

Contents

1 Rubber Technology – Introduction, Definitions, Historical Background	1
1.1 Introduction	1
1.2 The Basic Concepts of Caoutchouc	2
1.3 The Basic Concepts of Rubber and Elastomer	4
1.4 The Basic Concepts of Vulcanization	6
1.5 The History of Caoutchouc	7
1.6 References on Rubber, Definitions, History	7
1.6.1 General References on Rubber	7
1.6.2 References on Definition and Physical Properties of Caoutchouc	8
1.6.3 References on the History of Rubber	9
2 Natural Rubber (NR)	11
2.1 Sources and the Plantation Economy	11
2.2 Producers	11
2.3 Tapping of NR Latex	12
2.4 Recovery of NR from Latex	12
2.4.1 Coagulation, Processing of the Coagulate, Sheets, and Crepe	12
2.4.1.1 Smoked Sheets	13
2.4.1.2 Pale Crepe	13
2.4.1.3 Special Grades	14
2.4.2 Classification of Hevea Rubber (TSR)	15
2.4.2.1 Technically Classified NR (TC)	15
2.4.2.2 Standardized Malaysian Rubber (SMR)	16
2.4.2.3 Other Technically Specified Rubbers (TSR)	18
2.4.3 Other Types of Caoutchouc	18
2.4.3.1 Guayule	18
2.4.3.2 Kok-Saghyz	19
2.4.3.3 Ficus Elastica	19
2.4.3.4 Guttapercha and Balata	19
2.5 Structure, Composition, and Properties of Natural Rubber (NR)	19
2.5.1 Structure, Composition, and Chemical Properties of NR	19
2.5.2 Physical and Technological Properties of NR (Raw Rubber and Vulcanizates)	21
2.5.2.1 Physical Properties	21
2.5.2.2 Processibility	21
2.5.2.3 Behaviour in Solvents	22
2.6 Compounding of NR	22
2.6.1 Blends with NR	22
2.6.2 Vulcanization Chemicals	23
2.6.3 Protective Agents	24
2.6.4 Fillers	24
2.6.5 Softeners and Resins	24
2.6.6 Process Aids	25
2.7 Processing of NR	25
2.7.1 Mastication	25
2.7.2 Mixing	26
2.7.3 Further Processing	27
2.7.4 Vulcanization	27

2.8	Properties of NR Vulcanizates	28
2.8.1	Mechanical Properties	28
2.8.2	Damping Properties, Dynamic Fatigue Resistance	28
2.8.3	Heat and Aging Resistance	29
2.8.4	Low Temperature Flexibility	29
2.8.5	Compression Set	29
2.8.6	Swelling Resistance	30
2.8.7	Electrical Properties	30
2.9	Uses of NR	30
2.10	Derivatives of NR	31
2.11	Competitive Products of NR	31
2.12	References on NR	31
2.12.2	General References on NR	31
2.12.2	References on NR Sources, Production and Grades	32
2.12.3	Structure and Properties of NR	34
2.12.4	Compounding of NR	35
2.12.5	Processing of NR	36
2.12.6	Properties of NR Vulcanizates and Application	36
3	Synthetic Rubber (SR)	37
3.1	Classification of SR	37
3.2	Some Basics about the Production of SR	40
3.2.1	Monomers for SR Production	40
3.2.2	Some Basics about Polymerization	41
3.2.2.1	Free Radical Polymerization	42
3.2.2.2	Emulsion Polymerization	44
3.2.2.3	Ionic Polymerization	45
3.2.2.4	Coordination Polymerization or Metal Complex Polymerization	46
3.2.2.5	Bulk Polymerization	47
3.2.2.6	Solution Polymerization	47
3.2.2.7	Suspension Polymerization	47
3.2.3	Some Fundamentals about Polyaddition and Polycondensation Reactions	48
3.2.4	Structure of Polymers and the Determination of Structure	48
3.3	Polymers	52
3.3.1	Polybutadiene (BR)	52
3.3.1.1	General Background about BR	52
3.3.1.2	Production of BR	53
3.3.1.3	Structure of BR and its Influence on Properties	54
3.3.1.4	Compounding of BR	56
3.3.1.5	Processing of BR	56
3.3.1.6	Properties of BR Vulcanizates	56
3.3.1.7	Uses of BR	57
3.3.1.8	Competitive Materials of BR	57
3.3.2	Styrene-Butadiene Rubbers (SBR)	58
3.3.2.1	General Background about SBR	58
3.3.2.2	Production of SBR	59
3.3.2.3	Structure of SBR and its Influence on Properties	60
3.3.2.4	Compounding of SBR	62
3.3.2.5	Processing of SBR	64

