

# CONTENTS – VOLUME 1

## PREFACE

## KEYNOTES

<b>A systematic definition of ergonomics</b> <i>Martin Helander</i>	3
<b>Ageing and human skill: a tribute to Alan Welford</b> <i>Patrick Rabbitt</i>	6
<b>Ergonomics, quality and continuous improvement – Some current issues</b> <i>Jörgen Eklund</i>	10
<b>The Scandinavian approach in participatory ergonomics</b> <i>Per Langaa Jensen</i>	13

## 1 ORGANIZATIONAL DESIGN AND MANAGEMENT

### 1.1 MANAGEMENT AND EVALUATION OF ORGANIZATIONAL CHANGES

<b>Simulation game – Anthropocentric production planning</b> <i>Alstrup L, Kofoed LB</i>	19
<b>Kaizen based suggestion schemes – A tool for participation and improvement of working conditions and quality</b> <i>Axelsson JRC</i>	22
<b>Decentralized organizations – White-collar workers as production support</b> <i>Berglund M</i>	25
<b>Evaluation of "Office of the future". Presentation of a research project financed by the Swedish Council for Work Life Research</b> <i>Berns T, Klusell L, Rosenblad T</i>	28
<b>Power and leadership</b> <i>Buhanist P, Immonen S</i>	31
<b>Ergonomic contribution to organisational changes: a bottom-up approach case study in a process industry</b> <i>Carballeda G, Daniellou F</i>	34
<b>A case study on how to train and coach company instructors, and on how to make them sensitive to accident prevention in the field of goods handling</b> <i>Claessens L</i>	37
<b>Multi-level change – the case of Sweden Post</b> <i>Edström A, Abrahamson C</i>	40

<b>Checklist as a tool for evaluating physical environment at hospital wards</b> <i>Engkvist I-L, Hagberg M, Wigaeus Hjelm E, Menckel E, Ekenvall L, PROSA Study Group</i>	43
<b>Participative reintegration of maintenance tasks into production areas</b> <i>Flachsenberg U, Wimmer R</i>	46
<b>Simulation games – the state of the art and the future</b> <i>Forssén-Nyberg M</i>	49
<b>The conceptual and practical transformation of facts into requirements</b> <i>Gallaway GR</i>	52
<b>Towards new ways of action – a case study</b> <i>Haavisto T</i>	55
<b>Making sense of organisational innovations. A cultural interpretation of improvement practices in two Swedish companies</b> <i>Holmberg R</i>	58
<b>Organisational change philosophies: isolated models or complementary strategies?</b> <i>Hägerfors A, Styhre A</i>	61
<b>Leadership and communication in managing change</b> <i>Immonen S, Buharist P</i>	64
<b>Effects on quality of working life and economic factors using learning strategies for change</b> <i>Ingelgård A, Norrgren F</i>	67
<b>Helping managers to find a better compromise between coherence and relevance: an intervention in an industrial project</b> <i>Jackson M, Thibault JF, Daniellou F</i>	70
<b>Ergonomic information deployment for manufacturing systems design</b> <i>Jasiak AE</i>	73
<b>Organizational culture and organizational development: a case study in process industry</b> <i>Järvenpää E, Eloranta E</i>	76
<b>Change processes and their influence on the working environment</b> <i>Karlton J</i>	79
<b>Leadership and vision in a change process</b> <i>Kosonen K</i>	82
<b>Development of modular procedures for a Total-Quality-Management-System for enterprise-specific vocational trainings</b> <i>Krings K, Seiwert G, Flachsenberg U</i>	85
<b>Reengineering the company - a framework for avoiding major problems</b> <i>Lanning H</i>	88
<b>Creating a shared vision in a company group by benchmarking</b> <i>Pahkala S</i>	91
<b>How to develop team-based measurement systems in offices and administration</b> <i>Pankakoski M, Koivula A</i>	94
<b>Effective reengineering procedures to implement self-directed work teams</b> <i>Ruhnau J</i>	97

