Section I

Special Issue

Open Source & Collaborative Project Based Learning in Engineering Education

Guest Editors

Andrés Díaz Lantada—Universidad Politécnica de Madrid, Spain
Carmelo De Maria—Università di Pisa, Italy

Ahmad Ibrahim	1277	Editorial
Andrés Díaz Lantada and Carmelo De Maria	1278	Guest Editorial
Andrés Díaz Lantada and Carmelo de Maria	1279–1289	Towards Open-Source and Collaborative Project-Based Learning in Engineering Education: Situation, Resources and Challenges
Juan M. Munoz-Guijosa, Andrés Díaz Lantada, Javier Echávarri and Enrique Chacón	1290–1305	Using Smartphones Physical Interfaces in Engineering Education: Experiences in Promoting Student Motivation and Learning
Pilar Pazos, Stacie I. Ringleb, Jennifer Kidd and Rachel Jones	1306–1315	Scaffolding Project-Based Learning in an Engineering and Education Partnership using Open-Access Technology
William Villegas-Ch, Xavier Palacios-Pacheco, Diego Buenaño-Fernández and Sergio Luján-Mora	1316–1325	Comprehensive Learning System Based on the Analysis of Data and the Recommendation of Activities in a Distance Education Environment
Ayhan Istanbulu and Mustafa Tasci	1326–1335	Open Source Hardware—Arduino: Case Study on Mechanical Engineering Students Design Project
Manuel Vargas, Miguel Alfaro, Guillermo Fuertes, Gustavo Gatica, Sebastian Gutierrez, Soledad Vargas, Leonardo Banguera and Claudia Duran	1336–1342	CDIO Project Approach to Design Polynesian Canoes by First-Year Engineering Students
Kauser Jahan, Cheryl Bodnar, Stephanie Farrell, Ying Tang, Iman Noshadi, C. S. Slater and Demond S. Miller	1343–1352	Improving Students' Learning Behaviors Through Hands-On Algae Based Project
Emad Habib, Matthew Deshotel, Guolin Lai and Robert Miller	1353–1365	Student Perceptions of an Active Learning Module to Enhance Data and Modeling Skills in Undergraduate Water Resources Engineering Education
Divna Krpan, Saša Mladenović and Goran Zaharija	1366–1377	The Framework for Project Based Learning of Object-Oriented Programming
Gordon Hoople, Austin Choi-Fitzpatrick and Elizabeth Reddy	1378–1391	Drones for Good: Interdisciplinary Project-Based Learning Between Engineering and Peace Studies
O. Picton, R. Losada, I. Fernández De Bustos and E. Rojí	1392–1401	Glued-Wood Structure Development Contests for Project Based Learning in Engineering and Architecture Degrees
Orna Muller, Vered Dangur and Orit Braun Benyamin	1402–1414	Developing Devices for People with Disabilities: Challenges and Gains of Project-Based Service Learning
Mandy Mclean, Jasmine Mcbeath, Tyler Susko, Danielle Harlow and Julie Bianchini	1415–1424	University-Elementary School Partnerships: Analyzing the Impact of a Service-Learning Freshman Engineering Course on Students' Engineering Values and Competence Beliefs
Brenda Vilas Boas, Marcus Dias, Pedro Batista, Aurenice Oliveira and Aldebaro Klautau	1425–1435	CELCOM Project: Engineering Practice via Community Networks in Amazon
Daniel López-Fernández, Laura Raya, Fernando Ortega and José Jesús García	1436–1445	Project Based Learning Meets Service Learning on Software Development Education
M. Royo, M. Carlos, R. Izquierdo and L. Cabedo	1446–1455	Industrial Design and Social Prospect: A Service-Learning Experience for Second Course Undergraduates
Gilberto Duarte Cuzzuol, Lílian Barros Pereira Campos, Diana Mesquita and Rui M. Lima	1456–1465	Collaborative PBL to Teach Calculus to Engineering Students: The Important Role of Collaborative Professors
Eri Ota, Rie Murakami and Proadpran Pnyabukkana	1466–1479	Comparative Analysis on Effect of Multicultural Project-Based Learning Between Universities in Japan and Thailand
Danielle Miquilim and Marcia Terra da Silva	1480–1492	The Teaching of Innovative Entrepreneur Engineers: Key Factors that Contribute to Teaching-Learning Processes and University Management
Siva Chandrasekaran and Llewellyn Mann	1493–1502	Case Study of Facilitating Practice-Based Education in a Studio-Based Learning Environment

Section II

Contributions in: Global Competence, Internship, Flipped Classroom, Low Self-esteem, Industry 4.0, CDIO, Motivation, MOOC, Assessment, and Critical Thinking, Distributed Practice, Engineering Mathematics

Scott C. Streiner and Mary Besterfield-Sacre	1503–1517	Measuring the Relative Impact of International Experiences on Engineering Students: A Benchmarking Analysis
Po-Wen Cheng, Po-Wen Liu, Chin-Chung Huang and Wen-Jye Shyr	1518–1525	The Effects of the Flipped Classroom on Technical High School Students with Low Self-Esteem
Cheng-Tang Tseng, Ching-Yi Lee and Kuo-Cheng Tai	1526–1539	Development and Assessment of a Mold Design Curriculum Corresponding to Industry 4.0 Based on the CDIO Principles
Mitchell Zielinski, Victoria West, Hillary E. Merzdorf, Kerrie A. Douglas and Peter Bermel	1540–1550	Motivation and Perceived Costs to Achievement in Advanced Engineering MOOCs: A Mixed Method Study of Advanced Engineering MOOC Learners' Motivation and Perceived Barriers
Adam R. Phillips and Colin Lambie	1551–1560	Assessing Civil Engineering Students Perceptions of Their Problem Solving Ability
Ahmet Refah Torun	1561–1565	The Effect of Weekly Distributed Mathematics Homework and Quizzes on the Learning Performance of Engineering Students
	1566	Guide for Authors
