Jiří Štětina, Evžen Šárka, Tereza Uhlířová, Eva Gregorová, Willi Pabst, Zdeněk Bubník)	
11.1	Particle Size Measurement	
11.2	Measurement of Porosity and Pore Sizes in Materials	
11.3	Image Analysis	
	List of Abbreviations	
	Subject Index – Volume I	

VOLUME II PROCESS CONTROL

Part III Process Control

12	Short Review of Selected Terms (Miloš Kmínek)	20
12.1	The System and Its Description	20
12.2	Variables	21
12.3	Basic Relations	24
12.3.1	Transfer of Heat and Mass	24
12.3.2	Kinetics of Chemical Reactions	26
12.3.3	Heat Changes during Chemical Reactions	27
12.3.4	Kinetics of Biotechnological Processes	28
12.3.5	Physicochemical Properties of Water	29
13	Mathematical Models (Miloš Kmínek)	31
13.1	Inductive Mathematical Models in General	32
13.2	Deductive Mathematical Models in General	33
13.3	Deductive Model Creation Based on Balances	38
13.3.1	Example 1 – Mathematical Model of Heater	41
13.3.2	Example 2 – Mathematical Model of Fermentation	43
14	Simulating the Solution to Mathematical Model Equations (Miloš Kmínek)	46
14.1	Principle of Stepping Methods of Solution to Ordinary Differential Equations	46
14.2	Solution to Sample Tasks	49
14.2.1	Example 1 – Heater Simulation	49
14.2.2	Example 2 – Fermentation simulation	51
15	Introduction to Production Process Control (Miloš Kmínek)	54
15.1	Basic Concepts	54
15.2	Controlled System	58
15.2.1	What We Need to Know about the Controlled System	58
15.2.2	Classification of Controlled Systems According to Their Dynamic Behaviour	60
15.2.3	Static Characteristic of System	66
15.2.4	System Stability	66
15.3	Measuring Element	67
15.4	Actuator	68
15.4.1	General Properties of Actuators	68
15.4.2	Control Valves and Butterfly Valves	69
15.4.3	Pumps as Control Devices	74
15.5	Continuous Control	74
15.5.1	Continuous Controller Structure and Functions	74
15.5.2	Control Process, Control Quality	77
15.5.3	Selecting the Controller Type	79

15.5.4	Practical Procedures for Setting Controller Parameters.....	81
15.5.4.1	Methods for Setting the Controller for a Static System.....	85
15.5.4.2	Methods for Setting the Controller for Astatic Systems.....	89
15.5.4.3	Controllers with Two Degrees of Freedom	90
15.5.4.4	Principles of Intuitive Tuning of Controller Parameters.....	91
15.5.5	Branched Control Circuits.....	92
15.5.6	Example 3 – Simulation of a Simple Control Loop	99
15.6	Two-Position and Three-Position Controls	102
15.7	Digital Control.....	105
15.7.1	Digital Signal Processing	105
15.7.2	Digital Controllers.....	110
15.7.3	Adaptive Control.....	115
15.7.4	Automatic Setting of PID Controllers (auto-tuning)	116
15.7.5	Nonlinear System Control.....	117
15.7.6	Compact Controllers	119
16	Logic Control (<i>Iva Nachtigalová, Miloš Kmínek</i>).....	122
16.1	Mathematical Principles of Logic Control	123
16.1.1	Basic Logic Functions	123
16.1.2	Methods for Defining Logic Functions	125
16.1.3	Converting Logic Function Definitions into an Algebraic Expression.....	127
16.1.4	Minimization of Logic Functions	129
16.2	Logic Control Types	131
16.2.1	Combinatory Logic Circuits.....	131
16.2.1.1	Design Procedure	131
16.2.1.2	Example 4 – Combinatory Logic Circuit	132
16.2.2	Sequential Logic Circuits.....	133
16.2.2.1	Bistable Flip-Flop Circuits.....	134
16.2.2.2	Sequential Function Chart (SFC).....	135
16.2.2.3	Design Procedure	136
16.2.2.4	Example 5 – Sequential Logic Circuit.....	138
16.3	Logic Control Implementation	140
16.3.1	Programmable Logic Controllers (PLCs)	140
16.3.1.1	Internal Structure and Traditional Design.....	142
16.3.1.2	Unconventional Designs.....	145
16.3.1.3	Operating Modes and Execution of the User Program	147
16.3.1.4	Performance	148
16.3.1.5	Programming.....	148
16.3.1.6	Example 6 – Developing User Program for PLC.....	153
17	Batch Process Control in Industrial Practice (<i>Vlastimil Braun</i>)	155