<b>Developing administrative work process in a service organization with the simulation game</b> <i>Ruohomäki V</i>	100
<b>The evaluation of change projects</b> <i>Salminen A</i>	103
<b>A comparison between changes in industry in the U.S. and South Africa</b> <i>Scott PA, Kleiner BM</i>	106
<b>Workplace safety measures – what can we say about what works?</b> <i>Shannon HS, Guastello S</i>	109
<b>Evaluating macro-ergonomic intervention through perception survey</b> <i>Simard M</i>	112
<b>Tailored simulation games for business process development; comparison of two cases</b> <i>Smeds R</i>	115
<b>Capturing organisational requirements in the development of military systems</b> <i>Strain JD</i>	118
<b>Evaluating intervention outcomes through experimental analysis of behavior</b> <i>Sulzer-Azaroff B</i>	121
<b>Project control with forward planning</b> <i>Teltumbde A</i>	124
<b>Learning to work in networks in subcontracting companies</b> <i>Toiviainen H</i>	127
<b>A Swedish industrial research program "Co-operative for optimization of industrial production systems regarding productivity and ergonomics" (COPE). Presentation of the program and the first case study</b> <i>Winkel J, Engström T, Forsman M, Hansson G-Å, Johansson Hanse J, Kadefors R, Laring J, Mathiassen SE, Medbo L, Ohlsson K, Petersson NF, Skerfving S, Sundin A</i>	130
<b>Contents and change demands of managers' work</b> <i>Ylitalo J</i>	133
<b>Simulation aided planning game for the redesign of assembly structures</b> <i>Zülch G, Jonsson U, Rinn A</i>	136

## 1.2 DESIGN AND ORGANIZATION OF PRODUCTION SYSTEMS

<b>Cooperative work: attempt to develop an analysis method in ergonomics</b> <i>Barthe B, Quéinnec Y</i>	141
<b>Design and display of control information to control automated assembly production</b> <i>Bishu RR</i>	144
<b>Virtual assembly planning</b> <i>Bullinger HJ, Richter M, Heger R</i>	147
<b>The use of quality management methods in developing network of enterprises</b> <i>Carayon P, Coujard J-L, Tarbes J</i>	150
<b>Concurrent engineering in practice: towards a typology of cross-functional integration</b> <i>Couchman PK, Badham R, Zanko M</i>	153

<b>Quality, like beauty, is in the eye of the beholder</b> <i>Day MC</i>	156
<b>A model balancing the flexibility in computer integrated manufacturing with low cost</b> <i>Dizdar EN, Keskinilic I, Erol Y, Kurt M</i>	159
<b>An ergonomic approach for use of robots in flexible manufacturing systems</b> <i>Dizdar EN, Kurt M, Sisman A</i>	162
<b>The organizational ergonomics model of concurrent engineering: a revised model for the electronics industry</b> <i>Duffy VG, Salvendy G</i>	165
<b>The use of level of automation as a means of alleviating out-of-the-loop performance problems: a taxonomy and empirical analysis</b> <i>Endsley MR, Kaber DB</i>	168
<b>Empirical analysis and assessment of automotive assembly work: an analysis procedure for work efficiency and ergonomic aspects</b> <i>Engström T, Medbo L</i>	171
<b>Meeting future requirements for planning and production</b> <i>Eversheim W, Haufe A, Kölscheid W, Walz M</i>	174
<b>Natural GOMS language for assembly: a manual assembly time prediction model</b> <i>Fish LA, Helander MG, Drury CG</i>	177
<b>Ergonomics oriented to processes becomes a tool for continuous improvement</b> <i>Getty RL, Cohen JA</i>	180
<b>Productivity enhancements using ergonomics methodology: a case study of train drivers</b> <i>Goonetilleke RS, Shih HM, So RHY</i>	183
<b>Inspection training: selection of the appropriate training delivery system</b> <i>Gramopadhye AK, Harper M</i>	186
<b>Retrospective approach in organizational design and management</b> <i>Hajnal CA, Taveira AD</i>	189
<b>Human centered development of information systems and decision aids in advanced air traffic management and flight management systems</b> <i>Hansman RJ, Vakil SS</i>	192
<b>Human factors in the HIPS assembly system concept</b> <i>Heilala J, Voho P</i>	196
<b>Observations, diaries and communication networks revealing the true nature of managers' jobs</b> <i>Immonen S, Järvenpää E</i>	199
<b>Level of automation and adaptive automation effects on performance in a dynamic control task</b> <i>Kaber DB, Endsley MR</i>	202
<b>Level of automation for minimizing human out-of-the-loop performance effects on quality</b> <i>Kaber DB, Endsley MR, Cassady CR</i>	205
<b>Interactive task support in Finnish assembly industry</b> <i>Kasvi J, Nieminen M, Pulkkis A, Vartiainen M</i>	208

