

Contents

Foreword
Preface

	xvii	4. Virus Replication	
	xix	Growth of Viruses	39
		The Virus Replication Cycle	41
		Attachment	42
		Penetration and Uncoating	43
		Replication of Viral Nucleic Acids	45
		Overview of Viral Gene Expression Strategies	47
		Regulatory Genes and Post-transcriptional Processing	49
		Assembly and Release	51
		Satellite Viruses and Viroids	53
		Hepatitis Delta Virus	53
		Generation of Genetic Diversity	53
		Quantitative Virus Assays	53
		Defective Interfering Viruses	54
		Further Reading	55
		5. Innate Immunity	
	15	Innate Responses	57
	22	Monocytes, Macrophages, and Dendritic Cells	57
	22	The Role of Natural Killer (NK) Cells and the Link with Adaptive Immunity	58
	23	The Importance of Molecular Recognition	59
	23	Interferons	60
	23	Cell Death and Apoptosis	63
	25	Evasion Strategies	63
	25	Further Reading	64
		6. Adaptive Immune Responses to Infection	
	27	Overview of the Adaptive Immune Responses to Viral Infection	65
	27	B Lymphocytes	67
	28	T Lymphocytes	67
	29	T Helper (Th) Lymphocytes	69
	30	Cytotoxic T (Tc) Lymphocytes	69
	32	γ/δ T Lymphocytes	69
	33	The Major Histocompatibility Complex (MHC) and Antigen Presentation	70
	34	The Exogenous Pathway of Antigen Presentation	71
	35	The Endogenous Pathway	71
	35	Antibodies	72

Part I Principles of Virology

1. History and Impact of Virology

Why Study Virology?	3
A Brief History of Virology	4
The Virosphere	9
The Nature of Viruses	10
Scope of This Book	13
Further Reading	14

2. Classification of Viruses and Phylogenetic Relationships

Viral Taxonomy	15
Viral Nomenclature	22
Formal Usage	22
Informal Usage	22
Groupings of Viruses on the Basis of Epidemiological Criteria	23
Taxonomy and the Causal Relationship Between Virus and Disease	23
Genome Sequencing and Virus Evolution	25
Further Reading	25

3. Virion Structure and Composition

Physical Methods for Studying Virus Structure	27
Electron Microscopy	27
X-Ray Crystallography of Viruses	28
Chemical Composition of Virions	29
Viral Nucleic Acids	30
Viral Proteins	32
Viral Envelope Lipids	33
Viral Envelope Proteins	33
Virion Symmetry	33
Icosahedral Symmetry	34
Helical Symmetry	35
The Function of Viral Capsids and Envelopes	35
Stability of Viral Infectivity	36
Further Reading	37