17.1	Introduction into Batch Production	155
17.2	Standards for Batch Production Control.....	156
17.3	Batch Production Control.....	158
17.3.1	Controlling Manufacture of More Products	161
17.3.2	Controlling Production along More Technological Lines.....	161
17.3.3	Batch System for Batch Production Control (Example)	162
17.4	IT Functions for Batch Production	164
17.4.1	Production Planning, Allocation and Control	164
17.4.2	Human Resource Control	165
17.4.3	Technological Process Data Acquisition, Analysis and Archiving	165
17.4.4	Production Data Acquisition and Processing.....	166
17.4.5	Supervisory Production Management.....	167
17.4.6	Material Management.....	167
17.4.7	Process Optimization.....	167
17.4.8	Quality Management	167
17.4.9	Production Records, Protocols and Documentation	168
17.4.10	Equipment Performance Statistics	168
17.4.11	Maintenance Management Support.....	168
18	Computer Control and Information (<i>Miloš Kmínek et al.</i>)	170
18.1	Structure of Modern Computer Control Systems.....	171
18.2	Functions and Benefits of Computer Control	173
18.3	Control Computer Structure and Operation.....	174
18.3.1	PAC Structure and Working.....	174
18.3.2	Industrial PC Structure and Operation	175

18.4	Communication with Operator	176
18.4.1	Communication with Operator – Basic Functions.....	178
18.4.2	Communication with Operator – Structure.....	178
18.4.3	Communication with Operator – Contents.....	179
18.4.4	Communication with Operator – Programming	180
18.4.5	Graphic Design Principles of Window Contents	181
18.4.6	Situational Awareness.....	182
18.5	Safety of Technological Process Computer Control.....	182
18.5.1	Safety of the Technological Process	183
18.5.2	Control System Reliability.....	184
18.5.3	Safety of Control System Installation	184
18.6	Computer Control System Design and Implementation.....	185
18.7	Examples of Process Control Systems and Their Architecture.....	187
18.7.1	Siemens Systems of Control.....	187
18.7.2	TECO Systems of Control	189
19	Modern Methods of Control (Miloš Kmínek, Jaromír Kukal, Pavel Hrnčířik, Jan Mareš)	194
19.1	Fuzzy Sets in Control.....	195
19.1.1	Basic Terms and Operations	195
19.1.2	Fuzzification.....	197
19.1.3	Fuzzy Rules	198
19.1.4	Defuzzification.....	198
19.1.5	Using Fuzzy Approach in Process Control.....	199
19.1.6	Fuzzy Control	200
19.1.7	Synthesis of Fuzzy Controller with Two Inputs – Example	201
19.2	Artificial Neural Network (ANN)	204
19.2.1	ANN Concept	204
19.2.2	General Three-Layer ANN Model	205
19.2.3	Multi-Layer Perceptron	206
19.2.4	Radial Basis Function (RBF)	207
19.2.5	ANN is a Versatile Approximation	208
19.2.6	Competitive Models of the Same Structure.....	208
19.2.7	ANN Learning Methods.....	209
19.2.8	Applicability of ANN to Process Control	211
19.3	Knowledge-Based Control	212
19.3.1	Direct Knowledge-Based Control Systems.....	214
19.3.2	Supervisory Knowledge-Based Control Systems.....	215
19.3.3	Knowledge-Based Control at the Laboratory Scale.....	216
19.3.4	Knowledge-Based Control in Industrial Practice.....	217
19.4	Predictive Control	219
19.4.1	Generalized Predictive Control (GPC).....	220
19.4.2	Penalty Function	220
19.4.3	Penalty Function Minimisation	222
19.4.4	Obtaining a Predictive Model Using the Inverse Matrix Method	223
19.4.5	Control Algorithm.....	224
20	Computer Simulations of Chemical, Food Industrial and other Production Operations (Jiří Hloska)	226
20.1	Automation of Industrial Operations.....	226
20.1.1	Discrete Simulation	226
20.1.2	Simulation of Food Industrial Operations Using <i>SW Plant Simulation</i> and the <i>Brewing Library</i>	227
20.2	Simulation Models of Food Industrial Operations	227
20.3	Simulation of Brewery Operation - Example.....	228
20.4	Future Development.....	230
20.5	Conclusion	231
Part IV Laboratory and Industrial Applications of Process Measurement and Control		