3.3.2.6	Properties of SBR Vulcanizates	64
3.3.2.6.1	Properties of E-SBR Vulcanizates	64
3.3.2.6.2	Properties of L-SBR Vulcanizates	65
3.3.2.6.3	Properties of Vulcanizates from OE-SBR and Black Masterbatches	65
3.3.2.7	Uses of SBR	65
3.3.2.8	Competitive Materials of SBR	67
3.3.3	Acrylonitrile Butadiene Rubber, Nitrile Rubber (NBR)	67
3.3.3.1	General Background about NBR	67
3.3.3.2	Production of NBR	67
3.3.3.3	Structure of NBR and its Influence on Properties . . .	68
3.3.3.4	Compounding of NBR	71
3.3.3.5	Processing of NBR	73
3.3.3.6	Properties of NBR Vulcanizates	73
3.3.3.7	Hydrogenated NBR (H-NBR or ENM or HSN) . . .	76
3.3.3.8	Uses of NBR	77
3.3.3.9	Competitive Materials of NBR	78
3.3.4	Poly-2-Chlorobutadiene, Chloroprene Rubber (CR)	78
3.3.4.1	General Background about CR	78
3.3.4.2	Production of CR	78
3.3.4.3	Structure of CR and its Influence on Properties . . .	79
3.3.4.4	Compounding of CR	80
3.3.4.5	Processing of CR	82
3.3.4.6	Properties of CR Vulcanizates	82
3.3.4.7	Uses of CR	85
3.3.4.8	Competitive Materials of CR	85
3.3.5	Polyisoprene, Isoprene Rubber, Synthetic (IR)	85
3.3.5.1	General Background about IR	85
3.3.5.2	Production of IR	86
3.3.5.3	Structure of IR and its Influence on Properties . . .	86
3.3.5.4	Compounding of IR	87
3.3.5.5	Processing of IR	87
3.3.5.6	Properties of IR Vulcanizates	87
3.3.5.7	Uses of IR	88
3.3.5.8	Competitive Materials of IR	88
3.3.6	Isoprene-Isobutylene Copolymers, Butyl Rubber (IIR)	88
3.3.6.1	General Background about IIR	88
3.3.6.2	Production of IIR	88
3.3.6.3	Structure of IIR and its Influence on Properties . . .	89
3.3.6.4	Compounding of IIR	89
3.3.6.5	Processing of IIR	90
3.3.6.6	Properties of IIR Vulcanizates	91
3.3.6.7	Uses of IIR	91
3.3.6.8	Competitive Materials of IIR	91
3.3.7	Halogenated Copolymers from Isoprene and Isobutylene (CIIR and BIIR)	92
3.3.7.1	General Background about CIIR and BIIR	92
3.3.7.2	Production of CIIR and BIIR	92
3.3.7.3	Structures of CIIR and BIIR, and their Influence on Properties	92
3.3.7.4	Compounding of CIIR and BIIR	92

