CHASHECHKIN Y. D., PROKHOROV E.: Hydrodynamics, Energetics and Acoustics of Free Falling Drop Impact at a Motionless Fluid	1
CHASHECHKIN Y. D., ZAGUMENNYI I. V.: Natural Unsteadiness of the Flow Pattern Around a Plate in Numerical Simulation and Laboratory Modeling	11
ČÍŽEK M., VAMPOLAT T., POPELKA L.: Comparison of Labyrinth Seal Calculation and Real Aircraft Turbine Engine Measurement	19
CLÉMENT J.-B., GOLAY F., ERSOY M., SOUS D.: Adaptive Discontinuous Galerkin Method for Richards Equation	27
CRHA J., KAŠPAR O., BASAŘOVÁ P.: CFD Simulation of a Sub-Millimeter Rising Bubble in a Stagnant Liquid	35
DEURING P., KRAČMAR S., NEČASOVÁ Š.: Recent Results on the Problem of Motion of Viscous Fluid Around A Rotating Rigid Body	42
DIMITRIEVA N., F.: Calculation of Nonuniform Fluid Flows in a Gravity Field	48
DUDA D.: Individual Vortex Searching Algorithm	56
DURIEZ J., GALUSINSKY C.: Level Set Representation on Octree for Granular Material with Arbitrary Grain Shape	64
FLÍDR E., KLADRUBSKÝ M., JELÍNEK T.: Unsteady Pressure Measurement in an End-Wall Region of a Linear Blade Cascade	72
HLAVATÝ T., ISOZ M., PLACHÁ M., ŠOUREK M., KOČÍ P.: Geometrically Realistic Macro-Scale Model for Multi-Scale Simulations of Catalytic Filters for Automotive Gas Aftertreatment	82
ILINYKH A. YU.: Fine Structure Distribution of Immiscible Fluid at The Drop Impact to Fluid Surface	90

ISOZ M., ŠOUREK M.:	98
Pod-Deim-Based Model Order Reduction for Four-Way Coupled Fluid-Solid Flows	
KORINEK T., TISOVSKY T., HUJER J., ZIMMERMAN K.:	106
Partially-Averaged Navier-Stokes Simulation of the Flow Around Circular Cylinder at $Re=3900$: Comparison of Low and High Reynolds Number Approaches	
KOUBA J., NOVOTNÝ J., NOŽIČKA J.:	114
Laser-Induced Kernel Visualisation by OH^* Chemiluminescence Method	
KUZMINA K., MARCHEVSKY I., SOLDATOVA I.:	122
The High-Accuracy Numerical Scheme for the Boundary Integral Equation Solution in 2D Lagrangian Vortex Method With Semi-Analytical Vortex Elements Contribution Accounting	
LEVÝ T., VIMMR J.:	130
Developing Fully-Coupled Density-Based Solver for Turbulent Compressible Fluid Flows in OpenFOAM	
LOUDA P., PŘÍHODA J.:	137
Study on Performance of Various Turbulent Heat Transfer Closures	
MARCHEVSKY I.K., KUZMINA K. S., RYATINA E. P.:	144
Flowsimulation Around a Circular Cylinder for Lowreynolds Numbers and Determining the Flow Separation Point in VM2D Code	
MARCHEVSKY I.K., SHCHEGLOV G.A., DERGACHEV S. A.:	152
On the Algorithms for Vortex Element Evolution Modelling in 3D Fully Lagrangian Vortex Loops Method	
MARUŠIĆ – PALOKA E., PAŽANIN I., RADULOVIĆ M.:	160
On The Lubrication of a Rotating Shaft with Incompressible Micropolar Fluid	
PECH J.:	168
Laminar-Turbulent Transition in View of Flow Separation from Isothermal and Heated Cylinder	
PIRES M., BODNÁR T.:	176
On the Influence of Diffusion Stabilization in Oldroyd-B Fluid Flow Simulations	
RINGSTAD K. M., KHALILI M. E., MÜLLER B.:	184
High Order Immersed Boundary Method for Fluid-Structure Interaction of Viscous Compressible Flowwith a Rigid Body	

SCHIAVON M., TAMPIERI F., CAGGIO M., BODNÁR T.: The Effect of Submeso Motions on Second-Order Moment Budgets in the Stable Atmospheric Boundary Layer	192
SHMIGIRILOV R., RYABININ A.: Influence of End Plates on Rotational Oscillations of a Rectangular Cylinder	200
ŠIDLOF P., LASOTA M.: Aeroacoustic Simulation of Human Phonation with the Wale Sub-Grid Scale Model	206
ŠOUREK M., ISOZ M.: Development of CFD Solver for Four-Way Coupled Particle-Laden Flows	214
STRAKA P., PŘÍHODA J.: Modification of the Algebraic Transition Model for Wall Roughness Effect Including a Rough Strip	222
SVÁČEK P.: Simulation of Interaction of the Airflow with Vocal Folds Vibration Considering the Vocal Folds Contact	230
URUBA V., PROCHÁZKA P., SKÁLA: On the 3D Dynamics of the Wake Behind a Circular Cylinder	240
VARNHORN W.: A Lagrangian Approach for Weak Solutions of the Navier-Stokes Equations	249