Cytokines	73
Recovery from Viral Infection	73
Immune Cytolysis of Virus-Infected Cells	74
Complement	74
Role of Antibody	74
Neutralization of Viral Infectivity by Antibodies	75
Immunity to Reinfection	75
Immunological Memory	76
Further Reading	76
7. Pathogenesis of Virus Infections	
The Incoming Virus Inoculum	77
Routes of Entry—A Major Factor Governing the Specific Pattern of Infection	77
Virus Entry via the Respiratory Tract	78
Virus Entry via the Alimentary Tract	78
Virus Entry via the Skin	80
Virus Entry via the Genitourinary Tract	80
Virus Entry via the Eyes	80
Vertical Transmission	81
Mechanisms of Virus Spread Within the Body	82
Local Spread of Virus on Epithelial Surfaces	82
Mechanisms of Virus Spread to Distant Target Organs	83
Virus Infection of Target Organs	87
The Skin as a Target Organ	88
Virus Infection of the Central Nervous System	88
Virus Infection of Other Organs	91
Virus Infection of the Fetus	91
Persistent Virus Infections—Mechanisms Influencing Persistence	91
Reduction or Absence of Either Viral Gene Expression or Cytocidal Activity	93
Evasion of the Immune Response	93
Virus-Induced Immunosuppression	94
Mechanisms of Disease Production	95
Damage to Tissues and Organs Caused by Virus Replication	95
Immunopathology—Cell Damage Caused by Immunological Processes	97
Viruses and Immunosuppression	100
Immunosuppression Caused by Viral Infection	100
Viral Infections in Immunocompromised Patients	100
Viral Virulence and Host Resistance to Infection	100
Genetic Factors Affecting Viral Virulence	101
Host Genetic Factors Affecting Virulence	102
Physiological and Other Host Factors Affecting Virulence	103
Co-Infections	104
Further Reading	104
8. Patterns of Infection	
Transient Localized Infections	105
Transient Systemic Infections	107
Persistent Infections	108
Persistent Localized Infections	109
Persistent Systemic Infections	111
Acute Infections with Rare Late Complications	111
Latent Infections with Reactivation	112
Chronic Infections with Ongoing Viral Replication	116
Further Reading	119
9. Mechanisms of Viral Oncogenesis	
Definitions and Overview of Virus Transformation	121
Oncogenes and Tumor Suppressor Genes	123
Tumor Suppressor Genes	125
Multi-Step Oncogenesis	125
Oncogenesis by Retroviruses	126
Transducing Retroviruses	126
Cis-Activating Retroviruses	127
Trans-Activating Retroviruses	128
Oncogenesis by Small DNA Viruses	128
Tumors Induced by Papillomaviruses	129
Tumors Induced by Polyomaviruses and Adenoviruses	130
Oncogenesis by Large DNA Viruses	130
Epstein-Barr Virus and Burkitt's Lymphoma	131
Nasopharyngeal Carcinoma and Epstein-Barr Virus	132
Lymphoproliferative Disorders (LPD) and Other Tumors	132
Human Herpesvirus 8	132
Tumors Induced by Poxviruses	132
Other Important Viruses Associated with Cancers	133
Hepadnaviruses	133
Hepatitis C Virus	133
Human Immunodeficiency Virus (HIV)	133
The Prevention and Management of Virally Induced Tumors	134
Further Reading	134
10. Laboratory Diagnosis of Virus Diseases	
Rationale for Performing Laboratory Virus Diagnosis	135
Collection, Packaging, and Transport of Samples	137
Direct Identification of Virus, Viral Antigen, or Viral Genome	138
Direct Detection of Virions by Electron Microscopy	138
Detection of Viral Antigens	138
Detection of Viral Nucleic Acids	142

