<i>Foreword</i>	xiii
<i>Preface</i>	xv
<i>Acknowledgements</i>	xvii
1 Introducing marketing research	1
1.1 Introduction	3
1.2 Who needs marketing research?	8
1.3 Who should read this book?	9
1.4 What does the book cover?	10
1.5 Using this book	11
2 Getting started	13
2.1 Introduction	15
2.2 What does the organization need research for?	15
2.2.1 Corporate planning	16
2.2.2 Market planning	16
2.2.3 Product planning (including packaging and service levels)	17
2.2.4 Promotional planning	17
2.2.5 Distribution planning	18
2.2.6 Price planning	18
2.3 What types of research data are there?	18
2.3.1 Continuous research	19
2.3.2 Ad hoc research	19
2.3.3 Desk research	19
2.3.4 Field research	20
2.4 How can the organization obtain the research it needs?	21
2.4.1 Getting started	21
2.4.2 Resources	22
2.5 Summary	23
3 Marketing research begins at home	25
3.1 Introduction	27
3.2 What can be done at home?	27
3.2.1 Data produced in the normal course of running the organization	28
3.2.2 Data acquired through personal contacts	28

3.2.3	Accumulated research information	29	6.3	Postal or self-completion research	137
3.2.4	Decision support systems	29	6.4	Internet and e-mail research	138
3.3	What goes into an internal information system?	30	6.5	Diary panels	139
3.3.1	Operating data	30	6.6	Telephone research	142
3.3.2	Market intelligence	34	6.7	Observation research	143
3.3.3	Information library	34	6.7.1	Observation panels	143
3.3.4	Customer relationship management systems, data warehouses and data mining	35	6.7.2	Retail audits	144
3.4	Summary	37	6.8	Summary	146
4	'Off-the-peg' research	39	7	Who provides the information?	147
4.1	Introduction	41	7.1	Introduction	149
4.2	Secondary desk research	41	7.2	What is a sample?	149
4.2.1	Introduction	41	7.3	Why use a sample?	150
4.2.2	Sources	44	7.4	How is the sample selected?	150
4.2.3	Finding the pegs	50	7.4.1	Random sampling	151
4.2.4	Using secondary data	67	7.4.2	Quota sampling	158
4.3	Syndicated research services	68	7.4.3	Judgement sampling	161
4.3.1	Index to syndicated research surveys	71	7.5	How big does the sample need to be?	163
4.3.2	Guide to syndicated research services	73	7.5.1	Variability in the population	163
4.4	Omnibus research surveys	89	7.5.2	Required level of confidence	164
4.4.1	Omnibus research services and suppliers	90	7.5.3	Required limits of accuracy	164
4.4.2	General population omnibus surveys	90	7.5.4	Allowance for non-response	165
4.4.3	Specialist omnibus surveys	94	7.5.5	Subgroup analysis requirements	165
4.5	Specialist research services	98	7.5.6	Practical factors	166
4.5.1	Types of research offered via the Market Research Society	98	7.6	Summary	167
4.5.2	Consumer classification systems	99	8	How do you ask the questions?	169
4.6	Summary	106	8.1	Introduction	171
5	'Made-to-measure' research	107	8.2	Why use a questionnaire?	171
5.1	Introduction	109	8.2.1	To collect relevant data	171
5.2	Buying a 'made-to-measure' research survey is just like buying a 'made-to-measure' suit	109	8.2.2	To make data comparable	172
5.3	The 'made-to-measure' research process	110	8.2.3	To minimize bias	172
5.4	Stage 1: Defining the research required	112	8.2.4	To motivate the respondent	172
5.4.1	Stage 1: Question 1, 'What is the problem?'	112	8.3	Getting the questionnaire content right	173
5.4.2	Stage 1: Question 2, 'What data are needed to find a solution?'	113	8.4	What types of data can be collected using a questionnaire?	174
5.5	Summary	120	8.4.1	Fact	174
6	How are the data collected?	121	8.4.2	Opinion	174
6.1	Introduction	123	8.4.3	Motive	175
6.2	Interview methods	123	8.5	What does a questionnaire contain?	176
6.2.1	Interviewing individuals	123	8.5.1	Identification data	176
6.2.2	Attitude measurement	126	8.5.2	Classification data	176
6.2.3	Projective techniques	132	8.5.3	Subject data	176
6.2.4	Interviewing groups	134	8.6	What types of question can be used?	178
			8.6.1	Dichotomous questions	178
			8.6.2	Multiple-choice questions	180
			8.6.3	Open-ended questions	182
			8.6.4	Rating scales	182

