|-----------------------------------------------------------------------------------------------------------------------------|-----------|
| <b>Introduction . . . . .</b>                                                                                               | <b>xi</b> |
| Yves GIRAULT                                                                                                                |           |
| <b>Part 1. Objectives, Issues and Tensions Related to<br/>the Patrimonialization of Nature . . . . .</b>                    | <b>1</b>  |
| <b>Chapter 1. Natural Heritage, Participatory Democracy and UNESCO:<br/>a Structure of Disillusionment? . . . . .</b>       | <b>3</b>  |
| Igor BABOU                                                                                                                  |           |
| 1.1. Introduction. . . . .                                                                                                  | 3         |
| 1.2. The participation in question. . . . .                                                                                 | 4         |
| 1.3. A brief history of participatory mechanisms<br>and environmental democracy . . . . .                                   | 4         |
| 1.4. Critical assessments of participatory mechanisms<br>and environmental democracy . . . . .                              | 7         |
| 1.5. Points of tension within protected natural areas . . . . .                                                             | 11        |
| 1.5.1. The significant dimension of the devices . . . . .                                                                   | 13        |
| 1.5.2. The proliferation and professionalization of intermediaries . . . . .                                                | 14        |
| 1.5.3. Standardization of participation models. . . . .                                                                     | 15        |
| 1.6. The example of the Lanzarote geopark:<br>top-down approach and brand logic . . . . .                                   | 15        |
| 1.7. Conclusion: the democratic consequences<br>of the contradictions of participation . . . . .                            | 17        |
| 1.8. References . . . . .                                                                                                   | 19        |
| <b>Chapter 2. The Ambivalences of the Co-construction<br/>of a Mental Territory: a Case Study on Spanish UGGs . . . . .</b> | <b>23</b> |
| Catalina GONZALEZ TEJADA and Yves GIRAULT                                                                                   |           |
| 2.1. Introduction. . . . .                                                                                                  | 23        |

|                                                                                                                                             |    |
|---------------------------------------------------------------------------------------------------------------------------------------------|----|
| 2.2. Problematic issues . . . . .                                                                                                           | 24 |
| 2.3. Methodology and construction of the corpus . . . . .                                                                                   | 27 |
| 2.4. The construction of the story of the mental territory<br>of the Spanish geoparks . . . . .                                             | 28 |
| 2.4.1. First initiatives to protect geological aspects in Spain . . . . .                                                                   | 29 |
| 2.4.2. Various definitions of geological heritage in Spain . . . . .                                                                        | 31 |
| 2.4.3. Cultural enhancement of geological heritage:<br>a disciplinary approach between protection and<br>dissemination of geology . . . . . | 35 |
| 2.5. Conclusion . . . . .                                                                                                                   | 47 |
| 2.6. References . . . . .                                                                                                                   | 48 |

**Chapter 3. The History of the Earth as a New Form of Territorial  
Marketing: the Case of the Geopark of the Tremp-Montsec Basin  
(Spain) . . . . . 53**

|                                                                                                       |    |
|-------------------------------------------------------------------------------------------------------|----|
| Fabien VAN GEERT . . . . .                                                                            | 53 |
| 3.1. Introduction. . . . .                                                                            | 53 |
| 3.2. Economic development and the use of heritage<br>in the Catalan Pyrenees . . . . .                | 55 |
| 3.3. The protection of Catalan geological heritage<br>and its valorization through geoparks . . . . . | 57 |
| 3.4. The Tremp-Montsec Basin Geopark Project<br>and the creation of a territory brand . . . . .       | 63 |
| 3.5. The declaration of the Tremp Geopark<br>and the definition of its future challenges. . . . .     | 71 |
| 3.6. References . . . . .                                                                             | 74 |

**Chapter 4. Patrimonialization and the Geopark Label:  
for Which Development Model in the South?  
The Case of Morocco. . . . . 77**

|                                                                                                                                         |    |
|-----------------------------------------------------------------------------------------------------------------------------------------|----|
| Ouidad TEBAÄ and Saïd BOUJROUF . . . . .                                                                                                | 77 |
| 4.1. Introduction. . . . .                                                                                                              | 77 |
| 4.2. Geopark in Morocco: new label, new territory<br>and new heritage process . . . . .                                                 | 78 |
| 4.2.1. The relationship to heritage and patrimonialization in Morocco:<br>between identity, museumization and commodification . . . . . | 78 |
| 4.2.2. What is the debate on the social acceptability<br>and local utility of geoparks? . . . . .                                       | 79 |
| 4.3. Challenges in the territorial construction of geoparks<br>and their heritage development . . . . .                                 | 82 |

|                                                                                                                                |    |
|--------------------------------------------------------------------------------------------------------------------------------|----|
| 4.3.1. Challenges in the fight against poverty<br>and/or heritage preservation . . . . .                                       | 83 |
| 4.3.2. Challenges of intersectoral articulation and integration . . . . .                                                      | 84 |
| 4.3.3. Governance challenges for geoparks projects: involving residents . . . . .                                              | 86 |
| 4.4. Questions and reservations about the contribution<br>of a UNESCO model of geoparks for development in the South . . . . . | 88 |
| 4.5. References . . . . .                                                                                                      | 90 |