21	Measurement and Control of Model and Laboratory Stations.....	232
21.1	Control of Pilot Brewery at UCT Prague (Miloš Kmínek, Iva Nachtigalová, Pavel Dostálek).....	232
21.1.1	Introduction	232
21.1.2	Beer Brewing Technology in General.....	233
21.1.2.1	Mashing-in and Addition of Hot Water.....	233
21.1.2.2	Mashing.....	234
21.1.2.3	Lautering and Sparging.....	234

21.1.2.4	Wort Boiling	234
21.1.2.5	Cooling	235
21.1.2.6	Fermentation and Maturation	235
21.1.3	Brewing Technology at the Pilot Brewery UCT Prague	235
21.1.4	Control System	238
21.1.5	Control Algorithms	240
21.1.6	Visualisation	240
21.1.7	Use of the Unit	241
21.2	Automation of Micromaltery, UCT Prague (<i>Miloš Kmínek, Pavel Dostálek</i>)	242
21.2.1	Introduction	242
21.2.2	Malting Technology	243
21.2.2.1	Steeping	243
21.2.2.2	Germination	245
21.2.2.3	Kilning	247
21.3	Laboratory Film Evaporator (<i>Miloš Kmínek</i>)	249
21.3.1	Description of Evaporator Station	249
21.3.2	Process Control	249
21.3.3	Utilization	252
21.4	Continuous Chromatographic Separation (<i>Svatopluk Henke, Simona Gillarová</i>)	253
21.4.1	Basic Characteristics of the KCHS-SMB-8-ND Station	253
21.4.2	Description of Continuous Chromatographic Separation	254
21.4.3	Control	257
21.4.4	Applications	260
21.5	Membrane Separation (<i>Svatopluk Henke, Andrea Hinková, Simona Gillarová</i>)	262
21.5.1	Principle of Membrane Separation	262
21.5.2	Process Control	264
21.5.3	Applications	267
21.6	Bioprocess Control Laboratory (<i>Jan Náhlík, † Jaroslav Vovsíř</i>)	269
21.6.1	Biotechnological Processes	269
21.6.2	Bioprocess Control	269
21.6.3	Instrumentation Equipment	271
21.6.4	Control System	273
21.6.5	Communication with the Operator	276
21.6.6	Control Algorithms	277
21.6.6.1	Software Sensors	277
21.6.6.2	Classification of Metabolic States	278
21.6.6.3	Control	279
21.6.7	Conclusion	280
21.7	Design of Mechanically Stirred Bioreactors and Exploitation of Control Software for Aerobic Cultivation of Microbial Cells (<i>Leona Paulová, Karel Schmiedberger Jr., Tony Allman, Mojmír Rychtera, Miloš Kmínek</i>)	282
21.7.1	Introduction	282
21.7.2	Description of Construction of Mechanically Stirred Bioreactor, Its Control System and Data Collection for Aerobic Microbial Processes	282
21.7.3	Using Mechanically Stirred Bioreactor and Its Control System for Production of Recombinant Proteins Using <i>Pichia pastoris</i> Host System – Practical Example	288
21.7.4	Example of Controlled Cultivation of the Yeast Culture of <i>Saccharomyces cerevisiae</i>	290
21.7.5	Conclusion	291
21.8	Multifunctional Process Measurement and Control Teaching System (<i>Karel Kadlec</i>)	294
21.8.1	Introduction	294
21.8.2	Technical Description of the System	294
21.8.3	Computer Control of the Multifunction Station	297
21.8.4	Multifunction System Properties	298
21.8.5	Summary	298
21.9	Stations for Teaching Measurement and Control of Process Variables (<i>Karel Kadlec</i>)	300
21.9.1	Introduction	300
21.9.2	Description of Teaching Stations	300
21.9.2.1	Level Measurement and Control	301
21.9.2.2	Flow Measurement and Control	301
21.9.2.3	Pressure Measurement and Control	302
21.9.2.4	Temperature Measurement and Control	302
21.9.3	Control Software	302
21.9.4	Laboratory Tasks	303

21.10	Teaching Stations for Advanced Control of Multivariable Systems and a Mobile Measurement and Control Teaching Station (<i>Iva Nachtigalová</i>)	306
21.10.1	Introduction	306
21.10.2	Stations for Advanced Control of Multivariable Systems	306
21.10.2.1	Vacuum Degassing (Level/Pressure System)	307
21.10.2.2	Continuous Stirred Tank with Indirect Heating (Level/Temperature System)	309
21.10.3	Mobile Station for Level Measurement and Control	311
21.11	Continuous Homogenisation, Pasteurisation and Sterilisation (<i>Jiří Štětina</i>)	314
21.11.1	Basic Description of the Technology	314
