## 1 Preliminaries

1

|     |                                           |    |
|-----|-------------------------------------------|----|
| 1.0 | Introduction                              | 1  |
| 1.1 | Error, Accuracy, and Stability            | 8  |
| 1.2 | C Family Syntax                           | 12 |
| 1.3 | Objects, Classes, and Inheritance         | 17 |
| 1.4 | Vector and Matrix Objects                 | 24 |
| 1.5 | Some Further Conventions and Capabilities | 30 |

## 2 Solution of Linear Algebraic Equations

37

|      |                                                         |     |
|------|---------------------------------------------------------|-----|
| 2.0  | Introduction                                            | 37  |
| 2.1  | Gauss-Jordan Elimination                                | 41  |
| 2.2  | Gaussian Elimination with Backsubstitution              | 46  |
| 2.3  | $LU$ Decomposition and Its Applications                 | 48  |
| 2.4  | Tridiagonal and Band-Diagonal Systems of Equations      | 56  |
| 2.5  | Iterative Improvement of a Solution to Linear Equations | 61  |
| 2.6  | Singular Value Decomposition                            | 65  |
| 2.7  | Sparse Linear Systems                                   | 75  |
| 2.8  | Vandermonde Matrices and Toeplitz Matrices              | 93  |
| 2.9  | Cholesky Decomposition                                  | 100 |
| 2.10 | $QR$ Decomposition                                      | 102 |
| 2.11 | Is Matrix Inversion an $N^3$ Process?                   | 106 |

## 3 Interpolation and Extrapolation

110

|     |                                                   |     |
|-----|---------------------------------------------------|-----|
| 3.0 | Introduction                                      | 110 |
| 3.1 | Preliminaries: Searching an Ordered Table         | 114 |
| 3.2 | Polynomial Interpolation and Extrapolation        | 118 |
| 3.3 | Cubic Spline Interpolation                        | 120 |
| 3.4 | Rational Function Interpolation and Extrapolation | 124 |

|          |                                                                                            |            |
|----------|--------------------------------------------------------------------------------------------|------------|
| 3.5      | Coefficients of the Interpolating Polynomial . . . . .                                     | 129        |
| 3.6      | Interpolation on a Grid in Multidimensions . . . . .                                       | 132        |
| 3.7      | Interpolation on Scattered Data in Multidimensions . . . . .                               | 139        |
| 3.8      | Laplace Interpolation . . . . .                                                            | 150        |
| <b>4</b> | <b>Integration of Functions</b>                                                            | <b>155</b> |
| 4.0      | Introduction . . . . .                                                                     | 155        |
| 4.1      | Classical Formulas for Equally Spaced Abscissas . . . . .                                  | 156        |
| 4.2      | Elementary Algorithms . . . . .                                                            | 162        |
| 4.3      | Romberg Integration . . . . .                                                              | 166        |
| 4.4      | Improper Integrals . . . . .                                                               | 167        |
| 4.5      | Quadrature by Variable Transformation . . . . .                                            | 172        |
| 4.6      | Gaussian Quadratures and Orthogonal Polynomials . . . . .                                  | 179        |
| 4.7      | Adaptive Quadrature . . . . .                                                              | 194        |
| 4.8      | Multidimensional Integrals . . . . .                                                       | 196        |
| <b>5</b> | <b>Evaluation of Functions</b>                                                             | <b>201</b> |
| 5.0      | Introduction . . . . .                                                                     | 201        |
| 5.1      | Polynomials and Rational Functions . . . . .                                               | 201        |
| 5.2      | Evaluation of Continued Fractions . . . . .                                                | 206        |
| 5.3      | Series and Their Convergence . . . . .                                                     | 209        |
| 5.4      | Recurrence Relations and Clenshaw's Recurrence Formula . . . . .                           | 219        |
| 5.5      | Complex Arithmetic . . . . .                                                               | 225        |
| 5.6      | Quadratic and Cubic Equations . . . . .                                                    | 227        |
| 5.7      | Numerical Derivatives . . . . .                                                            | 229        |
| 5.8      | Chebyshev Approximation . . . . .                                                          | 233        |
| 5.9      | Derivatives or Integrals of a Chebyshev-Approximated Function . . . . .                    | 240        |
| 5.10     | Polynomial Approximation from Chebyshev Coefficients . . . . .                             | 241        |
| 5.11     | Economization of Power Series . . . . .                                                    | 243        |
| 5.12     | Padé Approximants . . . . .                                                                | 245        |
| 5.13     | Rational Chebyshev Approximation . . . . .                                                 | 247        |
| 5.14     | Evaluation of Functions by Path Integration . . . . .                                      | 251        |
| <b>6</b> | <b>Special Functions</b>                                                                   | <b>255</b> |
| 6.0      | Introduction . . . . .                                                                     | 255        |
| 6.1      | Gamma Function, Beta Function, Factorials, Binomial Coefficients . . . . .                 | 256        |
| 6.2      | Incomplete Gamma Function and Error Function . . . . .                                     | 259        |
| 6.3      | Exponential Integrals . . . . .                                                            | 266        |
| 6.4      | Incomplete Beta Function . . . . .                                                         | 270        |
| 6.5      | Bessel Functions of Integer Order . . . . .                                                | 274        |
| 6.6      | Bessel Functions of Fractional Order, Airy Functions, Spherical Bessel Functions . . . . . | 283        |
| 6.7      | Spherical Harmonics . . . . .                                                              | 292        |
| 6.8      | Fresnel Integrals, Cosine and Sine Integrals . . . . .                                     | 297        |
| 6.9      | Dawson's Integral . . . . .                                                                | 302        |
| 6.10     | Generalized Fermi-Dirac Integrals . . . . .                                                | 304        |
| 6.11     | Inverse of the Function $x \log(x)$ . . . . .                                              | 307        |
| 6.12     | Elliptic Integrals and Jacobian Elliptic Functions . . . . .                               | 309        |