<b>Sociotechnical systems theory as an organizing framework for both ergonomics and TQM</b> <i>Kleiner BM</i>	211
<b>Defensive reasoning and routines as obstacles for collaboration and communication. A case study of a small manufacturing company</b> <i>Kuittinen M</i>	214
<b>Utilization of working-in-groups for restructuring production processes: experiences from three countries</b> <i>Lantz A, Friedrich P</i>	217
<b>Human integrated production system</b> <i>Meriläinen O</i>	220
<b>Effectiveness of hybrid inspection in manufacturing: a laboratory study</b> <i>Mital A, Govindaraju M, Subramani B</i>	223
<b>Memory load and decision aids in inspection of silicon wafers</b> <i>Mocclair F, Gallwey TJ</i>	226
<b>Production ergonomics in car manufacturing. Evaluation of a model to achieve a good ergonomics result in existing production and in alteration work</b> <i>Munck-Ulfsfält U</i>	229
<b>Professional dyadic relationships in organisations: a method for modeling and analysis</b> <i>Nousiainen M, Järvenpää E</i>	232
<b>Intelligent strategies for quality in the human actions of industrial organizations</b> <i>Paladini EP</i>	235
<b>Quality and productivity with management of work environments</b> <i>Paladini EP</i>	238
<b>The relationship between the man and the computer: interaction, substitution or maintenance?</b> <i>Paladini EP</i>	241
<b>The preconditions for teamwork among industrial workers of different ages</b> <i>Pitkänen M, Nygård C-H, Arola H, Manka M-L, Huhtala H, Palokangas H</i>	244
<b>Work conference – a transgression tool for grouplike organization</b> <i>Pulkkis A, Vartiainen M, Laitinen M</i>	247
<b>Quality control principles and their relationships to ergonomics</b> <i>Riley MW, Bishu RR</i>	250
<b>Horizontal and vertical information flow in a functional organization in process industry</b> <i>Seppänen L, Järvenpää E, Virtaharju J</i>	253
<b>Supply chain issues in the fast-moving consumer goods industry</b> <i>Siemieniuch CE, Sinclair MA, Waddell FN</i>	256
<b>Supply chains, information, and job design - some ergonomics implications for quality</b> <i>Sinclair MA, Siemieniuch CE</i>	259
<b>Ergonomics and quality – a behavioral cybernetic analysis</b> <i>Smith TJ</i>	262
<b>A method for job design in concurrent engineering</b> <i>Stahl J, Luczak H</i>	265