3.3.7.5	Processing of CIIR and BIIR	92
3.3.7.6	Properties of CIIR and BIIR Vulcanizates	92
3.3.7.7	Uses of CIIR and BIIR	93
3.3.7.8	Competitive Materials of CIIR and BIIR	93
3.3.8	Ethylene-Propylene Rubber (EPM and EPDM)	93
3.3.8.1	General Background about EPM and EPDM	93
3.3.8.2	Production of EPM and EPDM	94
3.3.8.3	Structures of EPM and EPDM, and their Influence on Properties	94
3.3.8.4	Compounding of EPM and EPDM	96
3.3.8.5	Processing of EPM and EPDM	98
3.3.8.6	Properties of EPM and EPDM Vulcanizates	98
3.3.8.7	Uses of EPM and EPDM	100
3.3.8.8	Competitive Materials of EPM and EPDM	100
3.3.9	Ethylene-Vinylacetate Copolymers (EVM)	100
3.3.9.1	General Background about EVM	100
3.3.9.2	Production of EVM	100
3.3.9.3	Structure of EVM and its Influence on Properties . . .	101
3.3.9.4	Compounding of EVM	101
3.3.9.5	Processing of EVM	102
3.3.9.6	Properties of EVM Vulcanizates	102
3.3.9.7	Uses of EVM	103
3.3.9.8	Competitive Materials of EVM	103
3.3.10	Chlorinated Polyethylene (CM)	103
3.3.10.1	General Background about CM	103
3.3.10.2	Production of CM	104
3.3.10.3	Structure of CM and its Influence on Properties . . .	104
3.3.10.4	Compounding of CM	104
3.3.10.5	Processing of CM	105
3.3.10.6	Properties of CM Vulcanizates	105
3.3.10.7	Uses of CM	105
3.3.10.8	Competitive Materials of CM	105
3.3.11	Chlorosulfonated Polyethylene (CSM)	106
3.3.11.1	General Background about CSM	106
3.3.11.2	Production of CSM	106
3.3.11.3	Structure of CSM and its Influence on Properties . . .	106
3.3.11.4	Compounding of CSM	106
3.3.11.5	Processing of CSM	107
3.3.11.6	Properties of CSM Vulcanizates	107
3.3.11.7	Uses of CSM	107
3.3.11.8	Competitive Materials of CSM	107
3.3.12	Acrylic Rubbers (ACM) and Ethylene-Acrylate-Copolymers (EAM)	107
3.3.12.1	General Background about ACM	107
3.3.12.2	Production of ACM	108
3.3.12.3	Structure of ACM and its Influence on Properties . .	109
3.3.12.4	Compounding of ACM	109
3.3.12.5	Processing of ACM	111
3.3.12.6	Properties of ACM Vulcanizates	111
3.3.12.7	Uses of ACM	112
3.3.12.8	Competitive Materials of ACM	112

3.3.12.9	Ethylene/Acrylate Copolymers (EAM)	112
3.3.13	Epichlorohydrin Rubber (CO, ECO and ETER)	113
3.3.13.1	General Background about CO, ECO, and ETER	113
3.3.13.2	Production of CO and ECO	113
3.3.13.3	Structure of CO, ECO and ETER, and its Influence on Properties	113
3.3.13.4	Compounding of CO, ECO, and ETER	114
3.3.13.5	Processing of CO, ECO, and ETER	117
3.3.13.6	Vulcanizate Properties of CO, ECO, and ETER	117
3.3.13.7	Uses of CO, ECO, and ETER	118
3.3.13.8	Competitive Products of CO, ECO, and ETER	118
3.3.14	Polypropylene Oxide Rubber (PO and GPO)	119
3.3.15	Fluoroelastomers (FKM resp. FPM, formerly CFM)	119
3.3.15.1	General Background about FKM	119
3.3.15.2	Production of FKM	120
3.3.15.3	Structure of FKM and its Influence on Properties	120
3.3.15.4	Compounding of FKM	122
3.3.15.5	Processing of FKM	123
3.3.15.6	Properties of FKM Vulcanizates	123
3.3.15.7	Uses of FKM	123
3.3.15.8	Additional Developments of Fluoro Elastomers	124
3.3.16	Polynorbornene (PNR)	126
3.3.17	Other Polymers	127
3.3.17.1	Special Butadiene Copolymers	127
3.3.17.2	Special Isoprene Copolymers	127
3.3.17.3	Dimethylbutadiene Polymers (Methyl Rubber)	128
3.3.17.4	Special Polymers from Ring-Opening Polymerizations	128
3.3.17.5	Alkylsulfide Rubbers (ASR)	128
3.3.17.6	Crosslinkable Polyethylene (X-LPE)	129
3.3.17.7	Recently Developed Novel Elastomers	129
3.4	Polycondensation and Polyaddition Products	129
3.4.1	Polysiloxane, Silicone Rubber (Q)	129
3.4.1.1	General Background about Q	129
3.4.1.2	Production of Q	130
3.4.1.3	Structure of Q and its Influence on Properties	130
3.4.1.4	Compounding of Q	131
3.4.1.5	Processing of Q	132
3.4.1.6	Properties of Q Vulcanizates	133
3.4.1.7	Uses of Q	134
3.4.1.8	Competitive Materials of Q	135
3.4.1.9	Fluorosilicone Rubber (FMQ, FVMQ)	135
3.4.2	Polysulfide Rubbers (TM)	136
3.4.2.1	General Background about TM	136
3.4.2.2	Production of TM	136
3.4.2.3	Structure of TM and its Influence on Properties	137
3.4.2.4	Compounding of TM	137
3.4.2.5	Processing of TM	137
3.4.2.6	Properties of TM Vulcanizates	138
3.4.2.7	Uses of TM	138
3.4.2.8	Competitive Materials of TM	138