Virus Isolation	146	Nucleoside Analogs in Hepatitis B	179
Further Characterization of Viruses Detected	147	Inhibitors of Viral Proteases	180
Measurement of Serum Antibodies	149	Direct-acting Antiviral Drugs for Hepatitis C	
Diagnosis of Acute Infection by		Virus Infection	180
Demonstrating a Rise in Antibody	149	Inhibitors of Viral Integration	180
Immunoglobulin M Class-Specific Antibody		Neuraminidase Inhibitors	180
Assays	150		
Immunoblotting ("Western Blotting")	150	Newer Approaches Under Development	181
Applications of Serology	151	Virus-Specific Oligonucleotides	181
Sensitivity and Specificity	152	Inhibitors of Regulatory Proteins	183
Interpretation of Laboratory Results	152	Microbicides	183
Laboratory Safety	153		
Further Reading	154	Further Reading	183
11. Vaccines and Vaccination			
Vaccine Design and Production	155	13. Epidemiology of Viral Infections	
Attenuated Virus Vaccines	156	Mechanisms of Virus Survival	185
Inactivated Virus Vaccines	158	Viral Shedding and Routes of Transmission	185
Vaccines Produced by Alternative Methods	158	Respiratory and Oropharyngeal Route	186
Methods for Enhancing Immunogenicity	162	Gastrointestinal Route	188
Vaccine Safety, Efficacy, and Practical Usage	162	Cutaneous Route	188
Factors Affecting Vaccine Safety	163	Genitourinary Route	188
Vaccination During Pregnancy	165	Blood-Borne Route	188
Vaccination of Immunocompromised Persons	165	Ophthalmic Route	189
Passive Protection	165	Milk-Borne Route	189
Vaccination Policy and Programs	165	Vertical Transmission	189
Recently Introduced or Under-Utilized Viral		No Shedding	189
Vaccines	166		
Therapeutic Immunization—a Goal for the		Factors Affecting the Dynamics of Viral	
Future?	167	Infections	189
Commercial Aspects of Vaccine Manufacture	167	Transmissibility	189
Further Reading	167	Seasonality	190
12. Antiviral Chemotherapy			
Strategies for the Development of Antiviral		Critical Community Size	194
Agents	169	Effects of Immunity	195
Clinical Application	172	Persistent Infections	195
Formulation and Methods of Delivery	172	Involvement of Non-human Reservoirs	196
Emergence of Drug-Resistant Mutants	172	Arthropod Transmission	196
Clinical Strategies	173	Nosocomial and Iatrogenic Transmission	198
Mechanisms of Action and Role of Individual		Epidemiological Investigations	198
Antiviral Drugs	174	Definitions of Disease Activity: Incidence	
Interferons	174	and Prevalence	198
Blocking Attachment or Fusion	174	Laboratory Approaches	199
Blocking Uncoating—Ion Channel Blockers	175	Routine Surveillance	200
Inhibitors of Viral DNA Polymerase	176	Cross-Sectional, Case-Control, Cohort,	
Acycloguanosine (Acyclovir) and Homologs	176	and Long-Term Population Studies	201
Ganciclovir	178	Human Volunteer Studies	201
Acyclic Nucleoside Phosphonates	178	Outbreak Investigation	202
Trisodium Phosphonoformate		Mathematical Modeling	202
(PFA, Foscarnet)	178	Epidemiological Parameters	202
Inhibitors of RNA Virus Replication	178	Further Reading	203
Inhibitors of Reverse Transcriptase	179		
14. Control, Prevention, and Eradication			
Surveillance and Modeling of Virus Diseases			
Measures to Minimize Transmission			
Quarantine and Isolation			207
Measures to Reduce Enteric Spread			207
Measures to Reduce Respiratory Spread			208

Measures to Reduce Spread of Sexually Transmitted Infections	208
Measures to Reduce the Spread of Blood-Borne Infections	209
Vector Control	209
Immunization	210
Active Immunization Policy	210
Passive Immunization	213
The WHO Expanded Program on Immunization and Other Initiatives	214
Eradication	214
Bioterrorism	216
Further Reading	216
 15. Emerging Virus Diseases	
Increased Recognition and Changes in Disease Patterns	217
Factors Affecting Emergence	218
Climate Change	219
Ease of Travel	219
Animals as a Source of Human Diseases	220
Wild Animal Populations	220
Domestic Livestock and Poultry	222
Companion and Captive Animals	223
Prevention and Control	224
Further Reading	225
 Part II	
Specific Virus Diseases of Humans	
 16. Poxviruses	
Properties of Poxviruses	229
Classification	229
Virion Properties	229
Viral Replication	232
Diseases Caused by Members of the Genus <i>Orthopoxvirus</i>	232
Vaccinia Virus Infection	232
Human Buffalopox	233
Human Monkeypox	234
Human Cowpox	234
Diseases Caused by Members of the Genus <i>Molluscipoxvirus</i>	235
Molluscum Contagiosum	235
Diseases Caused by Members of the Genus <i>Yatapoxvirus</i>	236
Human Yabapox and Tanapox	236
Diseases Caused by Members of the Genus <i>Parapoxvirus</i>	236
Milker's Nodule	236
Orf	236
Further Reading	236
 17. Herpesviruses	
Properties of the Viruses	237
Classification	237
Virion Properties	237
Viral Replication	240
Herpes Simplex Virus Infection	242
Clinical Features	242
Pathogenesis, Pathology, and Immunity	244
Laboratory Diagnosis	245
Epidemiology, Prevention, Control, and Therapeutics	246
Prevention and Control	246
Therapeutics	247
Vaccines	247
Varicella-Zoster Virus Infection	247
Clinical Features	248
Laboratory Diagnosis	249
Epidemiology, Prevention, Control, and Therapeutics	249
Cytomegalovirus Infection	250
Clinical Features	250
Pathogenesis, Pathology, and Immunity	251
Laboratory Diagnosis	253
Epidemiology, Prevention, Control, and Therapeutics	254
Human Herpesviruses 6 and 7 (HHV-6 and HHV-7) Infection	255
Properties of HHV-6 and HHV-7	255
Clinical Features	255
Pathogenesis, Pathology, and Immunity	255
Laboratory Diagnosis	256
Epidemiology, Prevention, Control, and Therapeutics	256
Epstein-Barr Virus Infection	256
Clinical Features	256
Pathogenesis, Pathology, and Immunity	257
Laboratory Diagnosis	257
Epidemiology, Prevention, Control, and Therapeutics	259
Human Herpesvirus 8 (HHV-8: Kaposi's Sarcoma-Associated Herpesvirus) Infection	260
B Virus (Macacine Herpesvirus 1) Infection	261
Further Reading	261
 18. Adenoviruses	
Classification	263
Properties of Adenoviruses	264
Virus Replication	265
Adenovirus Diseases	267
Clinical Features	267
Pathogenesis, Pathology, and Immunity	269
Laboratory Diagnosis	270
Epidemiology, Prevention, Control, Treatment	270