21.11.2	Description of Equipment and Process Control of Pasteurisation	315
21.11.3	Applications	318
21.12	Demonstration of Image Analysis Applications in the Food Industry (<i>Anna Korbářová</i>)	320
21.12.1	Surface Defect Finding	320
21.12.2	Recognition, Position Finding, Counting	321
21.12.3	Tolerance Measurement and Checking	322
21.12.4	Colour and Shape Identification	322
21.12.5	Text and Code Reading and Verification	323
21.12.6	LabVIEW Application Including Image Processing	324
21.13	Characterization of Ceramic Materials via Image Analysis (<i>Tereza Uhlířová, Jan Hostaša, Eva Gregorová, Willi Pabst</i>)	326
21.13.1	Dense and Porous Ceramics	326
21.13.2	Microscopic Image Analysis of Dense YAG Ceramics for Laser Applications	327
21.13.3	Microscopic Image Analysis of Porous Alumina and Mullite Ceramics for High-Temperature Thermal Insulation	329
21.13.4	Summary and Conclusion	331
21.14	Microscopic Analysis of Cement Clinker (<i>Jan Macháček, František Škvára</i>)	333
21.14.1	Cement Production	333
21.14.2	Clinker Microscopy and Image Analysis	334
21.15	Flowmeter Calibration Using Mobile Calibration Pathway (<i>Jaroslav Čadil</i>)	337
21.15.1	Flowmeter Calibration Methods	337
21.15.1.1	Volumetric Method	337
21.15.1.2	Gravimetric Method	338
21.15.2	Effects Influencing Calibration Results	339
21.15.3	Measurement Uncertainties in Flowmeter Calibration	340
22	Applications of Measurement and Control in Food Technology and Biotechnology	
22.1	Automatically Controlled Grain Mill (<i>Miloš Kmínek, Josef Příhoda, Pavel Skřivan, Karel Kadlec</i>)	342
22.1.1	Fundamentals of Grain Mill Technology	342
22.1.2	Extraction Rate Based System	344
22.1.3	Grain Mill Control Principles	346
22.1.4	Grain Cleaning Using <i>Sortex</i>	348
22.2	Regulation and Control of Production in Industrial Bakery (<i>Miloš Kmínek, Josef Příhoda</i>)	351
22.2.1	Production Technology in Industrial Bakeries	351
22.2.2	Production Line Control	353
22.3	Use of Vacuum Cooling to Control the Production of Baker's Goods (<i>Petr Čadil, † Jiří Holas, Kurt Spirig, Miloš Kmínek</i>)	356
22.3.1	Technologies to Make Baker's Goods Production More Efficient	356
22.3.2	Vacuum Cooling Control	359
22.4	Production Control of Deep Frozen Bakery Products (<i>Miloš Kmínek, Marcela Sluková</i>)	361
22.4.1	Processing Technology of Deep-Frozen Bakery Products	361
22.4.1.1	Dough Preparation	361
22.4.1.2	Baking	361
22.4.1.3	Shock Freezing of Shaped Bakery	362
22.4.2	Production Line Control	363
22.5	Automation of Lautering in Breweries (<i>Miloš Kmínek, Pavel Dostálek</i>)	367
22.5.1	Introduction	367
22.5.2	Technology of Wort Separation (Lautering) and Extraction of Spent Grain (Sparging)	367
22.5.3	Control of Lautering and Sparging	368
22.6	Smoking Process Control (<i>Miloš Kmínek, Petr Pipek</i>)	372
22.6.1	Smoking Methods	372
22.6.2	Smoker Design	374
22.6.3	Smoking Process Control	375

22.7	Milk Evaporation and Drying Process Control (<i>Miloš Kmínek, Ladislav Čurda</i>)	379
22.7.1	Description of Technology	379
22.7.2	Process Control	381
22.7.2.1	Evaporator Control	382
22.7.2.2	Dryer Control	383
22.8	Full Automation of Edible Oil Refinery (<i>Ivo Kunc, Roman Brázda, Vladimír Filip, Miloš Kmínek</i>)	385
22.8.1	General Description of Edible Oil Refining Technology	385
22.8.1.1	Bleaching for Physical Refining	386
22.8.1.2	Physical Refining (Deodorisation)	387
22.8.1.3	Winterization – Oil Dewaxing	387
22.8.2	COMPAS – Architecture of Olomouc Refinery Control System	388
22.8.3	Description of Bleaching Process Control	388
22.9	Controlling the Hydrolysis of Fats (<i>Miloš Kmínek, Vladimír Filip</i>)	391
22.9.1	Description of Technology	391
22.9.1.1	Fat Splitting	391
22.9.2	Process Control	393
22.10	Extractor Control – Control with Distributed Parameters (<i>Miloš Kmínek, Pavel Kadlec, Vladimír Ulrich</i>)	395