3.4.3	Polyester and Polyether Rubber (OT)	138
3.4.3.1	Paraplex (OT)	138
3.4.3.2	Norepol	138
3.4.3.3	Polyesters Based on Polyethylene Terephthalate and Polyethylene Glycol (Polyetheresters) (TPE-E) . .	139
3.4.3.4	Polyether Amides (TPE-A)	139
3.4.4	Polyurethane Elastomers (PUR, AU, EU, TPU)	139
3.4.4.1	General Background about Polyurethane Elastomers (PUR)	139
3.4.4.2	Properties of AU	140
3.4.4.3	Structure of AU	141
3.4.4.4	Compounding of AU	141
3.4.4.5	Processing of AU	142
3.4.4.6	Properties of AU Vulcanizates	142
3.4.4.7	Uses of AU	143
3.4.4.8	Competitive Materials of AU	143
3.4.4.9	Thermoplastic Polyurethane (TPU)	143
3.5	Thermoplastic Elastomers (TPE)	144
3.5.1	General Background about TPE and Definition resp. Classification	144
3.5.1.1	Problems	144
3.5.1.2	Structure of TPEs	144
3.5.1.3	Classification of TPEs	145
3.5.2	Types of Thermoplastic Elastomers	148
3.5.2.1	Block or Segmented Copolymers	150
3.5.2.1.1	Styrene Triblock Copolymers (Y-SBR, resp. SBS; Y-IR, resp. SIS)	150
3.5.2.1.2	Thermoplastic Polyurethanes (TPE-U, resp. TPU) . .	151
3.5.2.1.3	Thermoplastic Copolyesters (TPE-E)	152
3.5.2.1.4	Polyether/Polyamide Block Copolymers (PEBA, resp. TPE-A)	153
3.5.2.2	Blends of Elastomers and Thermoplastics	154
3.5.2.2.1	General Background about Elastomeric Alloys	154
3.5.2.2.2	EPDM/PP-Blends (TPE-O, resp. TPO)	155
3.5.2.2.3	NR/PP-Blends (TPE-NR)	156
3.5.2.2.4	NBR/PP-Blends (TPE-NBR)	157
3.5.2.2.5	NBR/PVC Thermoplastic Blends	157
3.5.2.2.6	Thermoplastic Elastomers Based on Halogen Containing Polyolefins (Alcryn)	157
3.5.2.3	Elastomers with Thermally Labile Crosslinks	158
3.5.2.4	Other Thermoplastic Elastomers	159
3.5.3	Service Temperatures of TPE	159
3.6	A Comparison of Properties and Uses of Different Rubbers	161
3.6.1	Comparative Properties	161
3.6.2	Performance Limits of Properties of Elastomers	168
3.6.2.1	Maximum Service Temperatures	168
3.6.2.2	Behavior at Low Temperatures	170
3.6.2.3	Resistance to Liquid Media	171
3.6.2.4	Deformation Properties	172
3.6.2.5	Strength Properties	173
3.6.3	Polymer Blends	174

3.6.4	Uses of Different Elastomers	175
3.7	References on SR	177
3.7.1	General References on SR	177
3.7.2	References on Polymerization	177
3.7.2.1	General References on Polymerization	177
3.7.2.2	References on Emulsion Polymerization	177
3.7.2.3	References on Ionic Chain Polymerization	178
3.7.2.4	References on Solution Polymerization	179
3.7.2.5	References on Suspension Polymerization	179
3.7.3	References on Structure of Polymers	179
3.7.3.1	References on Determination of Structure	179
3.7.3.2	References on the Influence of Structure of Polymers	179
3.7.4	References on Different Types of Rubber	180
3.7.4.1	References on BR	180
3.7.4.2	References on SBR	182
3.7.4.3	References on NBR	183
3.7.4.4	References on CR	189
3.7.4.5	References on IR	190
3.7.4.6	References on IIR	191
3.7.4.7	References on CIIR and BIIR	193
3.7.4.8	References on EPM and EPDM	194
3.7.4.9	References on EVM	197
3.7.4.10	References on CM	197
3.7.4.11	References on CSM	197
3.7.4.12	References on ACM and EAM	198
3.7.4.13	References on CO, ECO, ETER	200
3.7.4.14	References on PO and GPO	200
3.7.4.15	References on FKM	201
3.7.4.16	References on PNR	204
3.7.4.17	References on Other Polymers	204
3.7.4.18	References on Q	205
3.7.4.19	References on TM	208
3.7.4.20	References on Polyester and Polyether Elastomers	208
3.7.4.21	References on Polyurethanes	209
3.7.4.22	References on Thermoplastic Elastomers (TPE)	211
3.7.4.23	Comparative Properties and Rubber Blends	215
4	Rubber Chemicals and Additives	217
4.1	Mastication and Peptizers	217
4.1.1	The Principle of Mastication	217
4.1.1.1	Processing Viscosity	217
4.1.1.2	Mastication Without Peptizers	217
4.1.1.3	Mastication With Peptizers	219
4.1.2	Peptizing Agents	220
4.1.2.1	Peptizing Agents Without Activators	220
4.1.2.2	Activator Containing Peptizers	221
4.2	Vulcanization and Vulcanization Chemicals	221
4.2.1	The Vulcanization Process	221
4.2.1.1	General Observations	221
4.2.1.2	Change of Properties of Elastomers Depending on the Degree of Vulcanization	223

