

Contents

About the author	4
Preface	5
1 Spectroscopy in analytical chemistry	6
1.1 Laser-Induced Breakdown Spectroscopy	7
1.2 Hyphenated Systems	8
2 Theory of laser-induced plasma	10
2.1 Laser-induced plasma	10
2.2 Spectrum and emission lines	13
2.3 Thermodynamic properties of Laser-Induced Plasma	15
3 Processing the emission signal	16
3.1 Data Preprocessing	16
3.2 Univariate Data Analysis	17
3.3 Chemometrics	19
3.3.1 Visualization	20
3.3.2 Dimensionality reduction	21
3.3.3 Multivariate quantification	23
3.3.4 Multivariate clustering and classification	24
3.3.5 Multivariate mapping	26
3.3.6 Data libraries	27
3.4 Figures of merit	28
Conclusion	30
Bibliography	33
Abstract	45