8.7	How should questions be worded?	182	9.5.6	Editing checks	209
8.7.1	Meaning	182	9.5.7	Computer checks	210
8.7.2	Ambiguity	185	9.5.8	Monitoring fieldwork	212
8.7.3	Leading	185	9.6	Choosing a good fieldwork agency	212
8.7.4	Generalization	185	9.6.1	Finding the agency	212
8.7.5	Unidimensionality	186	9.6.2	Asking pertinent questions	214
8.7.6	Cushion statements	186	9.6.3	Looking at the evidence	214
8.8	Will the respondent answer the questions?	186	9.6.4	Membership of the Interviewer Quality Control Scheme	214
8.9	Allowing for method of analysis	187	9.6.5	Relevant experience	215
8.10	Why does presentation matter?	188	9.6.6	Cost	215
8.11	Will the questionnaire work?	188	9.7	Using an agency for fieldwork	216
8.12	Special types of questionnaire	190	9.7.1	Briefing the agency	216
8.12.1	Postal or self-completion questionnaires	190	9.7.2	Agreeing the procedures	216
8.12.2	Telephone questionnaires	192	9.7.3	Briefing the interviewers	216
8.12.3	Online questionnaires	192	9.8	Asking the questions yourself	217
8.13	Vetting questionnaires	193	9.9	Summary	218
8.14	Summary	194			
9	Who asks the questions?	195	10	What happens to the answers?	219
9.1	Introduction	197	10.1	Introduction	221
9.2	Interviewers: 'horses for courses'	198	10.2	Analysis and interpretation of qualitative data	221
9.2.1	Fully structured interviews	198	10.3	Analysis of quantitative data	223
9.2.2	Using rating scales	198	10.3.1	Data preparation	223
9.2.3	Semi-structured interviews	198	10.3.2	Data processing	226
9.2.4	Unstructured interviews	199	10.3.3	Statistical analysis	230
9.3	What do interviewers do?	200	10.4	Interpretation of quantitative data	239
9.3.1	Selecting respondents	200	10.5	Reporting	240
9.3.2	Obtaining interviews	201	10.5.1	The research report	240
9.3.3	Asking questions	202	10.6	Summary	242
9.3.4	Probing and prompting	202			
9.3.5	Motivating respondents	204	11	How do you buy good research?	243
9.3.6	Interpreting and recording responses	204	11.1	Introduction	245
9.3.7	Interviewer bias	204	11.2	Getting the research requirement right	245
9.4	Who are the interviewers?	205	11.2.1	Is research really necessary?	245
9.4.1	Gender	205	11.2.2	What type of research is needed?	246
9.4.2	Age	205	11.2.3	What will the research be used for?	246
9.4.3	Social background	206	11.2.4	When is the research needed by?	247
9.4.4	Education	206	11.2.5	How much is the research information worth?	247
9.4.5	Job background	206	11.3	Preparing the brief	249
9.4.6	Personality	206	11.4	Choosing the right agency	250
9.4.7	Training	206	11.4.1	Drawing up the shortlist	250
9.5	How are interviewers controlled?	208	11.4.2	Briefing the agencies	251
9.5.1	The Interviewer Quality Control Scheme	208	11.4.3	The research proposal	254
9.5.2	Field supervision	208	11.4.4	Selecting the research agency	258
9.5.3	Postal checking	209	11.5	Checking that the agency does a good job	261
9.5.4	Telephone checks	209	11.5.1	Monitoring while in progress	261
9.5.5	Personal recall checks	209	11.5.2	Evaluating the final results	262