4.2.1.3	Effect of Crosslink Structure on Vulcanizate Properties	227
4.2.2	Sulfur and Sulfur Containing Vulcanizing Agents	229
4.2.2.1	General Observations about Sulfur and Sulfur Containing Vulcanization Agents	229
4.2.2.2	Sulfur	230
4.2.2.3	Selenium and Tellurium	231
4.2.2.4	Sulfur Donors	231
4.2.3	Vulcanization Accelerators	233
4.2.3.1	General Observation and Classification of Accelerators	233
4.2.3.2	Inorganic Vulcanization Accelerators	236
4.2.3.3	Thiazole Accelerators	236
4.2.3.3.1	Mercapto Accelerators	237
4.2.3.3.2	Benzothiazole Sulfenamide Accelerators	239
4.2.3.4	Triazine Accelerators	241
4.2.3.5	Dithiocarbamate Accelerators	241
4.2.3.5.1	Zinc Dithiocarbamates	242
4.2.3.5.2	Ammonium Dithiocarbamates	244
4.2.3.5.3	Sodium Dithiocarbamates	244
4.2.3.5.4	Selenium and Tellurium Dithiocarbamates	244
4.2.3.5.5	Lead, Cadmium, Copper and Bismuth Dithiocarbamates	245
4.2.3.6	Xanthate Accelerators	246
4.2.3.7	Thiuram Accelerators	246
4.2.3.8	Dithiocarbamylsulfenamide Accelerators	248
4.2.3.9	Guanidine Accelerators	250
4.2.3.10	Aldehyde-Amine Accelerators	252
4.2.3.10.1	Butyraldehydeaniline (BAA)	252
4.2.3.10.2	Hexamethylenetetramine (HEXA)	252
4.2.3.10.3	Tricrotonylidenetetramine (TCT)	252
4.2.3.11	Other Amine Accelerators	253
4.2.3.12	Thiourea Accelerators	253
4.2.3.13	Dithiophosphate Accelerators	254
4.2.3.14	Other Vulcanization Accelerators	255
4.2.4	Crosslinking Agents Without Sulfur	255
4.2.4.1	Peroxides	256
4.2.4.2	Quinonedioximes	260
4.2.4.3	Polymethylolphenolic Resins	261
4.2.4.4	Di- and Triisocyanates, Urethane Crosslinkers	261
4.2.4.5	Other Crosslinking Agents	261
4.2.5	Accelerator Activators	262
4.2.6	Vulcanization Retarders	262
4.2.6.1	General Considerations	262
4.2.6.2	N-Nitrosodiphenylamine (NDPA)	263
4.2.6.3	Phthalic Anhydride (PTA) and Benzoic Acid (BES)	263
4.2.6.4	Phthalimidesulfenamide	264
4.3	Aging and Aging Protectors (Antioxidants)	264
4.3.1	Mechanism of Aging	264
4.3.1.1	General Considerations	264
4.3.1.2	Oxygen Aging. Aging in the Real Sense	265

