

Contents

Chapter 1. Introduction **1**

- 1.1 What Is Logic? 1
- 1.2 Premisses and Conclusions 3
- 1.3 Diagrams for Single Arguments 18
- 1.4 Recognizing Arguments 30
- 1.5 Passages Containing Several Arguments 41
- 1.6 Problem Solving 56

Chapter 2. Some Uses of Language **69**

- 2.1 Three Basic Functions of Language 69
- 2.2 Discourse Serving Multiple Functions 73
- 2.3 The Forms of Discourse 76
- 2.4 Emotive Words 82
- 2.5 Kinds of Agreement and Disagreement 86
- 2.6 Emotively Neutral Language 93

Chapter 3. Fallacies 99

- 3.1 Classification of Fallacies 99
- 3.2 Fallacies of Ambiguity 101
- 3.3 The Fallacy Called *Non Sequitur* 104
- 3.4 Circular Reasoning, or Begging the Question 107
- 3.5 False Cause 108
- 3.6 *Ad Hominem* Fallacies 112
- 3.7 Emotional Appeals 114
- 3.8 Some So-called "Formal Fallacies" 122

Chapter 4. Definition 127

- 4.1 Five Purposes of Definition 127
- 4.2 Verbal Disputes and Definition 133
- 4.3 Five Types of Definition 137
- 4.4 Various Kinds of Meaning 145
- 4.5 Techniques for Defining 150
- 4.6 Rules for Definition by Genus and Difference 157

Chapter 5. Analogy 167

- 5.1 Argument by Analogy 167
- 5.2 Appraising Analogical Arguments 175
- 5.3 Refutation by Logical Analogy 187

**Chapter 6. Causal Connections:
Mill's Methods
of Experimental Inquiry** 197

- 6.1 The Meaning of "Cause" 197
- 6.2 Mill's Methods 204

Contents

- 6.3 Criticisms of Mill's Methods 229
6.4 Vindication of Mill's Methods 236

Chapter 7. Science and Hypothesis 257

- 7.1 The Values of Science 257
7.2 Explanations: Scientific and Unscientific 261
7.3 Evaluating Scientific Explanations 266
7.4 The Detective as Scientist 272
7.5 Scientists in Action: The Pattern of Scientific Investigation 282
7.6 Crucial Experiments and *Ad Hoc* Hypotheses 287
7.7 Classification as Hypothesis 293

Solutions to Selected Exercises 315