<b>TEAM – An approach for optimization of hybrid automation</b> <i>Stahre J, Johansson A, Axelsson S</i>	268
<b>Supervisors' views of their crews and the level of team work in paper industry</b> <i>Teperi A-M</i>	271
<b>Dynamic relationships – another side of team performance</b> <i>Tuominen E</i>	274
<b>Complementary interaction of humans and machines in highly automated production systems – KOMPASS and TEAM</b> <i>Waefler T, Johansson A, Grote G, Stahre J</i>	277
<b>Driver response to automated vehicle control</b> <i>Ward NJ</i>	280
<b>Collective action regulation, common task orientation, and common objectifications in advanced manufacturing systems</b> <i>Weber WG</i>	283
<b>The effects of change on communication networks in an expert organization</b> <i>Virtaharju J, Järvenpää E, Seppänen L</i>	286

## 1.3 PARTICIPATION AND TRAINING

<b>General introduction to the symposium: Aims, context, concepts, methods, practices and problems</b> <i>Abrahão J, Berthelette D, Desnoyers L, Ferreira L, Jobert G, Lacomblez M, Launis K, Leppänen A, Maggi B, Montreuil S, Patesson R, Paumès D, Teiger C, Vogel L, Wendelen E</i>	291
<b>The flexographic printing: a contribution of the work ergonomic analysis in the development and transmission of skills</b> <i>Barros C</i>	294
<b>Training and development strategies for ergonomics in the company: towards specific intervention conditions?</b> <i>Béguin P</i>	297
<b>Implementation evaluation of an occupational health and safety program</b> <i>Berthelette D, Desnoyers L, Gourde D, Authier M</i>	300
<b>Hypermedia and problem-driven learning at work</b> <i>Binder T</i>	303
<b>Formative evaluation of the implementation of a participatory ergonomics programme carried out by local occupational health team</b> <i>Bouchard P, Gilbert L, Montreuil S, Galipeau S, Patry L</i>	306
<b>Critical analysis of safety training for drivers of goods vehicles</b> <i>Bourachot E, Germain C</i>	309
<b>Why is it difficult to embed employee participation in the factory practice?</b> <i>Buhl H</i>	312
<b>The contribution of a group of workers to occupational learning</b> <i>Chatigny C, Montreuil S, Teiger C</i>	315
<b>Technology management and the participation in organizational change</b> <i>Clausen C</i>	318

<b>Studies of the connections between ergonomic work analysis and the analysis of incident situations for the training of staff representatives</b> <i>Cottura R, Gaudart C, Guyot S, Prunier S, Pueyo V, Liehrmann E</i>	321
<b>Elaboration of a detailed course programme in safety during tyre mounting: contribution of ergonomic analysis of work</b> <i>Cunha FB</i>	324
<b>Is the trade union moving from a role as negotiator towards a role as an advisor in matters of work environment?</b> <i>Daugaard G, Wissing P</i>	327
<b>Conscienceness raising, information and training in manual lifting at the hospital</b> <i>Dohogne T, Schrijvers P, Joossens J, Lahaye D</i>	330
<b>Ergonomic work analysis and knowledge of CAD operators in the garment industry</b> <i>Duarte F, Moreth B</i>	334
<b>Which involvement of trade-unionist actors in the ergonomic intervention?</b> <i>Étienne P, Négroni P, Herve JB</i>	337
<b>Workers representatives ergonomics, participative actions and changes in the management</b> <i>Étienne P, Négroni P</i>	340
<b>The maintenance activity in the tyre industry: an ergonomic approach of the decision strategies towards a training proposal</b> <i>Fernandes Torres MI</i>	343
<b>An experience of ergonomics training for union works</b> <i>Ferreira LL, Iguti AM, Donatelli S, Vezzà F, Schlithler C, Abrahão J</i>	346
<b>Learner centered training. Design of training tools in virtual reality</b> <i>Frejus M</i>	349
<b>Strategies and infrastructures for integration of occupational health and safety Management – A comparative study of Australia and Sweden</b> <i>Frick K</i>	352
<b>CHSCT expert reports: an opportunity for the CHSCT and staff to appropriate another view of work</b> <i>Guillon F</i>	355
<b>Management concepts and working conditions – in a Danish context</b> <i>Hagedorn-Rasmussen P</i>	358
<b>Towards a framework for participatory ergonomics</b> <i>Haines H, Wilson JR</i>	361
<b>A critical evaluation of bottom up strategies in participatory ergonomics</b> <i>Hasle P, Limborg HJ, Hvenegaard H, Bruvik-Hansen A</i>	364
<b>A training in weight handling based on an ergonomic work analysis</b> <i>Hertsens P</i>	367
<b>Better working environment through learning and participation in technological changes</b> <i>Jensen LP, Kofoed LB, Rosenorn TU</i>	369
<b>Cooperative work design in Austrian sheltered workshops – an action research project</b> <i>Jungwirth Ch</i>	372