4.3.1.3	Accelerated Oxidation in the Presence of Heavy Metal Compounds (Rubber-Poison Aging)	266
4.3.1.4	Heat Aging in the Absence of Oxygen	266
4.3.1.5	Fatigue	267
4.3.1.6	Ozone Crack Formation	267
4.3.1.7	Crazing-Effect	267
4.3.1.8	Frosting Phenomenon	267
4.3.2	Aging-, Fatigue- and Ozone-Protective Agents	268
4.3.2.1	General Observations and Classification of Antioxidants (Aging Protectors)	268
4.3.2.2	Discoloring Protectors with Fatigue- and Ozone-Protection (Antiozonants)	270
4.3.2.3	Discoloring Antioxidants with Fatigue-, but without Ozone-Protection	271
4.3.2.4	Discoloring Antioxidants with little or no Fatigue or Ozone Protective Activity	271
4.3.2.5	Non-Discoloring Antioxidants with Fatigue- or Ozone-Protective Activity	271
4.3.2.6	Non-Discoloring Antioxidants without Fatigue- or Ozone-Protective Activity	272
4.3.2.7	Non-Discoloring Antiozonants without Aging Protection	273
4.3.2.8	Aging Protectors with Hydrolysis Protection	273
4.3.3	Selection and Dosage of Antioxidants for Various Applications	274
4.3.3.1	Stabilization of SR (Oxidation Protection)	274

7.3.6.5	Monophenol Derivatives	526
7.3.6.6	Imidazole Derivatives	526

7.3.6.7	Trisnonyl Phenyl Phosphite	526
7.3.6.8	Other Antioxidants	527
7.3.6.9	Copper Inhibitors	527
7.3.6.10	UV-Absorbers	527
7.3.6.11	Antiozonant Waxes	527
7.3.7	Peptizing Agents	527
7.3.7.1	Pentachlorothiophenol Derivatives (PCTP, ZPCTP) . .	527
7.3.7.2	Zinc Salts of Fatty Acids (Special Types)	527
7.3.7.3	Other Peptizing Agents	527
7.3.8	Ester and Ether Plasticizers (Selection)	527
7.3.8.1	Adipates	527
7.3.8.2	Phthalates	528
7.3.8.3	Dioctylsebacat (DOS)	528
7.3.8.4	Dioctylacelates (DOZ, DIOZ)	528
7.3.8.5	Trimellitates	528
7.3.8.6	Glycol Esters	528
7.3.8.7	Phosphate Esters	528
7.3.8.8	Other Ester Plasticizers	528
7.3.8.9	Ether Plasticizers	529
7.3.8.10	Epoxidized Plasticizers	529
7.3.8.11	Chloro Paraffines	529
7.3.9	Mineral Oils (Selection)	529
7.3.9.1	Paraffinic Oils	529
7.3.9.2	Naphthenic Oils	529
7.3.9.3	Aromatic, High Aromatic Oils	529
7.3.10	Other Plasticizers (Selection)	529
7.3.11	Fatty Acids and Derivatives (Selection), Process Aids	529
7.3.11.1	Stearic Acids	529
7.3.11.2	Other Fatty Acids	530
7.3.11.3	Fatty Acid Salts	530
7.3.11.4	Pentaerythritol Tetrastearate (PET)	530
7.3.11.5	Fatty Alcohol Esters	530
7.3.11.6	Other Surface Active Substances	530
7.3.12	Other Process Aids	530
7.3.12.1	Process Aids for FPM (FKM)	530
7.3.12.2	Process Aids for CSM	530
7.3.12.3	Process Aids for EAM	530
7.3.12.4	Factices	530
7.3.13	Blowing Agents	531
7.3.13.1	Azodicarbonamide (ADC)	531
7.3.13.2	Sulfohydrazide Derivatives (BSH, DBSH, TSH, etc.) .	531
7.3.13.3	Dinitroso Pentamethylene Tetramine (DNPT)	531
7.3.13.4	Other Blowing Agents	531
7.3.13.5	Activators for Blowing Agents	531
7.3.14	Bonding Agents	531
7.3.14.1	Rubber to Metal Bonding Agents	531
7.3.14.2	Rubber to Textile Bonding Agents	531
7.4	Trade Names of Synthetic Rubbers, Thermoplastic Elastomers and Vulcanizing Chemicals	532
7.5	Manufacturers, Suppliers	556
7.6	References	562

8 Appendix	563
8.1 Physical Units, Selection	563
8.1.1 U.S. Customary/SI Conversions	563
8.1.2 Conversion of Typical Units in Use in the USA into Metric Units	563
8.2 List of Abbreviations	564
Index	573
Buyer's Guide	.BG1
Product Information of the Rubber Industry	A1