22.10.1	Juice Extraction Technology	395
22.10.2	Extractor Control	396
22.11	Controlling Massecuite Boiling in Batch Vacuum Pans (<i>Miloš Kmínek, Pavel Kadlec, Vladimír Ulrich</i>)	401
22.11.1	Massecuite Boiling Technology	401
22.11.2	Massecuite Boiling Control	402
22.12	On-line Monitoring of Crystal Growth and Sugar Colour Using Image Processing Techniques (<i>Bertrand Gaillac, Claire Rua</i>)	409
22.12.1	Introduction	409
22.12.2	Crystal Growth inside the Crystallizers	409
22.12.3	Colour Measurement at the Centrifuge Outlets	410
22.13	Fruit Storage under Controlled Atmospheric Conditions (<i>Miloš Kmínek, Rudolf Ševčík, Aleš Rajchl</i>)	413
22.13.1	Fruit Post Harvest Storage	413
22.13.2	Facility for Storing Apples under Controlled Atmosphere	414
22.14	Fermentation Process Control in the Tereos TTD, a.s. Distillery Dobrovice (<i>Miloš Kmínek, Mojmír Rychtera, Václav Černý</i>)	417
22.14.1	Fermentation Technology	417
22.14.2	Fermentation Process Control	418
22.15	Fermentation Process Control at LONZA Biotec s.r.o. (<i>Aleš Nesrsta, Vlastimil Braun, Mojmír Rychtera, Miroslava Čikošová, Zdena Čermáková</i>)	422
22.15.1	General Introduction to a Fermentation Process Run at LONZA Biotec s.r.o.	422
22.15.2	Biotechnology Process Control System and Its Architecture	424
22.15.3	Example of Model Unit (Feed Tank) Control	425
22.15.3.1	Examples of Operations	425
22.15.3.2	Implementation of Production Operations – Stages	426
22.15.4	Summary	427
22.16	DeltaV Control System in Pharmaceutical Production (<i>Jan Dostál</i>)	429
22.16.1	DeltaV Distributed Control System	429
22.16.1.1	System General Description and Development	429
22.16.1.2	Application Areas	429
22.16.1.3	Syncade – Smart Operation Control	430
22.16.2	DeltaV Distributed Control System in Pharmaceutical Production	430
22.16.3	Modern Trends of Control – Human-Centred Design	431
22.17	Controlling the Process of Municipal Wastewater Biological Treatment on a Laboratory and Industrial Scale (<i>Jan Bartáček, Jiří Wanner</i>)	434
22.17.1	Basic Principles of Biological Wastewater Treatment	434
22.17.1.1	Main Contaminants of Municipal Wastewater	434
22.17.1.2	Biological Wastewater Treatment	434
22.17.2	Mathematical Modelling of Biological Wastewater Treatment	436
22.17.3	Basic Principles of Process Control	437
22.17.3.1	Aeration or Air Supply	438
22.17.3.2	Activated Sludge Age and Concentration	441

22.17.3.3	Internal Recycling.....	442
22.17.3.4	External Substrate Dosing.....	443
22.17.4	Examples of Laboratory Model Control.....	443
22.17.4.1	Nitrification Process Control in SBR.....	444
22.17.4.2	Controlling Anaerobic Membrane Bioreactor.....	445
22.17.5	Measurement and Control of Industrial Activated Sludge Systems.....	445
22.17.5.1	Measuring Basic Operating Parameters in Situ.....	445
22.17.5.2	Control of Modern Activated Sludge Systems.....	448
22.18	Online Monitoring of Food/Food Material Quality Parameters (<i>Ivan Teper, Filip Teper, René Bien</i>).....	452
22.18.1	Introduction.....	452
22.18.2	Most Widely Used Technologies.....	452
22.18.2.1	NIR Technique.....	452
22.18.2.2	Microwaves.....	455
22.18.2.3	Refractometry and Density Measurements.....	455
22.19	Management of Quality Control, Health and Safety in Food Production and Distribution (<i>Rudolf Ševčík, Aleš Rajchl, Jana Coufalová, Pavel Kadlec</i>).....	457
22.19.1	Food Quality and Health Safety Control Systems.....	457
22.19.2	Digital Systems for Control Management.....	457
22.19.3	Requirements for Measuring Technology Used for Monitoring Food Quality and Health Safety.....	458
22.19.4	Measurement Technology Made by Testo s.r.o.	458
22.19.4.1	Thermometers.....	458
22.19.4.2	pH meters.....	459
22.19.4.3	Fryer Oil Tester.....	459
22.19.4.4	Dataloggers.....	460
22.19.4.5	Measured Data Monitoring System/Radio Datalogger System.....	461
