

# TABLE OF CONTENTS

<b>Table of contents .....</b>	<b>iii</b>
<b>1. Introduction .....</b>	<b>1</b>
<b>2. Brief specification of Prague, London and Barcelona metro.....</b>	<b>4</b>
<b>2.1. Prague .....</b>	<b>4</b>
<b>2.1.1 Brief history of Prague Metro .....</b>	<b>4</b>
<b>2.1.2 Engineering geological conditions of Prague Metro .....</b>	<b>4</b>
<b>2.1.3 Tunnelling procedures .....</b>	<b>6</b>
<b>2.1.4 Monitored sections description .....</b>	<b>8</b>
<b>2.2. London.....</b>	<b>8</b>
<b>2.2.1 Brief history of London underground .....</b>	<b>8</b>
<b>2.2.2 Geology .....</b>	<b>9</b>
<b>2.2.3 Monitored section description .....</b>	<b>10</b>
<b>2.3. Barcelona .....</b>	<b>10</b>
<b>2.3.1 Barcelona Metro .....</b>	<b>10</b>
<b>2.3.2 Geological conditions .....</b>	<b>11</b>
<b>2.3.3 Monitored section description .....</b>	<b>12</b>
<b>2.4. Figures for Chapters 1 and 2 .....</b>	<b>13</b>
<b>3. Verification of new technologies from the view of underground structures ageing.....</b>	<b>21</b>
<b>3.1. MEMS strain sensors.....</b>	<b>21</b>
<b>3.1.1 MEMS resonant strain sensor .....</b>	<b>21</b>
<b>3.1.2 H-shape MEMS Strain sensor .....</b>	<b>23</b>
<b>3.1.3 MEMS disk resonator strain sensor.....</b>	<b>24</b>
<b>3.2. MEMS – geophysical sensors .....</b>	<b>24</b>
<b>3.2.1 Introduction .....</b>	<b>24</b>
<b>3.2.2 Initial assumptions for the solution.....</b>	<b>26</b>
<b>3.2.3 Monitoring of the tunnel lining dynamic response time development .....</b>	<b>28</b>
<b>3.2.4 Laboratory fatigue test .....</b>	<b>40</b>
<b>3.2.5 Monitoring of elastic oscillation propagation parameters .....</b>	<b>47</b>
<b>3.3. Fibre optics .....</b>	<b>48</b>
<b>3.3.1 Continuous strain measurements .....</b>	<b>48</b>
<b>3.3.2 Optical fibres .....</b>	<b>49</b>
<b>3.3.3 Optical fibres evaluation .....</b>	<b>50</b>
<b>3.4. Computer vision.....</b>	<b>50</b>
<b>3.4.1 Mosaicing .....</b>	<b>50</b>
<b>3.4.2 Features determination.....</b>	<b>52</b>
<b>3.5. Laser Scanning.....</b>	<b>53</b>
<b>3.6. Wireless sensor network - WSN .....</b>	<b>55</b>
<b>3.6.1 Wireless sensor network for data collection .....</b>	<b>56</b>
<b>3.6.2 Network geometry.....</b>	<b>57</b>
<b>3.6.3 Wireless Data Transfer .....</b>	<b>58</b>
<b>3.6.4 Network performance .....</b>	<b>59</b>
<b>3.7. Figures for Chapter 3 .....</b>	<b>61</b>
<b>4. Results of measurement and modelling .....</b>	<b>85</b>
<b>4.1. Whole tunnel profile .....</b>	<b>85</b>
<b>4.1.1 Convergence measurement .....</b>	<b>85</b>
<b>4.1.2 Tilt meters .....</b>	<b>86</b>
<b>4.1.3 Inclinometers connected to WSN .....</b>	<b>87</b>
<b>4.1.4 Computer vision.....</b>	<b>88</b>

4.1.5	<i>Laser scanning</i> .....	89
4.1.6	<i>Optical fibres</i> .....	90
4.1.7	<i>Numerical modelling</i> .....	93
4.1.8	<i>Figures for Chapter 4.1</i> .....	100
4.2.	<i>Micro-measurement of tunnel lining</i> .....	115
4.2.1	<i>Classical crack meter - direct monitoring</i> .....	115
4.2.2	<i>Classical crack meter connected to WSN</i> .....	116
4.2.3	<i>MEMS strain sensor - deployment in the tunnel of the Prague metro</i> .....	117
4.2.4	<i>Computer vision – cracks detection</i> .....	119
4.2.4	<i>Numerical modelling</i> .....	119
4.2.5	<i>Figures for Chapter 4.2</i> .....	122
4.3.	<i>Change of concrete lining properties – MEMS - geophysical sensors</i> .....	129
4.3.1	<i>Figures for Chapter 4.3</i> .....	135
5.	<b>Conclusion</b> .....	137
6.	<b>References</b> .....	141