## **Chapter 5. The Evolution of the Economics of Culture and its Influence on the Development of Geoparks . . . . . 91**

François MAIRESSE

|                                                                 |     |
|-----------------------------------------------------------------|-----|
| 5.1. Introduction. . . . .                                      | 91  |
| 5.2. Museums and heritage sites in the market economy . . . . . | 92  |
| 5.3. The economic discourse on heritage . . . . .               | 95  |
| 5.4. Economic evaluation . . . . .                              | 97  |
| 5.5. From the cultural economy to the creative economy. . . . . | 99  |
| 5.6. The economic challenges of geopark development . . . . .   | 102 |
| 5.7. References . . . . .                                       | 104 |

## **Part 2. Heritage Inventory and Conservation . . . . . 109**

## **Chapter 6. Methodological Proposal for the Valorization of the Geodiversity of Rural Areas Comparable with the Zat Valley . . . . . 111**

Joan POCH, Antonio TEIXELL, David GÓMEZ-GRAS, Francisco José MARTÍNEZ,  
Esteve CARDELLACH and José Luis BRIANSÓ

|                                                                                                       |     |
|-------------------------------------------------------------------------------------------------------|-----|
| 6.1. Introduction. . . . .                                                                            | 111 |
| 6.2. Geological context of the study area . . . . .                                                   | 111 |
| 6.3. Objectives. . . . .                                                                              | 116 |
| 6.4. Methodology . . . . .                                                                            | 116 |
| 6.5. SWOT analysis and diagnosis . . . . .                                                            | 116 |
| 6.6. Results: methodological proposal. . . . .                                                        | 118 |
| 6.6.1. Geoethics framework . . . . .                                                                  | 118 |
| 6.6.2. Assessment of the geodiversity. . . . .                                                        | 119 |
| 6.6.3. Selection of sites of geological interest for scientific,<br>didactic or tourist use . . . . . | 123 |
| 6.6.4. Geosites of scientific interest: fostering scientific research . . . . .                       | 126 |
| 6.6.5. Geosites of didactic interest: fostering the teaching of geology. . . . .                      | 126 |
| 6.6.6. Geosites of geotourism interest: fostering sustainable tourism . . . . .                       | 127 |
| 6.7. Discussion and conclusion . . . . .                                                              | 128 |
| 6.8. References . . . . .                                                                             | 129 |

## **Chapter 7. Interpreting Landscapes from a Socioecological Perspective: a Methodological Approach from the Zat Valley (Morocco) . . . . . 133**

Martí BOADA JUNCA, Roser MANEJA ZARAGOZA, Jaume MARLÈS MAGRE,  
Josep Antoni PUJANTELL ALBÓS, Sònia SÀNCHEZ-MATEO and Carles BARRIOCANAL  
LOZANO

|                                                                            |     |
|----------------------------------------------------------------------------|-----|
| 7.1. Introduction. . . . .                                                 | 133 |
| 7.2. Methodology . . . . .                                                 | 136 |
| 7.2.1. Chromatic assessment and identification of landscape units. . . . . | 136 |
| 7.2.2. Socioecological transects . . . . .                                 | 136 |
| 7.2.3. Study area: Zat Valley (Atlas Mountains, Morocco) . . . . .         | 138 |
| 7.3. Results and discussion . . . . .                                      | 139 |
| 7.3.1. Chromatic assessment . . . . .                                      | 139 |
| 7.4. Conclusions. . . . .                                                  | 142 |
| 7.5. Acknowledgments. . . . .                                              | 143 |
| 7.6. References . . . . .                                                  | 143 |

## **Chapter 8. The Feeling of Archaeology and the Sense of History in the Mixteca Alta Geopark . . . . . 147**

Francisco VALDEZ

|                                                  |     |
|--------------------------------------------------|-----|
| 8.1. Introduction. . . . .                       | 147 |
| 8.2. The park. . . . .                           | 149 |
| 8.3. The people . . . . .                        | 153 |
| 8.4. Archaeology: the marks of history . . . . . | 158 |
| 8.4.1. A communal feast . . . . .                | 162 |
| 8.5. Conclusion . . . . .                        | 165 |
| 8.6. References . . . . .                        | 166 |

## **Chapter 9. One of the First Rock Art Sites Discovered and Now Protected in Morocco: the Case of Azrou Iklane (Assa Region, Morocco) . . . . . 169**

Gwenola GRAFF, Maxence BAILLY, Abdelhadi EWAGUE and Martin LOYER

|                                                                                                                                      |     |
|--------------------------------------------------------------------------------------------------------------------------------------|-----|
| 9.1. Introduction: presentation of the site and scientific interest . . . . .                                                        | 169 |
| 9.2. Contemporary situation of the site . . . . .                                                                                    | 171 |
| 9.3. History of searches on the site. . . . .                                                                                        | 172 |
| 9.4. Work of the French team and interest from local authorities. . . . .                                                            | 172 |