22.20	Using Dataloggers for Process and Equipment Validation (<i>Jan Svoboda</i>).....	462
22.20.1	E-val Pro Wired Thermal Validation System.....	462
22.20.2	Wireless Dataloggers of <i>TrackSense Pro Product Line</i>	462
22.21	<i>Simatic S7-1500</i> Controls the Most Modern Czech Bakery (<i>Johana Hrabalová</i>).....	465
22.21.1	Introduction.....	465
22.21.2	Production of Sourdough Bread and Small Bakery Products.....	465
22.21.3	Industrial Bakery and Inventory Control.....	465
22.21.4	Fermentation Technology Control.....	467
22.21.5	Control of Kneading.....	468
22.21.6	Control of Dough Shaping, Baking and Dispatch.....	469
22.21.7	Conclusion.....	470
23	Application of Measurement and Control in Chemical and Other Productions	471
23.1	Rectification Column Control (<i>Josef Pašek</i>).....	471
23.1.1	What Is Rectification and What Equipment Is Used for It.....	471
23.1.1.1	What Is It – Rectification?.....	471
23.1.1.2	Plate Columns vs. Packed Columns.....	472
23.1.1.3	Rectification Efficiency and Theoretical Stage.....	473
23.1.1.4	Designing Rectification Columns.....	474
23.1.2	Control of Rectification Columns.....	474
23.1.2.1	Standard Equipment of a Rectification Column.....	474
23.1.2.2	Principles of Continuous Column Control.....	476
23.1.2.3	Control of Pressure in Columns.....	478
23.1.2.4	Rectification with Partial Vapour Condensation.....	479
23.1.2.5	Column Control at a Very Low Proportion of Distillation Residue.....	480
23.1.2.6	Control of Rectification Column of Indistinct Temperature Profile.....	481
23.1.2.7	Control of a Continuous Vacuum Rectification Column – Specification.....	482
23.1.2.8	Control of Batch Rectification Column.....	484
23.1.2.9	Continuous Rectification of a Mixture Using a Series of Columns.....	486
23.2	Evaporator with Mechanical Vapour Recompression (<i>Josef Pašek</i>).....	487
23.2.1	Introduction.....	487
23.2.2	Control of Evaporator with Waste Water Recompression by Turboblower.....	489
23.3	Computer System Controlled Laboratory Rectification Column (<i>František Hovorka</i>).....	492
23.3.1	Rectification Column Description.....	492
23.3.2	Rectification Column Control System.....	492
23.3.3	Column Operation at Total Reflux Ratio.....	496

23.4	Synthesis of Butyl Acetate by Reactive Distillation (<i>Jiří Haníka, Jiří Kolena, Miloš Kmínek</i>)	499
23.4.1	Principle of Reactive Distillation.....	499
23.4.2	Description of Butyl Acetate Production Technology.....	499
23.4.3	Process Control	500
23.5	Thymol Hydrogenation in Continuous Trickle Bed Reactor (<i>Jiří Haníka, Jozef Dudáš, Miloš Kmínek</i>).....	504
23.5.1	Principle of Thymol Hydrogenation in Continuous Trickle Bed Reactor.....	504
23.5.2	Description of Thymol Hydrogenation Technology	505
23.5.3	Process Control	506
23.6	Laboratory Unit for Catalytic Hydrogenation of Petroleum Middle Distillates and Alternative Raw Materials (<i>Daniel Maxa</i>).....	509
23.6.1	Basic Description of Hydrotreating Technology	509
23.6.2	Basic Strategy of Process Control.....	511
23.7	Propylene Oxidation Feed Control in Acrylic Acid Production (<i>Jan Nájemník</i>)	514
23.7.1	Description of Acrylic Acid Production Technology	514
23.7.2	Process Control Strategy	515
23.7.3	Description of Reactor Feed Preparation Control	515
23.8	Production of Lime Saltpeter (<i>František Hovorka, Martin Hubička</i>)	519
23.8.1	Introduction	519
23.8.2	Measurement and Control in the Lime Saltpeter Production Plant.....	521
23.8.2.1	Measurement of Operating Parameters	522
23.8.2.2	Lime Saltpeter Production Control	522
23.8.2.3	Granulate Cooling Control.....	522
23.9	Bisphenol A Production (<i>Jiří Karásek, František Hovorka</i>)	525
23.9.1	Introduction	525
23.9.2	Technology Description	526
23.9.2.1	Synthesis	526
23.9.2.2	Rectification	527
23.9.2.3	Absolutization.....	527