Adenoviruses as Vectors for the Delivery of Heterologous DNA	271	Viral Replication	300
Further Reading	271	Clinical Features and Pathogenesis of Hepatitis B	302
19. Papillomaviruses		Laboratory Diagnosis	304
Classification	273	Hepatocellular Carcinoma	305
Properties of Papillomaviruses	274	Epidemiology	306
Viral Replication	274	Management of Hepatitis B Patients	307
Clinical Features	277	Prevention and Control	308
Genital Infections	277	Hepatitis Delta Virus	309
Cervical Cancer	277	Classification	310
Respiratory Papillomatosis	277	Virion Properties	310
Oral Infections	278	Viral Replication	310
Skin Warts	278	Clinical Features	312
Pathogenesis and Immunity	279	Pathogenesis	312
Natural History of Genital HPV Infection	280	Laboratory Diagnosis	312
Laboratory Diagnosis	280	Epidemiology	313
Epidemiology	281	Treatment and Prevention	314
Treatment and Prevention	282	Further Reading	315
Further Reading	282		
20. Polyomaviruses		23. Retroviruses	
Classification, Properties, and Replication	283	Properties of <i>Retroviridae</i>	317
Pathogenesis	284	Viral Replication	318
BK Polyomavirus	286	Human T Cell Lymphotropic Viruses	320
JC Polyomavirus	287	Viral Replication	322
Other Recently Described Human Polyomaviruses	288	Pathogenesis	323
Further Reading	288	Clinical Features	323
21. Parvoviruses		Laboratory Diagnosis	323
Classification	289	Epidemiology	324
Properties of Parvoviridae	289	Control	325
Viral Replication	290	Human Immunodeficiency Viruses	325
Parvovirus B19	290	Properties of Human Immunodeficiency Viruses	325
Pathogenesis and Immunity	290	Replication of HIV	326
Clinical Features	293	Function of the Accessory Proteins	328
Erythema Infectiosum	293	Pathogenesis	329
Transient Aplastic Crisis	294	Genetic Variation among HIV Isolates	331
Other Complications of Parvovirus B19 Infection	294	Latency and Virus Reservoirs	332
Laboratory Diagnosis	294	Clinical Features	332
Epidemiology	295	Laboratory Diagnosis	336
Treatment and Control	295	Epidemiology of HIV Infection	337
Dependoviruses	295	Management of the HIV-Infected Patient	339
Human Bocaviruses	295	Control	340
Further Reading	296	Simian Immunodeficiency Virus and the Origins of HIV/AIDS	343
22. Hepatitis B and Hepatitis Delta Viruses		Subfamily <i>Spumavirinae</i>	344
Hepatitis B Virus	297	Further Reading	344
Classification	297		
Virion Properties	297	24. Reoviruses	
		Properties of <i>Reoviridae</i>	345
		Viral Replication	345
		Rotavirus Gastroenteritis	348
		Properties of Rotaviruses	348
		Pathogenesis and Immunity	348
		Clinical Features	349