<b>Integrated management of health &amp; safety and environment – perspectives for participation</b> <i>Kamp A</i>	375
<b>A design framework for cooperative telelearning</b> <i>Khalid HM, Helander MG</i>	378
<b>Beyond participation – Social influence on information technology and work environment</b> <i>Koch C</i>	381
<b>Prevention of risks from exposure to blood</b> <i>Lapeyrière S, Decelle D</i>	384
<b>Work units and coping with changes: modes of action</b> <i>Launis K, Niemelä A-L, Kantola T</i>	387
<b>Production technology, organizational characteristics, conceptual mastery of work, and job satisfaction in paper production</b> <i>Leppänen A, Teperi A-M, Tuominen E</i>	390
<b>Contribution to the analysis of quality control in cork industry</b> <i>Monarca A</i>	393
<b>Evaluation of an ergonomics training programme for VDT users</b> <i>Montreuil S, Brisson C, Punnett L</i>	396
<b>An activity theoretical approach to psychosocial work environment in work stress research</b> <i>Mäkitalo J, Launis K, Palonen J, Korhonen M</i>	399
<b>Challenge to comfortable factory: concept of ergofactory and participation</b> <i>Nagamachi M</i>	402
<b>New ways for working environment issues through participation and integration?</b> <i>Nygaard E, Pleman A, Møller N</i>	405
<b>Conception as educational practice</b> <i>Pèlegri B, Martin A, Faïta D</i>	408
<b>The role playing games as an educational tool: a cognitive approach</b> <i>Quintella S, Fialho FAP</i>	411
<b>Integrated management of OHS and environment – Consequences of the national authorities' regulatory strategies</b> <i>Rasmussen BH</i>	414
<b>Technical and pedagogical factors in participative change processes in material flow chains. A frame for ergonomic improvements in work conditions</b> <i>Rislund C, Örtengren R</i>	417
<b>Results of an investigation about the use of ergonomics by occupational risk prevention officers</b> <i>Rocher M, Chesnais M</i>	420
<b>Training and education for prevention in workplaces. A case study in the services sector</b> <i>Rulli G, Maggi B</i>	423
<b>Work analysis in a paper storehouse: the changing of skills and skills towards change</b> <i>Santos M</i>	426

<b>The effects of training on immediate and long-term skill retention in a process control task: applications to extended spaceflight</b> <i>Sauer J, Hockey G R J, Wastell D</i>	429
<b>Participative management through employee perception survey: case study</b> <i>Simard M</i>	432
<b>New technologies &amp; needs for cognitive training</b> <i>Simões A, Carvalhais J</i>	435
<b>Worker's contribution to health surveillance in the workplace: Sindnova's "risk profile"</b> <i>Stanzani C, Magnavita N, Carbone A</i>	438
<b>Who knows best? Participation at work and sociotechnical theory</b> <i>Strain JP</i>	441
<b>Preventing musculo-skeletal disorders in the firm by training people in Ergonomic Work Analysis (EWA)</b> <i>Teiger C, Frontini J-M</i>	444
<b>The subjacent theories in training programs evaluation</b> <i>Valverde CJL</i>	447
<b>A participatory ergonomic approach to the redesign of scaffolders' work</b> <i>van der Molen HF, Vink P, Urlings IJM</i>	450
<b>The process of improving productivity by worker participation</b> <i>Vink P</i>	453