23.9.2.4	Granulation (Flaking)	527
23.9.3	Production Control	527
23.10	Controlling the Process of Tablet Production by Coating (<i>Aleš Kovařík, Jindřich Kubíček, Vlastimil Braun</i>)	530
23.10.1	Tablet Coating Technology.....	530
23.10.1.1	Coating Machine (Coater)	530
23.10.1.2	Production of Coated Tablets.....	531
23.10.1.3	Processes of Tablet Coating Formation Using Film Forming Substances.....	531
23.10.2	Process Control System of Coater Coating Machine.....	532
23.10.2.1	Electric Equipment	532
23.10.2.2	Production Automation and Control.....	533
23.10.2.3	Designing a Coating Machine Control System	534
23.11	Lyophilisation Process Control (<i>Ladislav Čurda, Petr Grund</i>).....	537
23.11.1	Principle of Freeze Drying	537
23.11.1.1	Particular Stages of the Lyophilisation Process	537
23.11.1.2	Freeze-Drying Equipment	538
23.11.1.3	Measurement and Sensors in Freeze-Drying Process	539
23.11.2	Freeze-Drying Control in Ingredia, s.r.o. (Example)	540
23.11.3	Freeze-Drying Applications, Pros and Cons.....	542
23.12	Measurement and Control of the Water-Aniline Interface Using a Guided Wave Radar Level Gauge (<i>Petr Komp, Radim Frömmer</i>)	544
23.12.1	Measurement Principle.....	544
23.12.2	Typical Applications.....	544
23.12.3	Special Application: Measurement of Water-Aniline Interface	545
23.12.4	Controlling the Position of the Water-Aniline Interface.....	546
23.13	Using Thermography to Study Power Density Fields in All-Electric Glass Melting Tank Furnaces (<i>Stanislav Kasa, Antonín Lisý</i>).....	548
23.13.1	Glass Melting in All-Electric Tank Furnaces.....	548
23.13.2	Determining Power Densities among Electrodes in the Furnace Melting Tank.....	549
23.13.2.1	Mathematical Model of Power Density Distribution in the Furnace Melting Tank.....	549
23.13.2.2	Physical Models of Power Density Distribution in the Furnace Melting Tank	549

23.13.2.3	Application of Thermography for Determining the Temperature Distribution and Power Densities between Electrodes in the Furnace Melting Tank Model	550
23.13.3	Conclusion	554
23.14	Flat Glass Production Using FLOAT Technology (<i>Vlastimil Hotař, František Novotný</i>)	555
23.14.1	Flat Glass Production	555
23.14.2	FLOAT Technology	555
23.14.3	Flat Glass Processing and Treatment	557
23.14.4	Measuring Technological Parameters	557
23.14.4.1	Temperature Measurement	557
23.14.4.2	Surface Height Measurements	559
23.14.4.3	Glass Thickness Measurement	559
23.14.4.4	Inspection of Glass Quality	559
23.14.4.5	Other Sensors	561
23.14.5	Production Process Control	561
23.15	Production of Plastic Films by Slot-Die Extrusion (<i>Antonín Kuta</i>)	565
23.15.1	Cast Film Extrusion Technology	565
23.15.2	Contactless Measurement of Film Thickness	566
23.15.3	Process Control	568
23.16	Controlling the Tyre Compound Mixing Process (<i>Jiří Brejcha, Miloš Knínek</i>)	570
23.16.1	Introduction – Tyre Manufacturing	570
23.16.2	Compounding and Mixing	570
23.16.3	Mixing Process Control	572
23.16.3.1	Raw Material Weighing and Dosing Control	575
23.16.3.2	Control of Operating Parameters of Banbury Mixer in Operation	575
23.17	Control System for Plasma Spraying Technology (Plasma Torch) (<i>Václav Březina, Miloš Knínek</i>)	577
23.17.1	Plasma Torch	577
23.17.1.1	Technology of Hybrid Stabilized Arc	577
23.17.1.2	System Basic Components	579
23.17.2	Control Unit	579
23.17.3	Control Principles	580
23.17.3.1	Controlling the Torch Water System	582
23.18	Controlled Heat Transfer Station Using CHP Units in a Local Distribution Network of Power and Heat (<i>Petr Machač</i>)	583
23.18.1	CHP Units	583
23.18.2	Description of Technology	583
23.18.3	Controlling Operation of Heat Transfer Station	585
23.18.3.1	Heat Delivery Control Mode	586
23.18.3.2	Summer Control Mode	586
23.18.3.3	Winter Control Mode	586
23.18.3.4	Heat Delivery + Summer Control Mode	586