Laboratory Diagnosis	349
Epidemiology	350
Treatment and Control	350
Orbiviruses	351
Coltiviruses	352
Orthoreoviruses	352
Further Reading	353
25. Orthomyxoviruses	
Properties of Orthomyxoviruses	355
Classification	355
Virion Properties	356
Viral Replication	356
Influenza	358
Clinical Features	358
Pathogenesis	359
Laboratory Diagnosis	360
Epidemiology	360
Treatment	361
Immunization	363
Prevention and Control	364
Further Reading	365
26. Paramyxoviruses	
Properties of Paramyxoviruses	367
Classification	367
Virion Properties	367
Viral Replication	369
Respiratory Syncytial Virus Infection	371
Clinical Features	371
Pathogenesis, Pathology, and Immunity	372
Laboratory Diagnosis	372
Epidemiology, Chemotherapy, Control, and Prevention	373
Parainfluenza Virus Infections	373
Epidemiology and Clinical Profile	373
Laboratory Diagnosis	373
Treatment and Prevention	374
Human Metapneumovirus Infection	374
Measles	374
Clinical Features	374
Pathogenesis, Pathology, and Immunity	374
Laboratory Diagnosis	376
Epidemiology, Prevention, and Control	377
Mumps	377
Henipavirus Infections	378
Epidemiology of Henipavirus Infections	379
Virological Properties	380
Clinical Features and Pathology	380
Treatment and Prevention	381
Further Reading	381
27. Rhabdoviruses	
Properties of Rhabdoviruses	383
Classification	383
Virion Properties	383
Viral Replication	384
Rabies	386
Clinical Features	386
Pathogenesis, Pathology, and Immunity	387
Laboratory Diagnosis	388
Epidemiology	388
Post-Exposure Prophylaxis	390
Pre-Exposure Vaccination	391
Treatment	391
Control	391
Rabies in Bats	393
Vesicular Stomatitis and Other Rhabdoviruses	394
Further Reading	394
28. Filoviruses	
Properties of Bunyaviruses	395
Classification	395
Virion Properties	398
Viral Replication	399
Ebola and Marburg Virus Disease (Ebola and Marburg Hemorrhagic Fever)	400
Clinical Features	400
Pathogenesis, Pathology, and Immunity	401
Laboratory Diagnosis	402
Epidemiology, Prevention, Control, and Treatment	403
Further Reading	405
29. Bunyaviruses	
Properties of Bunyaviruses	407
Classification	407
Virion Properties	408
Viral Replication	411
Diseases Caused by Members of the Genus <i>Orthobunyavirus</i>	411
La Crosse Virus Encephalitis and Other California Serogroup Infections	411
Oropouche Fever	412
Bunyamwera Virus Infection	412
Ngari Virus Infection	412
Diseases Caused by Members of the Genus <i>Phlebovirus</i>	413
Rift Valley Fever	413
Sandfly Fever	416
Severe Fever with Thrombocytopenia Syndrome Virus (SFTSV) and Other Phlebovirus Infections of Humans	416

