

Brief Contents

V o l u m e 1		
Adhesives.	.1	Blood Vessel Mechanics. 392
Allografts.	.8	Bone Cement 403
Alumina.	.17	Bone Fracture Fixation. 413
Angiogenesis Inhibitors.	.26	Bone-Implant Interface. 423
Animal Models for Bone Tissue Engineering	.33	Bone Plates and Screws, Bioabsorbable 432
Animal Surrogate Systems for Toxicity Testing	.51	Bone Remodeling. 439
Antimicrobial/Antibiotic (Infection Resistance)		Burn Dressing 448
Materials	.61	Calcium Phosphate Ceramics: New Generation
Antimineralization Treatment.	.71	Produced in Japan. 461
Articular Cartilage Biomechanics.	.85	Cardiac Assist Devices. 470
Artificial Heart Fluid Dynamics: Positive		Cardiac Bioelectricity. 480
Displacement Pumps.	.95	Cardiac Catheters. 491
Artificial Muscles.	.108	Cardiac Elastography, Full-Field
Artificial Neural Networks: An Overview	.119	Development 506
Bioactive Glass.	.133	Cardiac Output, Basic Measurement
Bioactive Materials and Scaffolds for		Principles. 514
Tissue Engineering.	.142	Cardiac Pacemaker. 532
Bioadhesion.	.152	Cardiac Patch Engineering. 542
Biocatalysis.	.162	Cartilage Regeneration. 552
Biocompatibility Testing.	.169	Cell Culture Assays. 561
Biocomposites.	.179	Cell-Material Interaction. 568
Biodegradable Polymers: An Overview	.195	Centrifugal Blood Pumps. 574
Biofilms	.207	Ceramics. 585
Biofunctional Polymers.	.218	Ceramics in Dentistry. 593
Biologic and Synthetic Apatites.	.225	Chitosan. 604
Biological Adhesives from Nature.	.236	Chondroitin Sulfates. 618
Biological Effects of Radiofrequency		Collagen. 628
Electromagnetic Field.	.254	Collagen Fixation. 639
Biomaterials Immune Response.	.262	Collagen Processing. 652
Biomaterials: Protein-Surface Interactions	.270	Composites. 659
Biomedical Ethics.	.285	Compression of Digital Biomedical Signals 677
Biomimetic Materials.	.294	Computer-Assisted Surgery. 687
Biopotential Amplifiers.	.301	Conductive Polymers. 695
Bioreactors.	.310	Confocal Microscopy. 705
Biorubber/Poly(Glycerol Sebacate).	.327	Contact Lenses: Silicone Hydrogels. 715
Biosensors.	.335	Control of Movement 729
Biosynthesis and Applications of Alginates	.350	Controlled Release. 739
Bioresorbable Polymers and Bioceramics:	.360	Corneal Implants. 747
		Corrosion. 754
		Cryopreservation of Living Cells. 762
		Defibrillators. 772
		Dental Biomaterials: Polymers 789

Dental Implants.	808	Glucose Sensors.	1174
Diamond and Diamond-Like Carbons.	822	Glues.	1185
Dielectric Properties of Tissues.	832	Glycosaminoglycans and Proteoglycans	1195
Digital Biomedical Signal Acquisition and Processing: Basic Topics.	843	Gradient Surfaces: Preparation, Characterization, and Interactions with Biological Species.	1210
Digital Biomedical Signal Processing: Advanced Topics.	854	Hard Tissue: Biomaterial Interactions.	1229
Distal Protection Devices.	870	Hard Tissue Elastic Properties.	1236
Drug Delivery, Controlled.	880	Healing of Bone and Connective Tissues	1249
Elastin.	891	Hearing Aids.	1263
Elastomers, Biodegradable.	897	Hearing Mechanisms.	1271
Electric Cell-Substrate Impedance Sensing.	908	Heart Biomechanics.	1280
Electrical Impedance Imaging.	915	Heart Valve, Bioprosthetic.	1291
Electroactive Polymeric Materials.	926	Heart Valve Failure, Bioprosthetic.	1306
Electrocardiography.	936	Heart Valve Mechanics.	1317
Electrogastrography.	947	Heart Valves, Mechanical.	1329
Electromyography.	956	Hematopoietic Stem Cells and Assays	1338
Electron Microscopy.	968	Hemocompatible Materials.	1345
A		Hemodynamics, Macrocirculatory	1356
Electrospinning.	978	Heparin-Binding to Improve Biocompatibility.	1368
Endoscopy.	986	...	
Ergonomics.	999	Hip Biomechanics	1377
3			
Excitable Tissue, Electrical Stimulation Of	1009	Hip Joint: Overuse Injuries.	1393
Extracellular Matrix Scaffolds.	1021	Histogenesis.	1403
Eye Tracking: Characteristics and Methods.	1028	Host Reactions.	1411
Eye Tracking: Research Areas and Applications.	1033	Hyaluronan.	1421
Fabrics.	1043	Hybrid Vascular Prostheses.	1432
Fiber Optic Biosensors.	1062	Hydrogels.	1439
Fibrin.	1072	Hydroxyapatite.	1451
Fibrin Sealants.	1080	Hydroxyapatite Coatings.	1464
Finite Element Analysis.	1091	Implant, Total Hip.	1470
Flow Cytometry.	1100	Implanted Medical Devices, Power Sources For.	1484
Foreign Body Response.	1111	Infection of Medical Devices.	1497
Functional MRI: Applications.	1119	Inner Ear Implants.	1507
Gait Analysis.	1129	Insulin Delivery.	1514
Gene-Activated Matrix.	1142	Integrins.	1524
Gene Therapy.	1150	Intellectual Property Management	1540
Glucose-Responsive Hydrogels.	1163	Interpenetrating Polymeric Networks.	1549
