Preface

vii

1. Epistemology and Philosophical Method	1
1. Our familiarity with knowledge	1
2. Perceptual knowledge	4
3. Why is it that enquiry aims at knowledge rather than mere true belief?	7
4. Scepticism about conceptual enquiry	14
5. Philosophy's interest in concepts	19
2. Justified Belief, Reasons, and Evidence	23
1. Justified belief	23
2. 'Justified' belief in Gettier cases and well-founded belief	29
3. Knowledge based on evidence	33
4. Standing knowledge of facts	36
5. Clinching evidence	38
6. Summary	42
3. Perception, Experience, and Direct Realism	43
1. Perceiving things directly	43
2. A non-relationalist perspective	50
3. The relationalist challenge	54
4. Experiential orientation	56
5. Perception, consciousness, and sensations	61
6. Non-committal descriptions of experience	66
4. Perceptual Knowledge and Recognitional Abilities	73
1. Experiential awareness and appearances	73
2. Perceiving, thinking, and recognizing	77
3. Perceptual–recognitional abilities	83
4. Perceptual–recognitional abilities and the theory of knowledge	89
5. Perceiving-that and representational content	91
5. Perception and the Justification of Belief	97
1. Perception and experience	97
2. Do experiences justify by being evidence?	99
3. Immediate justification	106
4. Perceptual knowledge, well-foundedness, and rational constraint	109
5. Access to reasons constituted by truths as to what we perceive to be so	112
6. The justification for belief that perception can yield	114
7. McDowell on boundaries	118
8. McDowell on intuitional content	121

6. Abilities, Competences, and Fallibility	125
1. Introduction	125
2. Some ordinary abilities	126
3. Having an ability and being reliably successful	129
4. Performances: hard and completable	131
5. Mental acts	136
6. Sosa and competence	143
7. Abilities: Further Issues	147
1. Cognitive contact and the reach of reason	147
2. Abilities in virtue epistemology	149
3. More basic abilities?	154
4. Retreating to dispositions plain and simple	157
5. Individuating recognitional abilities: some complexities	160
8. Knowledge from Perceived Indicators and Background Knowledge	165
1. Introduction	165
2. Indicators and evidence	166
3. The covering generalization model	168
4. How indicators can provide clinching evidence	171
5. A puzzle about generalizations	174
6. The standing of accepted generalizations	176
7. More on background beliefs	181
8. Moore's truisms	184
9. Reason's work again	186
9. Going By What We Know	188
1. Relying on what we know about knowledge	188
2. How can we gain so much from so little?	193
3. Self-understanding and the engaged standpoint	197
4. Not so radical scepticism	200
5. Radical scepticism and responsible judgement	205