Diseases Caused by Members of the Genus <i>Nairovirus</i>	417	Epidemiology	445
Crimean-Congo Hemorrhagic Fever	417	Treatment and Prevention	446
Diseases Caused by Members of the Genus <i>Hantavirus</i>	419	Further Reading	446
Hemorrhagic Fever with Renal Syndrome	419		
Hantavirus Cardiopulmonary Syndrome	422		
Further Reading	424		
30. Arenaviruses		32. Picornaviruses	
Properties of Arenaviruses	425	Properties of Picornaviruses	447
Classification	425	Classification	447
Virion Properties	426	Virion Properties	447
Viral Replication	426	Virus Replication	447
Lymphocytic Choriomeningitis Virus Infection	428	Poliomyelitis	450
Clinical Features	429	Pathogenesis and Immunity	450
Pathogenesis, Pathology, and Immunity	431	Clinical Features of Poliomyelitis	451
Laboratory Diagnosis	431	Laboratory Diagnosis	452
Epidemiology, Prevention, Control, and Treatment	432	Epidemiology	453
Lassa Fever	432	Poliovirus Vaccines—Two Alternative Strategies	453
Clinical Features	432	Progress in Poliomyelitis Eradication	455
Pathogenesis, Pathology, and Immunity	433		
Laboratory Diagnosis	433		
Epidemiology, Prevention, Control, and Treatment	434		
Lujo Virus Infection	434	Enteroviruses A, B, C, D, and Parechoviruses	455
South American Hemorrhagic Fevers	434	Pathogenesis and Immunity	455
Clinical Features	434	Clinical Syndromes	456
Pathogenesis, Pathology, and Immunity	435	Diseases Caused by Enteroviruses A, B, C, D, and Parechoviruses	456
Laboratory Diagnosis	435	Other Possible Associations	458
Epidemiology, Prevention, Control, and Treatment	435	Laboratory Diagnosis	458
Further Reading	436	Epidemiology	459
31. Coronaviruses		Human Rhinoviruses A, B, and C	459
Properties of Coronaviruses	437	Pathogenesis and Immunity	459
Classification	437	Clinical Features	459
Structure and Genome	437	Laboratory Diagnosis	459
Viral Replication	440	Epidemiology	460
Pathogenesis and Immunity	441	Control	460
Human Coronavirus Infections	442	Hepatitis A (HAV)	460
Respiratory Coronavirus Infections	442	Properties of Hepatovirus	460
Clinical Features	442	Viral Replication	461
Laboratory Diagnosis	442	Pathogenesis, Immunity, and Clinical Features	461
Epidemiology	442	Laboratory Diagnosis	461
Severe Acute Respiratory Virus (SARS-CoV)	442	Epidemiology	462
Clinical Features and Pathogenesis	442	Control	462
Laboratory Diagnosis	444	Further Reading	463
Epidemiology	444		
Treatment and Prevention	445		
Middle East Respiratory Virus (MERS-CoV)	445		
Clinical Features and Pathogenesis	445		
Laboratory Diagnosis	445		
33. Caliciviruses		Classification	465
		Virion Properties	465
		Virus Replication	466
		Calicivirus (Norovirus and Sapovirus)	
		Gastroenteritis	468
		Clinical Features	468
		Pathogenesis, Pathology, and Immunity	468
		Laboratory Diagnosis	468
		Epidemiology, Prevention, Control, and Treatment	468
		Further Reading	471

34. Astroviruses

Properties of Astroviruses	473	Pathogenesis, Pathology, and Immunity	498
Classification	473	Laboratory Diagnosis	498
Virion Properties	473	Epidemiology, Prevention, Control, and Treatment	499
Viral Replication	473		
Clinical Features	475	Dengue	499
Laboratory Diagnosis	475	Clinical Features	499
Epidemiology	476	Pathogenesis, Pathology, and Immunity	501
Prevention	476	Laboratory Diagnosis	502
Further Reading	476	Epidemiology, Prevention, Control, and Treatment	502