## 1.4 ORGANIZATIONAL DESIGN AND QUALITY OF WORKING LIFE

<b>Concept and motivation instrumental means of operators of production information technologies</b> <i>Asherov A, Yakimchuk P</i>	459
<b>Humans in the information society – from batch processing to network computers</b> <i>Bradley G</i>	462
<b>Work organization interventions for improving quality of working life</b> <i>Carayon P, Haims MC, Suh H</i>	465
<b>Operational requirements of community ergonomics in turbulent American inner city environments</b> <i>Cohen WJ, Smith JH, Derjani Bayeh A, Smith MJ</i>	468
<b>Technology and the diffusion of community</b> <i>Dray SM, Siegel DA</i>	471
<b>A macro-logical study on the middle and senior management aspects</b> <i>Ebukuro R</i>	474
<b>Job satisfaction and life satisfaction of paced and unpaced job workers</b> <i>Gregov Lj, Manenica I, Prorokovic A</i>	477
<b>Working in the good information society</b> <i>Holm P, Ljungberg J</i>	480
<b>Forum theatre as a method for increasing awareness of social settings and as a basis for improvements</b> <i>Hägerfors A</i>	483

<b>What work conditions do to efficiency</b> <i>Ivergård T, Høijer C</i>	486
<b>Measurement of organizational culture in different cultural contexts</b> <i>Järvenpää E, Martinsuo M</i>	489
<b>The technological construction of reality: communication and information technologists as new utopians</b> <i>Keenan JJ</i>	492
<b>Cross-cultural program and project management</b> <i>Kleiner BM, Bourgeois JP, Kurstedt PS, Jones JM</i>	495
<b>Empirical studies of macroergonomics and sociotechnical systems theory</b> <i>Kleiner BM</i>	498
<b>Models of healthy work organizations</b> <i>Lim SY, Murphy LR</i>	501
<b>Assessing and promoting healthy work organizations</b> <i>Lindström K</i>	504
<b>A study on human-oriented manufacturing system (HOMS): measurement of workers' satisfaction by psychological and physiological information</b> <i>Matsunaga H, Nakazawa H</i>	507
<b>Development of the model for work humanization</b> <i>Molan M, Molan G</i>	510
<b>Characteristics of healthy work organizations</b> <i>Murphy LR, Lim S-Y</i>	513
<b>Is technology listening? – Creating requisite variety by listening</b> <i>Pihlajamäki K</i>	516
<b>Impact of distributed teams on organizational effectiveness</b> <i>Robertson MM, Endsley MR</i>	519
<b>Total quality management and quality of working life in a public sector organization</b> <i>Sainfort F, Carayon P, Smith MJ</i>	522
<b>Methods of cybernetic analysis for engineering and management of American communities</b> <i>Smith JH, Smith MJ</i>	525
<b>Informatization plus taylorist principles generate loss of quality, productivity and CTD epidemic</b> <i>Sznelwar LI, Arbix GT, Zilbovicius M</i>	528

## 1.5 SHIFT WORK

<b>Cooperative management of alertness variations during night and day shifts</b> <i>Andorre-Gruet V, Barthe B, Quéinnec Y</i>	533
<b>Effects of workload level and eight- versus twelve-hour workday duration on test battery performance</b> <i>Bendak S, Macdonald WA</i>	536
<b>Night work and alternate shift-work</b> <i>de Oliveira CRB, Moro FBP, Gomes G, Bins Ely VHM</i>	539

<b>Management of home life in shift workers</b> <i>Hiraga M</i>	542
<b>Health counselling on individual coping strategies to reduce sleepiness in shift work</b> <i>Härmä M, Kervinen V, Sallinen M, Lundelin T, Toppila M</i>	544
<b>The 2-4 hour shift phenomenon: does it exist?</b> <i>Megaw T</i>	547
<b>Can a short napbreak improve alertness in a night shift?</b> <i>Sallinen M, Härmä M, Åkerstedt T, Rosa R, Lillqvist O</i>	550