23.18.3.5	Heat Delivery + Winter Control Mode	587
23.19	Instrumentation for Energy Monitoring (<i>David Slepíčka, Karel Kadlec</i>)	589
23.19.1	Measurements in Steam Circuits	589
23.19.1.1	Boiler Room	590
23.19.1.2	Distribution Network	591
23.19.1.3	End User	591
23.19.1.4	Return Condensate Line	591
23.19.1.5	Fuel, Air and Flue Gases	592
23.19.2	Compressed Air Measurement Systems	592
23.19.2.1	Compressor Efficiency	594
23.19.2.2	System Balancing and Leaks	595
23.19.2.3	Return on Investment Calculation – Example	596
23.19.3	Endress+Hauser Instrumentation	596
23.20	Application of Mass Flowmeters for Fluid Dosage (<i>Martin Niederle, Karel Kadlec</i>)	598
23.20.1	Accurate Measurement of Gas Quantity and Its Dosage into Chemical Reactors	598
23.20.2	Aeration of Ice Cream Using a Thermal Mass Flowmeter	599

23.20.3	Dosing Gases into Bioreactors	601
23.20.4	Dosing of Additives by Mass Flowmeter.....	601
23.21	Thermographic Aerial Inspection of Pipelines with Unmanned Aircraft (<i>Jan Sova, Petr Lněnička, Anna Korbářová</i>)	604
23.21.1	Introduction	604
23.21.2	Terminology	604
23.21.3	Peculiarities of Using an IR Camera with an Unmanned Aircraft	605
23.21.4	Applications of Aerial Thermography	607
23.21.5	Legislation Applicable to Unmanned Aircraft Operation	608
23.22	Anton Paar Process Systems in Chemical, Food and Biochemical Industries (<i>Karel Voldřich, Jaroslav Pól, Karel Kadlec</i>)	610
23.22.1	Density and Concentration.....	610
23.22.1.1	Density and Sound Velocity Sensor SPRn	610
23.22.1.2	Vibrating Densitometers	611
23.22.2	Viscosity Measurement.....	613
23.22.2.1	Viscosity Sensor L-Vis 510.....	613
23.22.2.2	SVM™ 3001 Stabinger Viscometer™	614
23.22.3	Propol Process Polarimeter	615
23.22.4	Measurement of Dissolved CO ₂ in Beverages by the Carbo Sensor	616
23.22.5	Measurement of Oxygen Concentration in Beverages by Oxy 510 Sensor.....	617
23.23	Advanced Control Systems for Continuous Industrial Dryers (<i>Antonín Lízr</i>).....	619
23.23.1	Introduction	619
23.23.2	Convention Control of Industrial Dryers	619
23.23.3	Advanced Control Systems of Continuous Industrial Dryers	620
23.23.4	ACS of Ceramic Granulate Spray Dryer.....	620
23.23.5	ACS for Belt Dryer of Kaolin Noodles	622
23.23.6	ACS for Rotary Dryer for Crushed Bentonite.....	623
23.23.7	ACS for Spray Dryer of Powdered Dairy Products.....	624
23.23.8	ACS for Belt Dryer of Egg Cartons.....	625
23.23.9	ACS Visualisation and Communication System	626
23.24	Integration of Production Control Systems as the Basis for Introducing Industry 4.0 (<i>Radim Novotný, Miroslav Dub</i>).....	628
23.24.1	Introduction	628
23.24.2	Integration of Control Systems.....	629
23.24.2.1	Basic Concepts of Integration	629
23.24.2.2	Integration of Batch and Continuous Process Control Systems.....	630
23.24.2.3	Integration Issues of Discrete Process Control Systems	631
23.24.2.4	Integration Issues of Control Systems of Dedicated Production Equipment.....	632
23.24.3	Other Aspects of Integration	632
23.24.3.1	Aspects of Legislation	632
23.24.3.2	Customer's Cooperation with Manufacturer and Project Bidding Stage	633
23.24.4	Conclusion	633
23.25	New Digital Ecosystem, Plantweb, of the Emerson Company (<i>Petr Horák</i>)	634
23.25.1	Introduction	634
23.25.2	Emerson Pervasive Sensing™ Strategy	635
23.25.2.1	Wireless Corrosion Monitoring	635
23.25.2.2	Monitoring Wireless Medium Voltage Systems	636
23.25.2.3	Wireless Gas Monitoring.....	636
23.25.2.4	Non-intrusive Wireless Gas Monitoring.....	636
23.25.2.5	Wireless Power Transducer	637
23.25.2.6	Wireless Pressure Transducers.....	637
23.25.3	Secure First Mile™ Architecture	638
23.25.4	Plantweb Insight™ Software.....	639
23.25.5	Plantweb Advisor™ Software	640
23.25.6	Platform AMS ARES™	641
23.25.7	Always Mobile™	641
23.25.8	Connected Services™	642