35. Togaviruses

Properties of Togaviruses	477	Zika Virus	504
Classification	477	Japanese Encephalitis	505
Virion Properties	477	Clinical Features	505
Viral Replication	480	Pathogenesis, Pathology, and Immunity	505
Diseases Caused by Members of the Genus <i>Alphavirus</i>	481	Laboratory Diagnosis	505
Alphaviruses Causing Encephalitis—Eastern, Western, and Venezuelan Encephalitis	481	Epidemiology, Prevention, Control, and Treatment	506
Clinical Features	481	West Nile Virus Infection	508
Pathogenesis, Pathology, and Immunity	481	Clinical Features	508
Laboratory Diagnosis	481	Pathogenesis, Pathology, and Immunity	508
Epidemiology	482	Laboratory Diagnosis	508
Prevention, Control, Treatment	484	Epidemiology, Prevention, Control, and Treatment	508
Alphavirus Infections Marked by Fever, Rash, Myalgia, Arthralgia, and Arthritis	484	St. Louis Encephalitis	510
Chikungunya	484	Usutu Virus Infection	510
Clinical Features	484	Murray Valley (Australian) Encephalitis	510
Pathogenesis, Pathology, and Immunity	485	Rocio Virus Encephalitis	510
Other Alphavirus Infections	486	Diseases Caused by Tick-Borne Members of the Genus <i>Flavivirus</i>	511
O'nyong-nyong Virus, Mayaro, Ross River, and Sindbis Virus Infections	486	Tick-Borne Encephalitis	511
Disease Caused by the Rubivirus Rubella Virus	488	Clinical Features	511
Clinical Features	488	Pathogenesis, Pathology, and Immunity	511
Congenital Rubella Syndrome	488	Laboratory Diagnosis	511
Pathogenesis, Pathology, and Immunity	489	Epidemiology, Prevention, Control, and Treatment	511
Laboratory Diagnosis	489	Other Tick-Borne Flavivirus Infections of Humans	512
Epidemiology, Prevention, Control, Treatment	490	Diseases Caused by Members of the Genus <i>Hepacivirus</i>	514
Further Reading	491	Hepatitis C	514

36. Flaviviruses

Properties of Flaviviruses	493	Clinical Features	514
Classification	493	Pathogenesis, Pathology, and Immunity	514
Virion Properties	493	Laboratory Diagnosis	516
Viral Replication	496	Epidemiology, Prevention, Control, and Treatment	516
Diseases Caused by Mosquito-Borne Member Viruses of the Genus <i>Flavivirus</i>	497	Other Hepaciviruses	518
Clinical Features	497	Further Reading	518
Pathogenesis, Pathology, and Immunity	497		
Laboratory Diagnosis	497		
Yellow Fever	498		
Clinical Features	498		
		37. Hepeviruses	
		Classification and Properties of Hepatitis E Virus	519
		Viral Replication	521
		Clinical Features	521
		Pathology, Pathogenesis, and Immunity	522

Laboratory Diagnosis	523	Bronchiolitis	541
Epidemiology, Prevention, Control, and Therapeutics	523	Viral Pneumonia	541
Further Reading	525	Viral Gastroenteritis	541
38. Prions			
Properties of Prions	527	Viral Diseases of the Central Nervous System	543
Classification	527	Meningitis	543
Prion Properties	529	Encephalitis	544
Prion Replication	530	Paralysis	545
Human Prion Diseases	532	Post-Infectious Encephalomyelitis	545
Creutzfeldt-Jakob Disease	532	Guillain-Barré Syndrome	545
Bovine Spongiform Encephalopathy (BSE) and Variant Creutzfeldt-Jakob Disease (vCJD)	532	Reye's Syndrome	546
Kuru	533	Chronic Demyelinating Diseases	546
Gerstmann-Sträussler-Scheinker Syndrome and Fatal Familial Insomnia	533	HIV Encephalopathy (HIV Dementia Complex)	546
Iatrogenic Prion Diseases	533	Tropical Spastic Paraparesis	546
Diagnosis	534	Subacute Spongiform Encephalopathy	546
Treatment and Prevention	534	Other Neurological Conditions	546
Other Chronic Neurodegenerative Diseases	534	Viral Skin Rashes	547
Further Reading	535	Viral Hemorrhagic Fevers	548
39. Viral Syndromes			
The Human Virome	537	Viral Genitourinary Infections	548
Viral Diseases of the Respiratory Tract	538	Viral Diseases of the Eye	550
Rhinitis (Common Cold)	539	Viral Arthritis	551
Pharyngitis	539	Viral Carditis	552
Laryngotracheobronchitis (Croup)	540	Viral Hepatitis	552
Tracheitis and Tracheobronchitis	541	Viral Pancreatitis and Diabetes	553
		Chronic Fatigue Syndrome	554
		Congenital and Perinatal Viral Infections	554
		Viral Infections in Immunocompromised Patients	555
		Diseases of Unknown Etiology	556
		Further Reading	556
		Index	557