## 1.6 MISCELLANEOUS

<b>Enhancing future work places by bringing experience into design</b> <i>Aase K, Wulff IA</i>	555
<b>Topical problems of ergonomic design of production information systems at enterprises in the Ukraine</b> <i>Asherov A</i>	558
<b>Computer based monitoring of the operator reliability in shift rotation during the individual work year</b> <i>Bobko N</i>	561
<b>Cognitive function analysis: an example of human-centered re-design of a flight management system</b> <i>Boy G</i>	564
<b>Feedback control principles applied to long-term information technology use in organizations</b> <i>Caldwell BS</i>	567
<b>Ergonomics and work organization in industrial projects: a proposal to the collective feed</b> <i>da Costa Proenca RP, dos Santos N</i>	570
<b>Is it possible to take advantage of the product structure to improve shop floor ergonomics? Work characteristics of collective working in long cycle time assembly systems</b> <i>Engström T, Medbo L</i>	573
<b>Indicators of life quality at work: aspects and implications at manufacturers with ISO 9000 certificate</b> <i>França ACL</i>	576
<b>Emotional ergonomics</b> <i>Godoi CK, Fialho FAP</i>	579
<b>Changing mode of production as a challenge for communicative learning</b> <i>Heiskanen T</i>	582
<b>Problems in expanding the methods of building a networking cell: case of a Finnish engineering workshop</b> <i>Klemola S</i>	585
<b>Business process reengineering – Can a management strategy improve the working environment?</b> <i>Koch C</i>	588

<b>Learning to survive</b> <i>Koistinen K, Kangasoja J</i>	591
<b>Analysis of the effective way of teaching ideographic language by using eye movements</b> <i>Konosu T, Jimbo Y, Shigematsu J, Fukuda T</i>	594
<b>Measuring the organization's attitudes towards quality improvement with SQT – method</b> <i>Korsman U, Laukkanen S</i>	597
<b>Possibility of practical realization of a current ergonomic renewal of a production system</b> <i>Mateja BE, Pacholski LM</i>	600
<b>Macroergonomics in a complex perspective</b> <i>Milito C, Gontijo L</i>	603
<b>Alienated worker versus life quality</b> <i>Moiseichyk AE, Marqueze MA, Fialho FAP</i>	606
<b>Scheduling production with disjunctive constraints</b> <i>Noronha AB, Ribeiro CM, Ferreira Ribeiro JF, de Oliveira MMB</i>	609
<b>The evaluation of impact forces for ergonomic and quality measurables</b> <i>O'Reilly A, Kilduff HR, Bart C, Vitek M</i>	612
<b>Work requirements and work organization in an automated process control room from a Brazilian oil refinery</b> <i>Paraguay AIBB</i>	615
<b>Responsiveness to visual and auditory stimuli during experienced sleepiness</b> <i>Sallinen M, Lyytinen H, Härmä M</i>	618
<b>Institutional diagnosis in support of investigation and behavioral change in Process Management</b> <i>Saraiva LM, Juliatto D, Sabino N, Possamai O, Selig PM</i>	621
<b>Cognitive &amp; cultural ergonomics: a qualitative model to re-frame cognitive mapping and improve the success of cross-cultural collaboration</b> <i>Secter M</i>	624
<b>Enhanced communication of knowledge through information technology: the EasyKit project</b> <i>Såmmé J</i>	627
<b>The psychological contract and the shop floor workers in one Finnish textile enterprise</b> <i>Tuuli P</i>	630
<b>Self-design organization: optimising organisational structure through improvement process</b> <i>Varvakis Rados GJ, Caro MHN, Selig PM, Possamai O, Sabino N, Dias PM</i>	633
<b>AUTHOR INDEX</b>	637
