1	Introduction – Robert J. Coe	1
	Aim of the book	1
	Structure of the book	1
	Chapter features	2
	What's new in the second edition?	2
	Companion website	2
PA	<b>IRT I INTRODUCTION TO RESEARCH METHODS AND METHODOLOGIES</b>	
	IN EDUCATION	3
2	The nature of educational research – Robert J. Coe	5
	Introduction	
	Dimensions of difference: paradigms?	5
	What is a paradigm?	6
	Reconciling the different views	7
	Different aims for educational research	7
	Other ways of classifying different types of educational research	8
	Characteristics of research	9
	How is educational research different from other kinds of research?	10
	Research quality	11
	Questions for further investigation	13
	Suggested further reading	13
	References	13
		15
3	Finding your theoretical position – Michael Waring	15
	Introduction	15
	Ontology, epistemology, methodology and methods	15

## vi Contents

-	The nature of paradigms: making sense of reality Conclusion Questions for further investigation Suggested further reading References	17 20 20 20 20
PA	RT II BASIC PRINCIPLES AND PRACTICE IN CONDUCTING RESEARCH	23
4	Design of empirical research – Larry V. Hedges	25
	Introduction Problem formulation Logic of enquiry Varieties of research designs Validity considerations Questions for further investigation Suggested further reading References	25 25 26 27 30 32 32 32 32
5	Planning your research – Laura Day Ashley	34
	Why is planning important? Starting to plan early on Managing your time and resources The research proposal or plan Planning as an ongoing activity Questions for further investigation Suggested further reading References	34 34 40 41 42 42 43 43
6	Inference and interpretation in research – Robert J. Coe	44
	Introduction Confusion over 'validity' Interpretation claims Transfer claims Questions for further investigation Suggested further reading References	44 46 51 55 56 56
7	Research ethics – Martyn Hammersley	57
	Introduction What is ethics? What is <i>research</i> ethics? Ethical principles Ethics in practice Ethical regulation and ethics committees Conclusion	57 57 58 59 64 65 66

12	Grounded theory – Michael Waring	100
-	Introduction	100
	(Re)interpretations of grounded theory	100
	Locating yourself as a grounded theorist	101
	What is grounded theory?	101
	The helix model: a framework for enquiry	103
	The baset of the method and in the	103
	The heart of the matter – coding	103
	Writing a grounded theory Criticisms of grounded theory	108
	Conclusion	109 110
	Questions for further investigation	110
	Suggested further reading	110
	References	111
13	Case study research – Laura Day Ashley	114
	What is case study research?	114
	Types of case study and selection of cases	114
	Case study research and validity	115
	Example: Multiple case study of private school outreach in India	116
	Other examples of case study research	119
	Questions for further investigation Suggested further reading	120
	References	120 120
14	Secondary data – Emma Smith	122
	Introduction	122
	What is secondary data analysis?	122
	The promises of secondary data analysis	123
	Sources of secondary data	123
	The role of big data in education research	124
	Using secondary data to provide a context for small-scale research	125
	Using secondary data to monitor trends over time Conclusion	126
	Questions for further investigation	128
	Suggested further reading and resources	128 128
