	<i>Diagram of interdependence</i>	page xi
	<i>Acknowledgements</i>	xii
	<i>Introduction</i>	1
	<i>Motivation for topologists</i>	7
	The very rough idea	8
	n -categories	9
	Stabilization	14
Part I. Background		
1	Classical categorical structures	23
1.1	Categories	24
1.2	Monoidal categories	31
1.3	Enrichment	39
1.4	Strict n -categories	40
1.5	Bicategories	49
2	Classical operads and multicategories	57
2.1	Classical multicategories	58
2.2	Classical operads	67
2.3	Further theory	81
3	Notions of monoidal category	91
3.1	Unbiased monoidal categories	92
3.2	Algebraic notions of monoidal category	101
3.3	Non-algebraic notions of monoidal category	110
3.4	Notions of bicategory	121

Part II. Operads

4	Generalized operads and multicategories: basics	131
4.1	Cartesian monads	132
4.2	Operads and multicategories	138
4.3	Algebras	150
5	Example: fc -multicategories	158
5.1	fc -multicategories	159
5.2	Weak double categories	167
5.3	Monads, monoids and modules	174
6	Generalized operads and multicategories: further theory	182
6.1	More on monads	183
6.2	Multicategories via monads	188
6.3	Algebras via fibrations	193
6.4	Algebras via endomorphisms	196
6.5	Free multicategories	200
6.6	Structured categories	202
6.7	Change of shape	206
6.8	Enrichment	213
7	Opetopes	216
7.1	Opetopes	217
7.2	Categories of pasting diagrams	225
7.3	A category of trees	230
7.4	Opetopic sets	240
7.5	Weak n -categories: a sketch	248
7.6	Many in, many out	255

Part III. n -categories

8	Globular operads	263
8.1	The free strict ω -category monad	264
8.2	Globular operads	270
8.3	Algebras for globular operads	274
9	A definition of weak n -category	279
9.1	Contractions	280
9.2	Weak ω -categories	284
9.3	Weak n -categories	290
9.4	Weak 2-categories	303
10	Other definitions of weak n -category	309
10.1	Algebraic definitions	310
10.2	Non-algebraic definitions	318

Appendices

A	Symmetric structures	333
A.1	Commutative monoids	333
A.2	Symmetric multicategories	336
B	Coherence for monoidal categories	342
B.1	Unbiased monoidal categories	345
B.2	Classical monoidal categories	349
C	Special cartesian monads	355
C.1	Operads and algebraic theories	356
C.2	Familiably representable monads on Set	362
C.3	Familiably representable monads on presheaf categories	372
C.4	Cartesian structures from symmetric structures	379
D	Free multicategories	389
D.1	Proofs	390
E	Definitions of tree	396
E.1	The equivalence	396
F	Free strict n -categories	399
F.1	Free enriched categories	401
F.2	Free n - and ω -categories	403
G	Initial operad-with-contraction	407
G.1	The proof	407
	<i>References</i>	411
	<i>Index of notation</i>	417
	<i>Index</i>	423