|           |                                                                          |            |
|-----------|--------------------------------------------------------------------------|------------|
| 6.13      | Hypergeometric Functions . . . . .                                       | 318        |
| 6.14      | Statistical Functions . . . . .                                          | 320        |
| <b>7</b>  | <b>Random Numbers</b> . . . . .                                          | <b>340</b> |
| 7.0       | Introduction . . . . .                                                   | 340        |
| 7.1       | Uniform Deviates . . . . .                                               | 341        |
| 7.2       | Completely Hashing a Large Array . . . . .                               | 358        |
| 7.3       | Deviates from Other Distributions . . . . .                              | 361        |
| 7.4       | Multivariate Normal Deviates . . . . .                                   | 378        |
| 7.5       | Linear Feedback Shift Registers . . . . .                                | 380        |
| 7.6       | Hash Tables and Hash Memories . . . . .                                  | 386        |
| 7.7       | Simple Monte Carlo Integration . . . . .                                 | 397        |
| 7.8       | Quasi- (that is, Sub-) Random Sequences . . . . .                        | 403        |
| 7.9       | Adaptive and Recursive Monte Carlo Methods . . . . .                     | 410        |
| <b>8</b>  | <b>Sorting and Selection</b> . . . . .                                   | <b>419</b> |
| 8.0       | Introduction . . . . .                                                   | 419        |
| 8.1       | Straight Insertion and Shell's Method . . . . .                          | 420        |
| 8.2       | Quicksort . . . . .                                                      | 423        |
| 8.3       | Heapsort . . . . .                                                       | 426        |
| 8.4       | Indexing and Ranking . . . . .                                           | 428        |
| 8.5       | Selecting the $M$ th Largest . . . . .                                   | 431        |
| 8.6       | Determination of Equivalence Classes . . . . .                           | 439        |
| <b>9</b>  | <b>Root Finding and Nonlinear Sets of Equations</b> . . . . .            | <b>442</b> |
| 9.0       | Introduction . . . . .                                                   | 442        |
| 9.1       | Bracketing and Bisection . . . . .                                       | 445        |
| 9.2       | Secant Method, False Position Method, and Ridders' Method . . . . .      | 449        |
| 9.3       | Van Wijngaarden-Dekker-Brent Method . . . . .                            | 454        |
| 9.4       | Newton-Raphson Method Using Derivative . . . . .                         | 456        |
| 9.5       | Roots of Polynomials . . . . .                                           | 463        |
