

Contents

1 Literature review	10
1.1 Origin of pigs	10
1.1.1 Characteristics of Landrace and Mangalica breeds	10
1.2 Hybridization program	12
1.2.1 Maternal breeds of pigs	12
1.2.2 Paternal breeds of pigs	13
1.2.3 Fattening systems for heavy pigs	14
1.3 Marketability of heavy pigs	14
1.4 Slaughtering of pigs	15
1.5. External processing of slaughter pigs	16
1.6 Internal processing of slaughter pigs	16
1.7 Pigs carcass cutting	16
1.7.1 Cutting and sorting of pig meat	17
1.7.2 Carcass value of pigs	17
1.8 Quality of pig meat	22
1.9 Factors affecting pig meat quality	32
1.9.1 Effect of genetics	32
1.9.2 Effect of nutrition	35
1.9.3 Effect of the breed	36
1.9.4 Effect of sex	36
1.9.5 Age effect	37
1.9.6 Effect of farming	37
1.9.7 Effect of transport	38
1.9.8 Effect of fat peroxidation in meat	39
1.9.9 Effect of total volatile basic nitrogen	40
1.9.10. Effect of increasing biogenic amines by long storage	40
1.9.11 Effect of maturation of meat <i>post mortem</i>	41
1.10 Nutritional value of pig meat	42
1.10.1 Basic composition of pig meat	42
1.10.2 Minerals in pig meat	43
1.10.3 Fatty acids in pig fat	43
1.10.4 Content of essential amino acids in pork	45

1.10.5 Specific nutrients in pork	45
1.10.6 Vitamins content of pork	46
2 The aim of the work	47
3 Material and methods	48
3.1 Material	48
3.2 Methods used for determination of chemical parameters	48
3.2.1 Determination of the basic meat composition by the FTIR method	48
3.2.2. Determination of malondialdehyde (MDA) by spectrophotometry	50
3.2.3 Minerals determination	51
3.2.4 Energy value analyses	51
3.2.5 Statistical analyses	52
4 Results and discussion	53
5 Conclusion	81