11.6	Learning from experience	263	13.10	What happens to the answers?	287
11.6.1	Were the objectives right?	264	13.11	How do you buy good research?	287
11.6.2	Was the research programme right?	264	13.12	Using research in industrial markets	287
11.6.3	Was too much or too little information produced?	264	13.13	Summary	288
11.6.4	Did it help to provide a solution?	264			
11.6.5	Using feedback	265	14	Using research in online markets	289
11.6.6	What action resulted from the research?	265	14.1	Introduction	291
11.7	Buying syndicated services	265	14.2	Getting started	292
11.7.1	Defining the requirement	265	14.3	Marketing research begins at home	293
11.7.2	Does the service meet the requirement?	266	14.4	'Off-the-peg' research	294
11.7.3	Does the service provide adequate flexibility?	266	14.5	'Made-to-measure' research	297
11.7.4	Is the money worth spending?	266	14.6	How are the data collected?	302
11.8	Evaluating other research reports	266	14.7	Who provides the information?	305
11.8.1	A scheme for judging research quality	266	14.8	How are the questions asked?	306
11.9	Summary	267	14.9	Who asks the questions?	307
			14.10	What happens to the answers?	308
			14.11	How do you buy good research?	308
			14.12	Using research in online markets	308
			14.13	Summary	308
12	Using research in experiments	269	15	Using research in international markets	309
12.1	Introduction	271	15.1	Introduction	311
12.2	Types of research experiment	271	15.2	Who monitors the quality of international research?	312
12.2.1	Experimental launching	271	15.3	Who are the users?	312
12.2.2	Pilot launching	272	15.4	Who undertakes the research?	312
12.2.3	Specific market test	272	15.5	International market research begins at home	313
12.2.4	Exploratory market test	272	15.6	'Off-the-peg' research	313
12.3	Types of experimental design	273	15.7	Secondary desk research	314
12.3.1	Informal experimental designs	273	15.8	Sources	315
12.3.2	Formal experimental designs	274	15.8.1	Government published data	317
12.4	Setting up research experiments	275	15.9	'Made-to-measure' research	319
12.4.1	Selecting the experimental design	275	15.9.1	Sampling	319
12.4.2	The scale of the experiment	275	15.10	Data collection methods	320
12.4.3	Choosing the test area	276	15.11	How do you ask the questions?	321
12.4.4	Timing	276	15.12	How do you buy good research?	322
12.4.5	Test conditions	276	15.12.1	Preparing the brief	322
12.4.6	Test variables	277	15.12.2	Selecting the agency	323
12.4.7	Cost	278	15.12.3	Government assistance for overseas research	324
12.4.8	Syndicated test procedures	278	15.12.4	Commissioning the research	324
12.5	Summary	280	15.13	Implementing the research	325
			15.14	Summary	325
13	Using research in business-to-business and industrial markets	281	16	Using research in marketing decision making	327
13.1	Introduction	283	16.1	Introduction	329
13.2	Getting started	283	16.2	Guide 1: Using research for market analysis	330
13.3	Marketing research begins at home	283	16.3	Guide 2: Using research to develop new products and services	331
13.4	'Off-the-peg' research	284			
13.5	'Made-to-measure' research	284			
13.6	How are the data collected?	285			
13.7	Who provides the information?	285			
13.8	How are the questions asked?	286			
13.9	Who asks the questions?	286			

16.4	Guide 3: Using research to select brand names and pack designs	333
16.5	Guide 4: Using research for pricing decisions	335
16.6	Guide 5: Using research for decisions about advertising	336
16.7	Notes for Guide 1	338
16.8	Notes for Guide 2	340
16.9	Notes for Guide 3	342
16.10	Notes for Guide 4	346
16.11	Notes for Guide 5	347
16.12	Summary	350
17	Where do you go from here?	351
17.1	Introduction	353
17.2	Who are you and in which direction do you want to go?	353
17.2.1	Who are you?	353
17.2.2	In which direction do you want to go?	353
17.3	Developing skills as a research user	354
17.4	Developing skills as a research practitioner	357
17.5	Passing examinations	358
17.6	Further reading	358

Index

Index	361
1.1 Introduction	361
1.2 Who monitors the quality of international research?	362
1.3 Who are the research agencies to report?	363
1.4 Who undertakes the research?	363
1.5 International market research agencies	364
1.6 'Off-the-page' research agencies	365
1.7 Secondary research agencies	365
1.8 Sources of research data	366
1.8.1 Government published data	366
1.8.2 'Made-to-measure' research agencies	366
1.9 Sampling	367
1.9.1 Sampling	367
1.10 Data collection methods	367
1.11 How do you ask the questions?	367
1.12 How do you buy good research?	367
1.12.1 Preparing the brief	368
1.12.2 Selecting the agency	368
1.12.3 Government assistance for overseas research	368
1.12.4 Commissioning the research	368
1.13 Implementing the research	368
1.14 Summary	368
1.15 'Off-the-page' research	368
